

T LEVEL

Technical Qualification in Design, Surveying and Planning for Construction

T Level talent at Exeter college

Provider

Provider:
Exeter College

Location: Exeter

Area type: City

“The T Level has challenged me in various ways including, applying the theory learnt at college to the practical experience gained in my Industry Placement”

Why did you choose to study a T Level?

The T Level in Design, Surveying and Planning for Construction was not my first choice, however it was recommended at an Exeter College Open day event, because the content of the course fits with my future career path as an Architect.

Where do you hope your T Level will take you in the future, in terms of a job or higher education?

After completion of the T Level, I will be looking to extend my studies by either progressing onto a Higher Level Apprenticeship or a Higher National Certificate within a construction firm.

How has the T Level challenged you so far?

The T Level has challenged me in various ways including, applying the theory learnt at college to the practical experience gained in my Industry Placement use of Design Programmes and working at a higher level including Mathematics and Science.

What's been your favorite part of your T Level so far?

I have enjoyed the assessment based approach from the Modular Home component and taking the concept of the given project brief set by the lecturers and producing a project/assessment incorporating the knowledge I have learnt from College.
