and Development

**T Level talent at
Gateshead college**

Provider:
Gateshead College

Location:
East Gateshead

Area type:
Town

Why did you chose to study a T Level?

I chose to study a T Level for the practical workplace element of the course and for the reason of enjoying and liking the subject. I chose computer science in my options at secondary and really enjoyed it and hoped to carry that on in college.

Where do you hope your T Level will take you in the future, in terms of a job or higher education?

I'm hoping to get an apprenticeship as well as going off to university. This is because I think this will help me to get into a better job if I continue with the learning.

How has the T Level challenged you so far?

The most challenging part for me so far is the systems part of the T Levels course it was the part of the course that I had the least prior knowledge on. I have done some programming before but not any work on systems.

What has been your favourite part of your T Level so far?

My favourite part of the course so far has got to be the programming elements of the course. This is because I find it the most interesting and there is always something new to learn.

Would you recommend taking a T Level to other people?

Yes, I would definitely recommend this course to anyone who likes digital and would want to go further into their career with this.

"My favourite part of the T Level course so far has got to be programming"
