

## BTEC International Level 3 - **Engineering** - Content Mapping

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
1	Health and safety in the workplace	<p><b>Fully covered in:</b></p> <p><b>Unit 2 Delivery of engineering processes safety as a team</b></p> <p>A2 Health and safety requirements C3 Health and safety risk assessment</p> <p><b>Unit 41 Manufacturing secondary machining processes</b></p> <p>B1 Health and safety requirements when setting up secondary press machines B2 Risk assessment</p> <p><b>Unit 5 Specialist engineering project</b></p> <p>B2 Risk and issues project management process processes</p> <p><b>Unit 46 Manufacturing joining, finishing and assembly processes</b></p> <p>A3 Safe working practices when using joining processes</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
2	Communications for engineering technicians	<p><b>Fully covered in:</b></p> <p><b>Unit 3 Product design and manufacture in engineering</b></p> <p>A1 Design triggers</p> <p>A2 Design challenges</p> <p>A3 Equipment level and system level constraints and opportunities</p> <p>A4 Design for a customer</p> <p>A5 Regulatory constraints and opportunities</p> <p>A6 Market analysis</p> <p>A7 Performance analysis</p> <p>A8 Manufacturing analysis</p> <p>A9 Statistical methods</p> <p>B1 Design proposals</p> <p>B2 Communicating designs</p> <p><b>Unit 2 Delivery of engineering processes safety as a team</b></p> <p>C4 Preparation activities for batch manufacture or batch service delivery</p> <p>A3 Human factors affecting the performance of engineering processes</p> <p>C1 Principles of effective teams</p> <p><b>Unit 5 Specialist engineering project</b></p> <p>B4 Design information</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
3	Engineering project	<p><b>Fully covered in:</b></p> <p><b>Unit 5 A specialist engineering project</b></p> <p>A1 Project life cycle</p> <p>A2 Project idea generation and solution development</p> <p>A3 Feasibility study</p> <p>B1 Planning and monitoring project management processes</p> <p>B2 Risk and issue project management processes</p> <p>B3 Technical specification</p> <p>B4 Design information</p> <p>C1 Undertake and test the solution to the problem</p> <p>C2 Demonstrate relevant behaviours</p> <p>C3 Present a solution to the problem</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
4	Mathematics for engineering technicians	<p><b>Fully covered in:</b></p> <p><b>Unit 1 Mechanical principles</b></p> <p>A1 Algebraic methods A2 Trigonometric methods</p> <p><b>Unit 7 Calculus to solve engineering problems</b></p> <p>A2 Methods of differentiation B1 Integration as the reverse/inverse of differentiation B2 Integration as a summing tool B3 Numerical integration C4 Solution implementation</p> <p><b>Unit 8 Further engineering mathematics</b></p> <p>D1 Statistical techniques</p> <p><b>Unit 57 Electrical and electronic principles</b></p> <p>A1 Algebraic Methods A2 Trigonometric methods A3 Statistical methods</p> <p><b>Unit 3 Product design and manufacture in engineering</b></p> <p>A9 Statistical methods</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
5	Mechanical principles and applications	<p><b>Fully covered in:</b></p> <p><b>Unit 1 Mechanical principles</b></p> <p>B1 Static engineering systems  B2 Loaded components  C1 Kinetic parameters  C2 Dynamic parameters  D1 Fluid systems  D2 Immersed bodies</p> <p><b>Unit 28 Dynamic mechanical principles in practice</b></p> <p>A1 Dynamics of systems undergoing acceleration  A2 Linear systems</p> <p><b>Unit 31 Thermodynamic principles and practice</b></p> <p>B1 Closed thermodynamic systems  B2 Open thermodynamic systems</p>	
6	Electrical and electronic principles	<p><b>Fully covered in:</b></p> <p><b>Unit 57 Electrical and electronic principles</b></p> <p>B1 Static and direct current electricity principles  B2 Direct current circuit theory  B3 Direct current networks  C1 Magnetism  C2 Electromagnetic induction  D1 Alternating current waveforms  D2 Single-phase alternating current principles</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
7	Business operations in engineering	<p><b>Fully covered in:</b></p> <p><b>Unit 4 Applied commercial and quality principles in engineering</b></p> <p>B1 Reasons for cost control and types of costs</p> <p>B2 Activity-based costing method</p> <p><b>Unit 2 Delivery of engineering processes safely as team</b></p> <p>A1 Common engineering processes</p> <p><b>Unit 58 Entrepreneurship and entrepreneurship in practice</b></p> <p>A1 Features of the environment</p> <p>A2 Influence of stakeholders on planning and decision making</p> <p>A3 Organisational risks</p> <p><b>Unit 41 Manufacturing secondary machining processes</b></p> <p>B1 Health and safety requirements when setting up secondary press machines</p> <p>B2 Risk assessment</p> <p><b>Unit 5 Specialist engineering project</b></p> <p>B2 Risk and issues project management process processes</p>	
8	Engineering design	<p><b>Fully covered in:</b></p> <p><b>Unit 3 Product design and manufacture in engineering</b></p> <p>A1 Design triggers</p> <p>A4 Designing for a customer</p> <p>A5 Regulatory constraints and opportunities</p> <p>A8 Manufacturing analysis</p> <p>B1 Design proposals</p> <p>B2 Communicating designs</p> <p>B3 Iterative development process</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
9	Commercial aspects for engineering organisations	<p><b>Fully covered in:</b></p> <p><b>Unit 4 Applied commercial and quality principles in engineering</b></p> <p>A1 Business functions and key activities</p> <p>A2 Trade considerations</p> <p>A3 Competitive advantage</p> <p>C1 Quality systems</p> <p><b>Unit 3 Product design and manufacture in engineering</b></p> <p>A5 Regulatory constraints and opportunities</p> <p>A6 Market analysis</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
10	Properties and applications of engineering materials	<p><b>Partially covered in:</b></p> <p><b>Unit 25 Mechanical behaviour of metallic materials</b></p> <p>A1 Types of ferrous metals and alloys</p> <p>A2 Types of non-ferrous metals and alloys</p> <p>A3 Mechanical properties of metallic materials</p> <p>A4 Grain structure of metallic materials</p> <p>A5 Effects of processing on the mechanical properties of metallic materials</p> <p>A6 Microstructures investigation of metallic materials</p> <p>B2 Destructive test procedures</p> <p>C1 Ductile and brittle fracture</p> <p>C2 Creep failure</p> <p>C3 Fatigue failure</p> <p><b>Unit 26 Mechanical behaviour of non-metallic materials</b></p> <p>A1 Types of non-metallic materials</p> <p>A2 Structures of non-metallic materials</p> <p>A3 Mechanical properties of non-metallic materials</p> <p>B2 Destructive test procedures to determine mechanical properties</p> <p>B3 Material defects in non-metallic materials</p> <p>B4 Non-destructive tests used to identify material defects</p> <p>C1 Ductile and brittle fracture</p> <p>C2 Creep failure</p> <p>C3 Fatigue failure</p> <p>C4 Degradation processes</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
		<b>Unit 13 Welding technology</b> B1 The properties and behaviours of metallic materials B2 Unalloyed steel materials B3 Alloyed steel and non-ferrous materials  <b>Unit 3 Product design and manufacture in engineering</b> A7 Performance analysis	
11	Further mechanical principles and applications	<b>Fully covered in:</b> <b>Unit 1 Mechanical principles</b> B1 Static engineering systems B2 Loaded components C3 Angular parameters C4 Lifting machines  <b>Unit 27 Static mechanical principles in practice</b> A1 Static parameters A2 Analysis of statically determinate framed structures B1 Beam parameters  <b>Unit 28 Dynamic mechanical principles in practice</b> A3 Rotational systems B1 System parameters B2 Rotating systems B3 Dynamic balancing C1 Parameters of lift machines C2 Lifting machines	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
12	Applications of mechanical systems in engineering	<p><b>Fully covered in:</b></p> <p><b>Unit 24 Maintenance of mechanical systems</b></p> <p>A1 Lubrication characteristics</p> <p>A2 Lubrication of mechanical systems</p> <p>B1 Mechanical seal characteristics and common applications</p> <p>B2 Bearing characteristics and common applications</p> <p>B3 Fastener characteristics and common applications</p> <p>C1 Gear train function and operation in power transmission systems</p> <p>C2 Typical function and operation of other power transmission components</p> <p><b>Unit 12 Pneumatic and hydraulic systems</b></p> <p>A1 Hydraulic and pneumatic power supply components</p> <p>A2 Hydraulic and pneumatic actuator components</p> <p>A3 Hydraulic and pneumatic system control components</p> <p>A4 General system safety and maintenance</p>	
13	Principles and applications of fluid mechanics	<p><b>Fully covered in:</b></p> <p><b>Unit 29 Principles and applications of fluid mechanics</b></p> <p>A1 Properties and characteristics of fluids</p> <p>A2 Hydrostatic fluid principles and applications</p> <p>A3 Pneumatic fluid principles and applications</p> <p>B1 Dynamic fluid principles</p> <p>B2 Piped internal fluid flows and measuring systems</p> <p>C1 Fluid linear momentum principles</p> <p>C2 Nozzle systems and fluid turbines</p>	<p><b>Not covered:</b></p> <p>LO4 Understand the use of wind tunnel testing, aerodynamic theory and associated test data to determine the aerodynamic parameters of test models</p>

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
14	Applications of Thermodynamic principles	<p><b>Fully covered in:</b></p> <p><b>Unit 31 Thermodynamic principles and practice</b></p> <p>A1 Thermodynamic parameters  A2 Polytropic processes  B2 Closed thermodynamic systems  B2 Open dynamic systems  C2 Combustion processes  C3 Calorific values</p> <p><b>Unit 2 Delivery of engineering processes safely as a team</b></p> <p>A2 Health and safety requirements</p> <p><b>Unit 3 Product design and manufacture in engineering</b></p> <p>A2 Design challenges</p>	
15	Electro, pneumatic and hydraulic systems and devices	<p><b>Fully covered in:</b></p> <p><b>Unit 12 Pneumatic and hydraulic systems</b></p> <p>A1 Hydraulic and pneumatic power supply components  A2 Hydraulic and pneumatic actuator components  A3 Hydraulic and pneumatic system control components  A4 General system safety and maintenance  B1 Creating hydraulic and pneumatic power circuit diagrams  B2 Simulating the operation of hydraulic and pneumatic power circuits  C1 Health and safety requirements for the safe operation of hydraulic and pneumatic power systems  C2 System assembly  C3 Testing and fault finding hydraulic and pneumatic powered systems</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
16	Engineering drawing for technicians	<p><b>Fully covered in:</b></p> <p><b>Unit 2 Delivery of engineering processes safely as a team</b></p> <p>B1 Principles of engineering drawing  B2 2D computer aided drawing  C4 Preparation activities for batch manufacture or batch service delivery</p> <p><b>Unit 3 Product design and manufacture in engineering</b></p> <p>B2 Communicating designs</p> <p><b>Unit 5 A specialist engineering project</b></p> <p>B4 Design information</p> <p><b>Unit 40 Computer aided manufacturing and planning</b></p> <p>B1 Model a component in preparation for manufacture  C3 Product and/or component specification for manufacture</p> <p><b>Unit 19 Electronic devices and circuits</b></p> <p>A5 Schematic capture and simulation of analogue circuits  B4 Schematic capture and simulation of digital circuits</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
17	Computer aided drafting in engineering	<p><b>Fully covered in:</b></p> <p><b>Unit 10 Computer aided design in engineering</b></p> <p>A1 3D parametric modelling</p> <p>A2 Develop 3D components</p> <p>A3 Develop a 3D model</p> <p>A4 Output of drawings from a model</p> <p>B1 2D drawing commands</p> <p>B2 Development of 2D engineering drawings</p> <p>B3 Output of 2D drawings</p> <p>C1 3D modelling commands</p> <p>C2 Develop 3D components</p> <p>C3 Developments of a 3D model</p> <p>C4 Output of product drawings</p> <p><b>Unit 2 Delivery of engineering processes safely as a team</b></p> <p>B1 Principles of engineering drawing</p> <p>B2 2D computer aided drawing</p>	<p><b>Not covered:</b></p> <p>LO2 Know about the software and hardware required to produce CAD drawings</p>

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
18	Advanced mechanical principles and applications	<p><b>Fully covered in:</b></p> <p><b>Unit 27 Static mechanical principles in practice</b></p> <p>C1 Axial loading C2 Bending loading C3 Shear loading C4 Design considerations</p> <p><b>Unit 13 Welding technology</b></p> <p>B1 The properties and behaviours of metallic materials</p> <p><b>Unit 1 Mechanical principles</b></p> <p>B1 Static engineering systems B2 Loaded components C1 Kinetic parameters C2 Dynamic parameters C3 Angular parameters</p>	
19	Mechanical measurements and inspection techniques	<p><b>Fully covered in:</b></p> <p><b>Unit 30 Mechanical measurement and inspection technology</b></p> <p>A1 Limits and fits A2 Tolerances B2 Types of mechanical measurement B3 Comparators B4 Gauging system B5 Component features, types and manufacturing processes C1 Principles of statistics C2 SPC procedure</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
20	Engineering primary forming processes	<p><b>Fully covered in</b></p> <p><b>Unit 42 Manufacturing primary forming processes</b></p> <p>A1 Metal moulding processes</p> <p>A2 Ceramic moulding processes</p> <p>A3 Polymer moulding processes</p> <p>B1 Metal deformation processes</p> <p>B Polymer deformation processes</p> <p>C1 Safe working practices for primary forming processes</p> <p><b>Unit 47 Composites manufacture and repair processes</b></p> <p>A1 Characteristics of fibre materials</p> <p>A2 Characteristics of polymer resin materials</p> <p>A4 Applications of FRP composites</p> <p>B2 Characteristics of wet and dry lay-up manufacturing processes</p> <p>C1 Applying wet and dry lay-up manufacturing processes</p> <p><b>Unit 3 Product design and manufacture in engineering</b></p> <p>A8 Manufacturing analysis</p> <p>B6 Manufacturing processes</p> <p><b>Unit 2 Delivery of engineering processes safety as a team</b></p> <p>A2 Health and safety requirements</p> <p>C3 Health and safety risk assessment</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
21	Engineering secondary and finishing techniques	<p><b>Fully covered in:</b></p> <p><b>Unit 41 Manufacturing secondary machine processes</b></p> <p>A1 Traditional secondary machining processes</p> <p>A2 Specialist secondary machine processes</p> <p>B1 Health and safety requirements when setting up secondary process machines</p> <p><b>Unit 2 Delivery of engineering processes safely as a team</b></p> <p>A1 Common engineering processes</p> <p>A2 Health and safety requirements</p> <p><b>Unit 46 Manufacturing joining, finishing and assembly processes</b></p> <p>B1 Hot finishing processes</p> <p>B2 Anodising finishing processes</p> <p>B3 Plating finishing processes</p>	<p><b>Not covered:</b></p> <p>LO3 Know how heat treatment processes and assembly techniques are used</p>

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
22	Fabrication processes and technology	<p><b>Fully covered in:</b></p> <p><b>Unit 2 Delivery of engineering processes safety as a team</b></p> <p>A2 Health and safety requirements</p> <p><b>Unit 44 Fabrication manufacturing processes</b></p> <p>A1 Fabricated products</p> <p>A2 Sheets materials</p> <p>A3 Cutting processes</p> <p>A4 Forming processes</p> <p>A5 Joining processes</p> <p>A6 Finishing processes</p> <p>B3 Interpreting design specifications</p> <p>C1 Using fabrication manufacturing processes</p> <p>C2 Alignment and clamping</p> <p>C3 Quality control procedures</p> <p><b>Unit 46 Manufacturing joining, finishing and assembly processes</b></p> <p>A3 Safe working practices when using joining processes</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
23	Welding technology	<p><b>Fully covered in:</b></p> <p><b>Unit 13 Welding technology</b></p> <p>A1 Welding terminology for processes and equipment</p> <p>A2 Gas-shielded arc welding - shielding gases</p> <p>A3 Common welding processes</p> <p>A4 Welding electrotechnics</p> <p>B1 The properties and behaviours of metallic materials</p> <p>B2 Unalloyed steel materials</p> <p>B3 Alloyed steel and non-ferrous materials</p> <p>B4 Defects and irregularities in welded joints</p> <p>C1 Prepare for welding operations</p> <p>C2 Welding parameters and settings</p> <p>C3 Welding of joints safely</p> <p><b>Unit 2 Delivery of engineering processes safely as a team</b></p> <p>A2 Health and safety requirements</p> <p>C3 Health and safety risk assessment</p> <p><b>Unit 33 Fabrication manufacturing processes</b></p> <p>C3 Quality control procedure</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
25	Selecting and using programmable controllers	<p><b>Fully covered in:</b></p> <p><b>Unit 6 Microcontroller systems</b></p> <p>A1 Control hardware  A2 Input devices  A3 Output devices  A4 Selecting hardware devices and system design  B1 Assembling and operating a microcontroller system  B2 Programming techniques  B3 Coding constructs  B4 Structured program design  B5 Number systems</p> <p><b>Unit 14 Electrical installation of hardware and cables</b></p> <p>C1 Cables  C2 Connectors  C3 Wiring enclosures</p>	
26	Applications of computer numerical control in engineering	<p><b>Fully covered in:</b></p> <p><b>Unit 26 Applications of computer numerical control in engineering</b></p> <p>A1 CNC machine tool control systems  A2 Open and closed loop feedback systems  B1 CNC Processes for milling and turning  B2 Tooling parameters  B3 Component parameters  B4 Machine set-up parameters  B5 Development of CNC part program  C1 Manufacture a component using a CNC machine</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
27	Welding principles	<p><b>Fully covered in:</b></p> <p><b>Unit 13 Welding technology</b></p> <p>A1 Welding terminology for processes and equipment</p> <p>A2 Gas-shielded arc welding - shielding gases</p> <p>A3 Common welding processes</p> <p>A4 Welding electrotechnics</p> <p>B2 Unalloyed steel materials</p> <p>B3 Alloyed steel and non-ferrous materials</p> <p>B4 Defects and irregularities in welded joints</p> <p>C1 Prepare for welding operations</p> <p><b>Unit 2 Delivery of engineering processes safely as a team</b></p> <p>A2 Health and safety requirements</p> <p>C3 Health and safety risk assessment</p> <p><b>Unit 33 Fabrication manufacturing processes</b></p> <p>C3 Quality control procedures</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
28	Further mathematics of engineering technicians (issue 2)	<p><b>Fully covered in:</b></p> <p><b>Unit 1 Mechanical principles</b></p> <p>A1 Algebraic methods A2 Trigonometric methods</p> <p><b>Unit 7 Calculus to solve engineering problems</b></p> <p>A2 Methods of differentiation B1 Integration as the reverse/inverse of differentiation B2 Integration as a summing tool B3 Numerical integration</p> <p><b>Unit 8 Further engineering mathematics</b></p> <p>A1 Arithmetic and geometric progressions C1 Complex numbers D1 Statistical techniques D2 Probability distributions D3 Statistical investigation</p>	
29	Manufacturing planning	<p><b>Fully covered in:</b></p> <p><b>Unit 39 Modern manufacturing systems</b></p> <p>A2 Performance objectives in manufacturing operations B1 Process types and typical industrial applications B3 Characteristics of effective system layout B4 Manufacturing documentation</p> <p><b>Unit 40 Computer aided manufacturing and planning</b></p> <p>C1 Manufacture planning C2 Schedule for manufacture C3 Product and/or component specification for manufacture</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
30	Setting and proving secondary processing machines	<p><b>Fully covered in:</b></p> <p><b>Unit 41 Manufacturing secondary machining processes</b></p> <p>A1 Traditional secondary machining processes</p> <p>A2 Specialist secondary machining processes</p> <p>B1 Health and safety requirements when setting up secondary process machines</p> <p>B3 Setting up secondary press machines</p> <p>C1 Features of traditional secondary machining processes</p> <p>C2 Parameters of traditional secondary machining processes</p> <p>C3 Quality control methods</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
31	Computer aided manufacturing	<p><b>Fully covered in:</b></p> <p><b>Unit 5 A specialist engineering project</b></p> <p>B4 Design information C1 Undertake and test the solution to the problem C3 Present a solution to the problem</p> <p><b>Unit 10 Computer aided design in engineering</b></p> <p>A1 3D parametric modelling A2 Develop 3D components A3 Develop a 3D model</p> <p><b>Unit 40 Computer aided manufacturing and planning</b></p> <p>A1 Benefits and applications of CAM systems A2 Technology used in CAM systems B1 Model a component in preparation for manufacture B2 Simulate the manufacture of a component</p> <p><b>Unit 56 Industrial robotics</b></p> <p>A1 Health and safety requirements A2 Maintenance B1 Principles of operation and their applications B2 Design principles B3 Control systems</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
33	Six sigma quality	<p><b>Partially covered in:</b></p> <p><b>Unit 4 Applied commercial and quality principles in engineering</b></p> <p>C1 Quality systems</p> <p>C2 The principles and processes of value management</p> <p><b>Unit 39 Modern manufacturing systems</b></p> <p>C1 The lean philosophy</p> <p>C2 Key elements of lean</p> <p>C3 Lean tools and methods</p>	<p><b>Not covered:</b></p> <p>LO2 Be able to apply the DMAIC model to a project</p> <p>LO3 Be able to carry out a Six Sigma detailed process mapping activity</p> <p>LO4 Know about quality function deployment (QFD)</p>
34	Electronic circuit design and manufacture	<p><b>Fully covered in:</b></p> <p><b>Unit 22 Electronic printed circuit board design and manufacture</b></p> <p>A1 PCB types, technologies and applications</p> <p>A2 Characteristics of printed circuit boards</p> <p>A3 Heat and gain thermal management</p> <p>A4 Manufacturing processes</p> <p>A5 Quality control methods</p> <p>B1 Schematic capture</p> <p>B2 Circuit simulation</p> <p>C1 PCB design</p> <p>C2 Health and safety requirements when manufacturing a PCB</p> <p>C3 Risk assessment</p> <p>C4 Manufacture of a single-sided PCB</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
35	Principles and applications of electronic devices and circuits	<p><b>Fully covered in:</b></p> <p><b>Unit 19 Electronic Devices and circuits</b></p> <p>A2 Diode devices and diode-based circuits</p> <p>A3 Transistor devices and transistor-based circuits</p> <p>A4 Operational amplifier circuits</p> <p>A5 Schematic capture and simulation of analogue circuits</p> <p>B1 Logic gates and Boolean algebra</p> <p>B2 Combination logic circuits</p> <p>B3 Sequential logic circuits</p> <p>B4 Schematic capture and simulation of digital circuits</p> <p>B5 Testing physical digital circuits</p>	
39	Metallurgic techniques	<p><b>Fully covered in:</b></p> <p><b>Unit 30 Mechanical measurement and inspection technology</b></p> <p>A1 Limits and fits</p> <p>B1 Measuring practice</p> <p><b>Unit 25 Mechanical behaviour of metallic materials</b></p> <p>A6 Microstructure investigation of metallic materials</p> <p>B2 Destructive test procedures</p> <p>B3 Non-destructive test procedures</p> <p>C1 Ductile and brittle fracture</p> <p>C2 Creep failure</p> <p>C4 Corrosion mechanisms</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
44	Engineering maintenance procedure and techniques	<p><b>Fully covered in:</b></p> <p><b>Unit 11 Engineering maintenance and condition monitoring techniques</b></p> <p>A1 Types of maintenance and common maintenance techniques</p> <p>A2 Maintenance cost consideration</p> <p>A3 Reasons for maintenance</p> <p>B1 Condition monitoring techniques</p> <p>B2 Condition monitoring equipment and data</p> <p>B3 Principles and factors contributing towards potential faults and failures</p> <p>C1 Maintenance and condition monitoring plan</p> <p>C2 Health and safety requirements when undertaking maintenance activities</p>	
45	Monitoring and fault diagnosis of engineering systems	<p><b>Fully covered in:</b></p> <p><b>Unit 11 Engineering maintenance and condition monitoring techniques</b></p> <p>A1 Types of maintenance and common maintenance techniques</p> <p>A3 Reasons for maintenance</p> <p>C2 Health and safety requirements when undertaking maintenance activities</p> <p>B2 Condition monitoring equipment and data</p> <p>B3 Principles of and factors contributing towards potential faults and failures</p> <p>C2 Health and safety requirements when undertaking maintenance activities</p> <p>C3 Preparation for maintenance activities</p> <p>C4 Completion of a maintenance activity</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
48	Function and characteristics of railway signalling systems	None	
51	Electrical technology	<p><b>Fully covered in:</b></p> <p><b>Unit 2 Product design and manufacture in engineering</b></p> <p>B4 Material properties B5 Mechanical power transmission</p> <p><b>Unit 15 Electrical machines</b></p> <p>B1 Operation of DC motors and generators</p> <p><b>Unit 16 Three phase electrical systems</b></p> <p>A2 Transmission and distribution networks</p> <p><b>Unit 17 Power and energy electronics</b></p> <p>C1 Applications of power electronics</p> <p><b>Unit 18 Electrical power distribution and transmission</b></p> <p>A1 Thermal power generation A2 Nuclear power generation B1 Transmission networks C1 Network design C2 Power distribution</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
52	Electrical installation	<p><b>Fully covered in:</b></p> <p><b>Unit 14 Electrical installation of hardware and cables</b></p> <p>A3 Reducing the risk of electrical shock</p> <p>A4 Circuit protection methods</p> <p>B1 Lighting circuits for domestic installations</p> <p>B2 Power circuits for domestic installations</p> <p>B3 Circuits for commercial installations</p> <p>C1 Cables</p> <p>C2 Connectors</p> <p>C3 Wiring enclosures</p> <p>D1 Safe working practices</p> <p>D2 Safe working procedures</p> <p>D3 Circuits testing</p>	
53	Electronic measurement and testing	<p><b>Fully covered in:</b></p> <p><b>Unit 21 Electronic measurement and testing of circuits</b></p> <p>A1 Operational features of typical measurements devices</p> <p>A2 Operational features of electronic test devices</p> <p>B1 Fault finding techniques</p> <p>B2 Preparation for testing and test plans</p> <p>C1 Safe working practice</p> <p>C2 Practical fault finding on analogue and digital circuits</p> <p><b>Unit 15 Electrical machines</b></p> <p>B1 Function and operation of electrical test meters</p> <p>C1 Function and operation of electrical test meters</p>	
56	Railway infrastructure construction and maintenance	None	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
57	Principles and application of analogue electronics	<b>Fully covered in:</b> <b>Unit 20 Analogue electronic circuits</b> A1 Applications and characteristics of single function analogue circuits A2 Simulation of single function analogue electronic circuits B1 Construction of single function analogue electronic circuits B2 Testing single function analogue electronic circuits C1 Component selection C2 Simulation of a modified analogue electronic circuit C3 Construction and testing of a modified analogue electronic circuit	
58	Construction and applications of digital systems	<b>Fully covered in:</b> <b>Unit 19 Electronic devices and circuits</b> A1 Safe electronic working practices A2 Diode devices and diode-based circuits A3 Transistor devices and transistor-based circuits A4 Operational amplifier circuits B1 Logic gates and Boolean algebra B2 Combination logic circuits B5 Testing physical digital circuits	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
59	Microprocessor systems and applications	<p><b>Fully covered in:</b></p> <p><b>Unit 6 Microcontroller systems</b></p> <ul style="list-style-type: none"> <li>A1 Control hardware</li> <li>A2 Input devices</li> <li>A3 Output devices</li> <li>B1 Assembling and operating a microcontroller system</li> <li>B2 Programming techniques</li> <li>B3 Coding constructs</li> </ul> <p><b>Unit 36 Programmable logic controllers</b></p> <ul style="list-style-type: none"> <li>A1 Features and functions of programmable logic controllers</li> <li>A2 Programmable logic controller system hardware</li> <li>B2 Programming skills for programmable logic controllers</li> <li>C2 Physical system design and assembly</li> <li>C5 Testing a programmable logical controller system</li> </ul>	
60	Electronic fault finding	<p><b>Fully covered in:</b></p> <p><b>Unit 14 Electrical installation of hardware and cables</b></p> <ul style="list-style-type: none"> <li>B1 Lighting circuits for domestic installations</li> <li>B2 Power circuits for domestic installations</li> <li>B3 Circuits for commercial installations</li> <li>D3 Circuit testing</li> </ul> <p><b>Unit 21 Electronic measurement and testing of circuits</b></p> <ul style="list-style-type: none"> <li>A1 Operational features of typical measurement devices</li> <li>A2 Operational features of electronic test devices</li> <li>B1 Fault finding techniques</li> <li>B2 Preparation for testing and test plans</li> </ul>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
61	Features and applications of electrical machines	<p><b>Fully covered in:</b></p> <p><b>Unit 15 Electrical machines</b></p> <p>A1 Health and safety requirements for the safe operation of electrical machines</p> <p>A2 Risk assessment</p> <p>B1 Function and operation of electrical test meters (DC)</p> <p>B2 Operation of DC motors and generators</p> <p>B3 Control circuits used in DC motors</p> <p>B4 Applications of DC machines</p> <p>C1 Function and operations of electrical test meters (AC)</p> <p>C2 Operation of single-phase AC transformers</p> <p>C3 Operation of single-phase AC machines</p> <p>C5 Control circuits using in AC motors</p>	
62	Principles and operations of three-phase systems	<p><b>Fully covered in:</b></p> <p><b>Unit 16 Three-phase electrical systems</b></p> <p>A1 Construction and operation of synchronous generators</p> <p>A3 Safety considerations on high voltage transmission networks</p> <p>B1 Connection methods for three-phase power circuits</p> <p>B2 Electrical calculations for three-phase power circuits</p> <p>B3 Electrical measurements for three-phase power circuits</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
63	Three-phase motors and drives	<p><b>Partially covered in:</b></p> <p><b>Unit 16 Three-phase electrical systems</b></p> <p>A1 Construction and operation of synchronous generators</p> <p>A2 Transmission and distribution networks</p> <p>A3 Safety considerations on high voltage transmission systems</p> <p>B1 Connection methods for three-phase power circuits</p> <p>B2 Electrical calculations for three-phase power circuits</p> <p>B3 Electrical measurements for three-phase power circuits</p> <p>C1 Supply considerations</p>	<p><b>Not covered:</b></p> <p>LO1 Know how squirrel-cage and wound rotor three-phase induction motors operate</p>
66	Theory of flight	<p><b>Fully covered in:</b></p> <p><b>Unit 48 Aircraft flight principles and practice</b></p> <p>A1 The atmosphere, the International standard atmosphere (ISA) and its effect on flight</p> <p>A3 Application of mechanical principles to aircraft flight</p> <p>B2 Aircraft lift, drag and their interaction</p> <p>C1 Fixed wing aircraft stability</p> <p>C2 Fixed wing aircraft control</p>	
72	Aircraft maintenance practices	<p><b>Fully covered in:</b></p> <p><b>Unit 48 Aircraft workshop methods and practice</b></p> <p>A1 Workshop safety procedures and housekeeping</p> <p>A4 Hardware and consumable components</p> <p>B2 Mechanical hardware inspection and fitting processes</p> <p>C2 Electrical hardware inspection and fitting processes</p> <p><b>Unit 55 Aircraft first line maintenance operations</b></p> <p>A1 Safety procedures for aircraft first-line maintenance operations</p> <p>A2 Types of aircraft first-line maintenance operations</p>	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
132	Industrial robot technology	<b>Fully covered in:</b> <b>Unit 56 Industrial robotics</b> A1 Health and safety requirements A2 Maintenance B1 Principles of operation and their applications B2 Design principles B3 Controls systems C1 Sensors C2 End effectors D1 Integrated development environment D2 Programming principles and implementation	
141	The principles of photonics	None	
144	Telecommunications principles	<b>Partially covered in:</b> <b>Unit 57 Electrical and electronic principles</b> B2 Direct current circuit theory B3 Direct current networks D1 Alternating current waveforms D2 Dingle-phase alternating current principles	<b>Not covered:</b> LO2 Understand the effects of line impairments on a transmitted signal LO4 Understand the transmission of digital signals over transmission media LO5 Understand the process of modulating an analogue carrier frequency using digital signals

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
148	Process safety management in engineering	<p><b>Fully covered in:</b></p> <p><b>Unit 2 Delivery of engineering processes safety as a team</b></p> <p>A2 Health and safety requirements C3 Health and safety risk assessment</p> <p><b>Unit 41 Manufacturing secondary machining processes</b></p> <p>B1 Health and safety requirements when setting up secondary press machines B2 Risk assessment</p> <p><b>Unit 5 Specialist engineering project</b></p> <p>B2 Risk and issues project management process processes</p> <p><b>Unit 11 Engineering maintenance and condition monitoring techniques</b></p> <p>A1 Types of maintenance and common maintenance techniques B1 Condition monitoring techniques B3 Principles of and factors contributing towards potential faults and failures</p>	

## BTEC International Level 3 units not mappable to QCF qualification

International Unit Number	International Unit Name
33	Computer systems security
34	Computer systems support and performance
37	Computer networks
38	Website production to control devices
58	Entrepreneurship and intrapreneurship in practice
