Your Technical Qualification will start

What will you learn and how will you learn it?
You will gain knowledge and practical skills that will help you complete the assessments and prepare you for working in your chosen Occupational Specialist Component. In the Core Component you’ll learn more about topics including: The Business Environment, Regulation, Professionalism and Ethics, Security and Risk, and Project/Change Management and Administration. In the Occupational Specialist Component you’ll develop the skills to prepare you for your career in Accounting. If you want to find out more about what you’ll learn take a look at the Qualification Description on our T Level Student webpage.

Your college will plan how your learning will take place, but it should be as practical as possible. This could include learning some theory in the classroom, then applying your knowledge to a group activity. You may have local employers come into college to teach you, you may go on visits to employers to see how they work, or you may do some activities with employers in their place of work.

What is the Core Component assessment made up of?
Exam Paper 1 – 2 ½ hours
Exam Paper 2 – 2 ½ hours
Employer Set Project – Pearson will create this with the help of our employer experts. It will be made up of 5 tasks. The tasks will be completed over a few weeks, but before you start you’ll have some time to do some research and prepare. You will work in exam conditions, sometimes you’ll be able to use the internet, and you won’t be able to do any of the work at home or ask your friends for help.

The Occupational Specialist Component is made up of a large project.
The project will be about your chosen Occupational Specialist Component: Assistant Accountant. You will start the project in April, and be given until May to finish it. Your college will set the time for when you’ll complete the project, you’ll work in exam conditions, sometimes you’ll be able to use the internet, you won’t be able to do any of the work at home, or ask your friends for help.

During your T Level Journey for Accounting
1. 315 hour industry placement (approximately 45 days)
2. A Technical Qualification – where you will specialise in a particular occupation
Your Technical Qualification will be the largest part of your T Level it will be a total of 1100 hours which equates to 3 ½ A Levels. It is split into two Components.
1. The Core Component, which has two exams and an Employer Set Project.
2. The Occupational Specialist Component, which has a large project.

If you need to re-sit any of the Core Component, you’ll do this after you have completed the Occupational Specialist Project.
