Dear Tony

Re: Approval of the Pearson BTEC Higher Nationals in Construction and Construction and the Built Environment

The Chartered Institute of Architectural Technologists (CIAT) is a dynamic, forward-thinking and inclusive global membership qualifying body for Architectural Technology. Our website is ciat.org.uk.

CIAT has Approved the following BTEC Higher National qualifications as being fit for purpose in preparing Pearson's learners for a role in the construction and built environment sector, such as Architectural Technology, and this Approval is applicable both in the UK and overseas:

- BTEC Higher Nationals (Levels 4 and 5) in Construction
- BTEC Higher Nationals (Levels 4 and 5) in Construction and the Built Environment.

CIAT Approval implies that the programme has been assessed in terms of content, structure, resources and has met the Institute's requirements. If you aspire to become an Architectural Technology professional studying an Approved programme will provide a knowledge and understanding of the discipline, enable a career within the profession and facilitate access to Associate membership of CIAT with a view to potentially qualifying as a Chartered Architectural Technologist, MCIAT.

CIAT is happy for its name, web address and logo to be made available on the Pearson websites to confirm that we Approve the qualifications.

Yours sincerely

Adam Endacott
Communications Director
