

## Pearson Onscreen Platform (Offline)

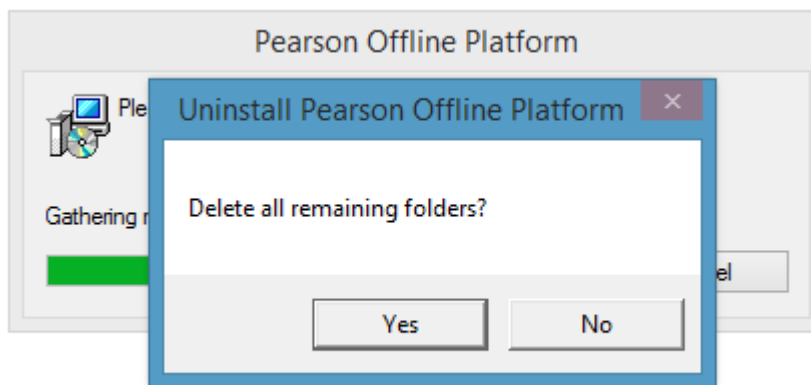

Release notes – v.5.0.3634.1

If you are updating to v.5.0.3634.1 (Offline) please **complete any pending uploads before activating your installer** package.

This update addresses two issues:

- Tests crashing or freezing
- Problems accessing the offline dashboard, and / or accessing tests downloaded to the offline dashboard.

If you have experienced problems accessing the offline dashboard or tests then you should remove the corrupted files by answering **YES** when you see the following prompt during the installation process.

In all other cases users respond **NO** as the deletion of files is unnecessary unless you have encountered this issue
