

COMPLETE YOUR  
DEGREE EDUCATION  
IN THE USA

## Do you want to fulfil your ambition and study in the USA?

With several thousand colleges and universities in the US, researching and applying to universities in the US can be overwhelming. The good news is that Pearson qualifications are accepted by universities across the US, but Pearson wants to support you in finding the best university for you.

## I know where I want to study, what's next?

If you already know where you might want to study in the US, do a university search on the Degree Course Finder (DCF) to make sure the US University of your choice accepts your Pearson qualification. If the university is not listed, that **DOES NOT** mean the university will not consider your application.

Please use the feedback button at the top of the DCF or email [progression@pearson.com](mailto:progression@pearson.com) to find out why the university you want to apply to is not listed. Someone at Pearson will contact you within 48 hours to discuss your concern.

Every US university website has an international student admissions page, which has detailed information about how to apply. Please follow the university's guidance.

If you want any additional support, we recommend the following:

- Speak to a Career Counsellor or Tutor at your school/centre.
- Contact Pearson's US partner, World Education Group (WEgroup).
- Visit any of the following websites, which includes useful information on applying to US universities:

[www.worldeducationgroup.com](http://www.worldeducationgroup.com)

<https://bigfuture.collegeboard.org/>

<https://www.coursera.org/course/usuniversities>

<http://www.iefp.org/>

## I have no idea where I want to study, how can Pearson help?

Pearson has teamed up with a US organisation, World Education Group (WEgroup), to help our students apply to US universities with their Pearson qualification.

WEgroup is offering all Pearson learners a discounted rate of \$395 to help you throughout your application process.
