

Functional Skills On-Demand Step-by-step process

What does ResultsPlus do?

It provides results and feedback and analysis on

- ✓ **English and Mathematics** Level 1 and 2
- ✓ **Digital** Entry 3
- ✓ Level 1 **Functional Skills assessments**

allowing you to understand student weaknesses and tailor support. It gives better, deeper analysis of individual students' exam performance, so you can design targeted learning to address weaknesses.

With student by student breakdowns of their strengths and weaknesses, you can **develop tailored individual student plans** and **increase their chances of passing** at the next attempt.

Through **cohort analysis report**, you can see if below-expectations performance is part of a wider trend, and whether it's isolated to specific parts of the curriculum or generalised across the whole subject.

It gives you **behind-the-grade insight** into your students' performance.

It helps you **understand results** and **target improvements**.

Step 1: Login to ResultsPlus

To access feedback on ResultsPlus, you need an **EdexcelOnline login with ResultPlus** added to it. Once logged in, select the correct centre number. For most users, this happens automatically, but if your centre has multiple numbers, use the drop-down menu.

From this drop-down menu, you should choose the correct **centre number**.

Top Tip: this usually includes a letter after the code followed by the centre name.

Next, click **Functional Skills On-Demand Analysis** in the second group of links.

You're now ready to view your data.

Step 2: Retrieve Individual Student results

To search by **Individual Student**, enter the student's details. You can search by **personal details** (e.g. forename, surname), or by the **date the test was taken**.

Get student results

Student's forename

Student's surname

Date of birth

DD/MM/YYYY

Test date

DD/MM/YYYY

Once you have found the student for whom you are searching, press the **View** tab.
