

Pearson

A sneak peek - Submitting Centre Assessment Grade and Rank Order system

In development

28 April 2020

Introduction

You will need to submit your centre assessed grades and rank order to us via the Pearson system, this will be accessible via **Edexcel Online**. Our best current thinking is that you will be able to download a spreadsheet template with your learner details populated, this will be a good cross check for yourselves of who has been entered to receive an outcome. You will then need to add the grades and rank order offline before uploading back into the Pearson system once complete. You will be able to do this subject by subject. Not all learners or subjects need to be submitted at the same time.

We are also looking to provide an online option where you will be able to input the grades and rank order directly into the system against each learner, we'll update you on this once we have more information.

This new system is still a work in progress, but we wanted to share details of our system design with you. It will be the same for both general, vocational and technical qualifications. We have run a number of Exams Officers briefings in the past week where the system design was shared, and feedback sought.

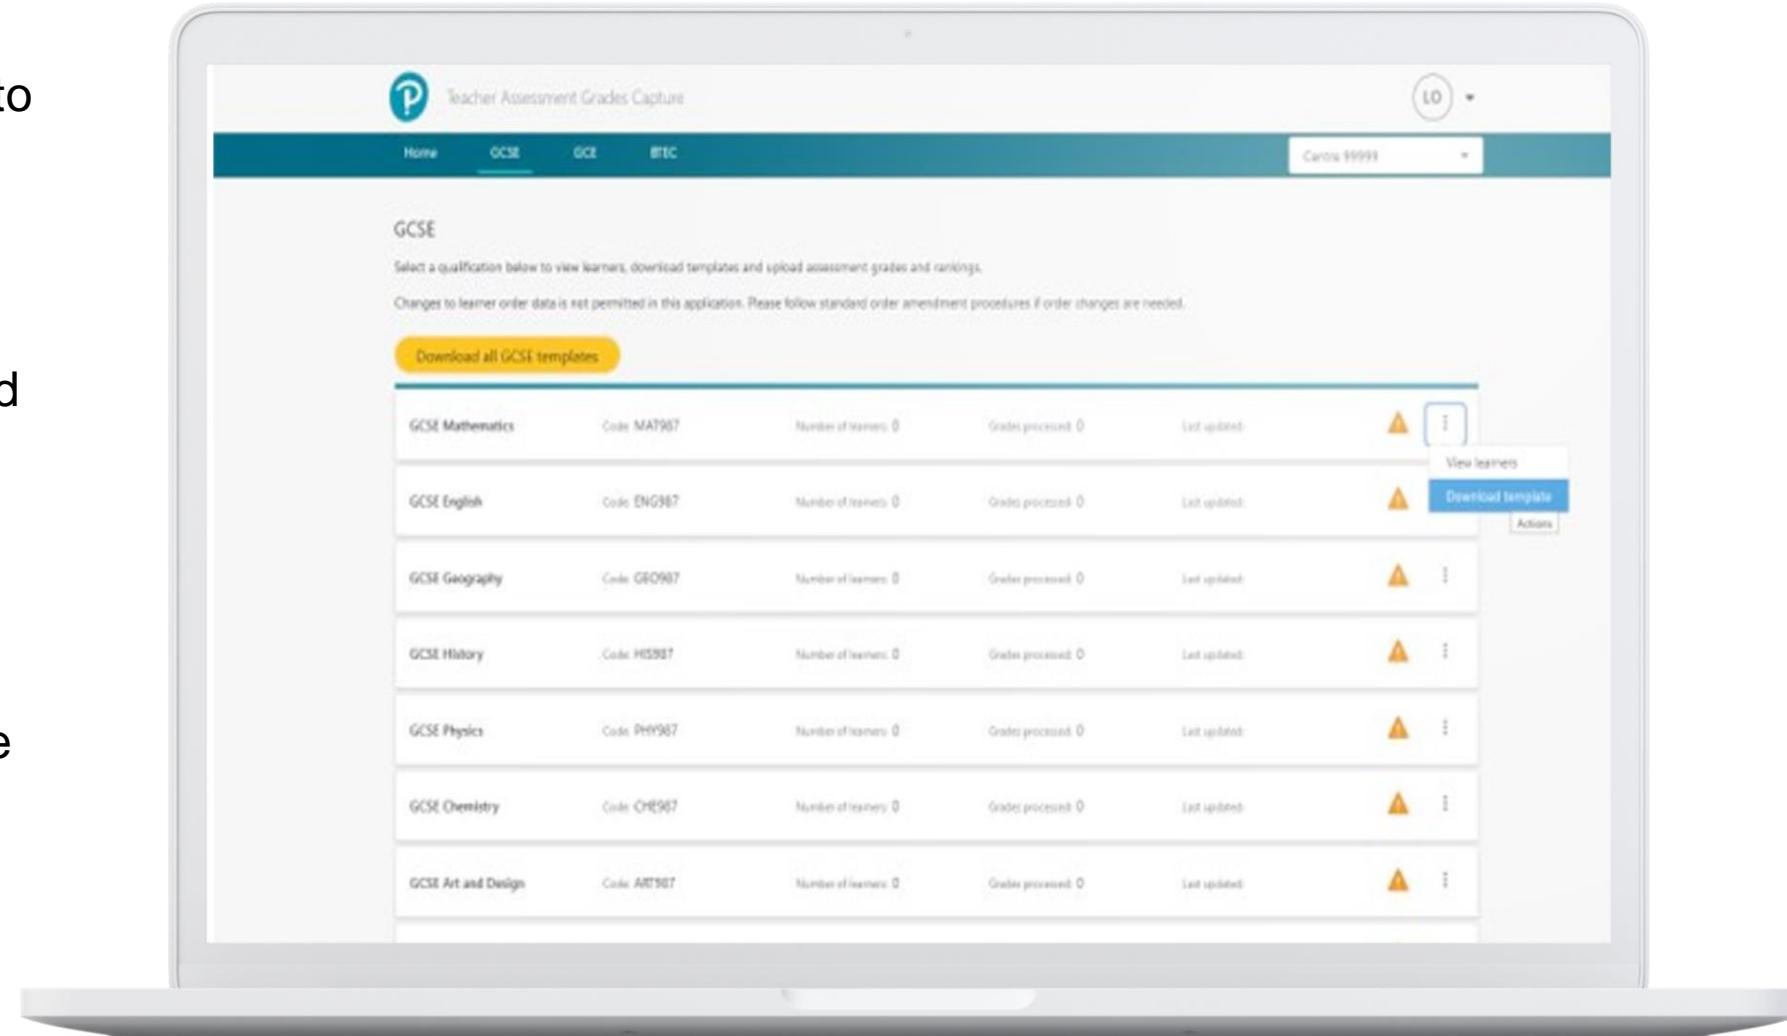

Please note: The input screens have been mocked up. The process and input screens will be the same regardless of the qualification, only the grade sets will differ.

Downloading your centre data

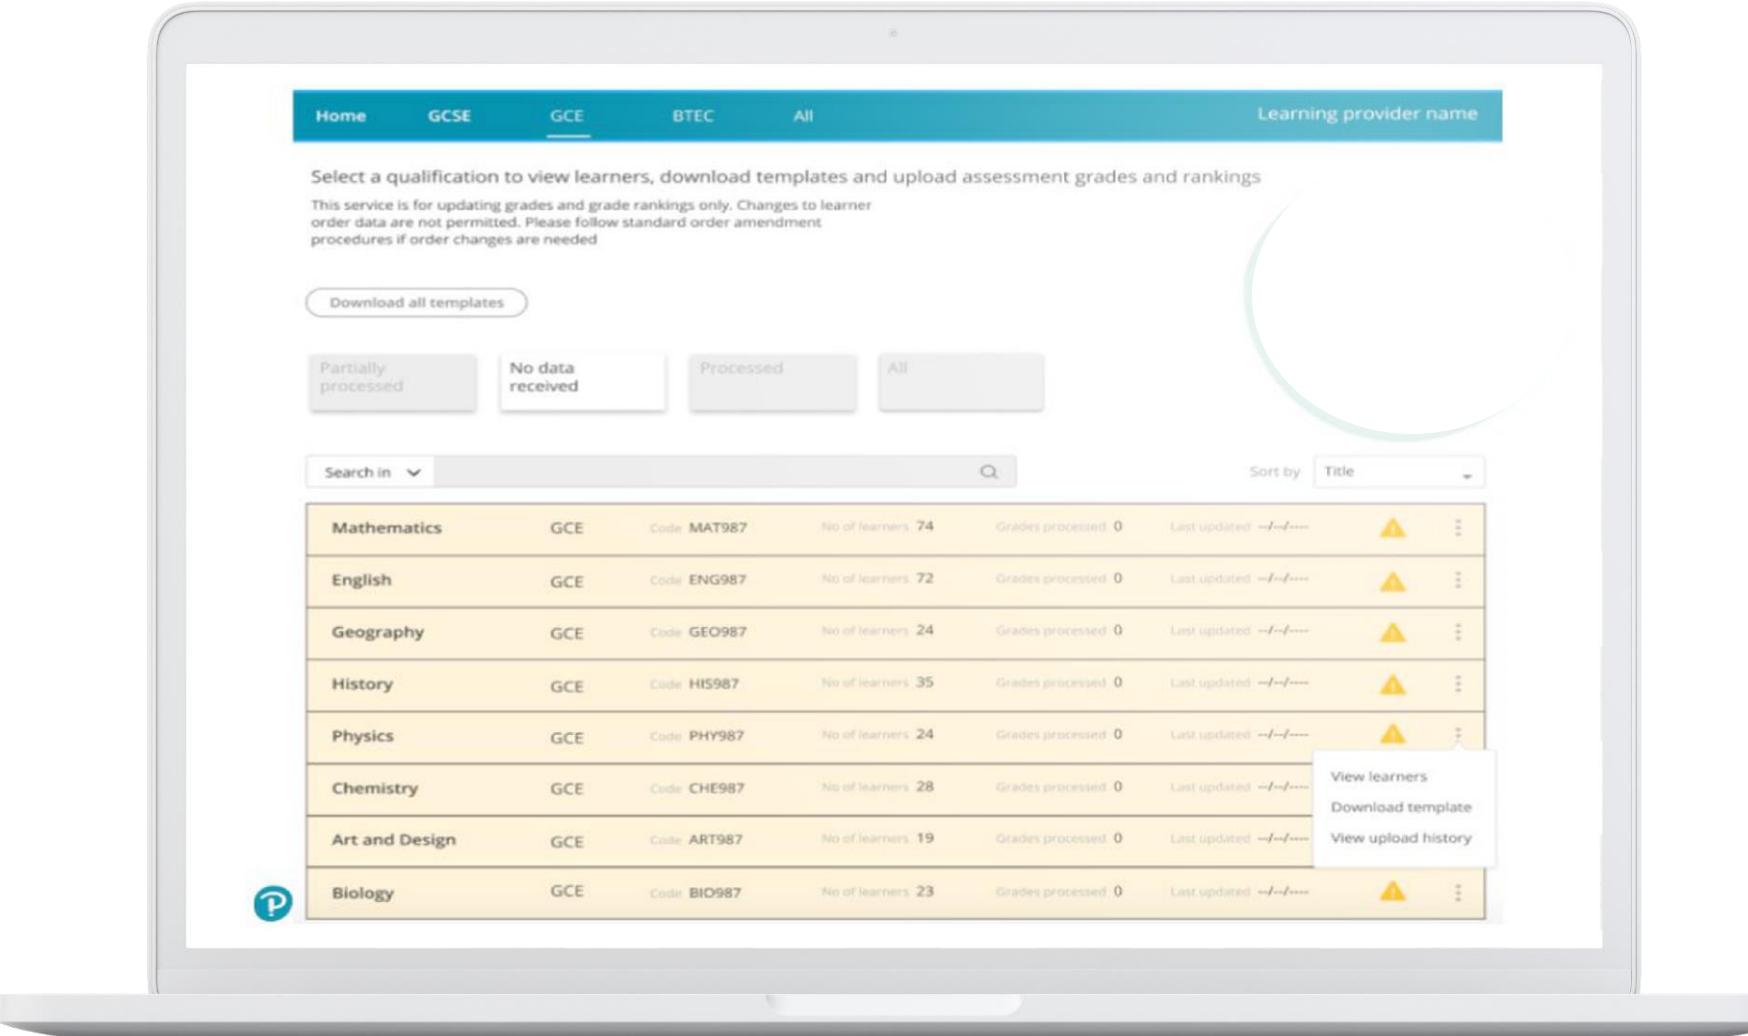

You will be able to navigate within the system to a screen where you will be presented with details of your summer qualifications.

You will be able to download your templates and see the status of your submissions throughout the process.

On selecting a qualification you will see the options to view learners or download a template for inputting grades and rank order.

Spreadsheet Upload

The screenshot shows a web-based application for managing learner data. At the top, there is a navigation bar with tabs: Home, GCSE, GCE (which is selected), BTEC, and All. A search bar labeled 'Learning provider name' is also at the top. Below the navigation, a message reads: 'Select a qualification to view learners, download templates and upload assessment grades and rankings. This service is for updating grades and grade rankings only. Changes to learner order data are not permitted. Please follow standard order amendment procedures if order changes are needed.' There are four buttons below this message: 'Download all templates', 'Partially processed', 'No data received', and 'Processed'. An 'All' button is also present. A search bar with a magnifying glass icon and a 'Sort by' dropdown are located below these buttons. The main content area displays a table of qualifications:

Subject	Level	Code	No of learners	Grades processed	Last updated	Action
Mathematics	GCE	MAT987	74	0	2023-09-01	 
English	GCE	ENG987	72	0	2023-09-01	 
Geography	GCE	GEO987	24	0	2023-09-01	 
History	GCE	HIS987	35	0	2023-09-01	 
Physics	GCE	PHY987	24	0	2023-09-01	 
Chemistry	GCE	CHE987	28	0	2023-09-01	 
Art and Design	GCE	ART987	19	0	2023-09-01	 
Biology	GCE	BIO987	23	0	2023-09-01	 

A context menu is open over the last row (Biology). The menu items are: 'View learners', 'Download template', and 'View upload history'.

We've designed the system to ensure that the data being submitted meets the criteria outlined by Ofqual, namely that a centre assessment grade and unique rank order is provided for each learner.

You do not need to submit all of your learner data at once.

Learner detail and orders should not be amended in the file but using usual methods.

Data validation

If you miss one of these elements, the system will highlight this, so you can go back and complete it.

You can do this in your own time and leave it and come back to it if you need to resolve errors or ask questions of other colleagues

Direct input

An alternative approach, perhaps more useful for small cohorts, is to submit the data via direct input at learner level.

We are still developing the system and will share more information and screen grabs as we have them available.

Please note: these screen shots are from our developers and do not fully represent what the system will look like.

We are still developing the system
and will share more information
and screen grabs as we have them
available

We'd love your feedback; you can
provide this by completing this
short questionnaire
