BTEC International Level 3 - **Manufacturing Engineering** - Content Mapping

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	**Title**		
1	**Health and safety in the workplace**	**Fully covered in:** **Unit 2 Delivery of engineering processes safety as a team** A2 Health and safety requirements C3 Health and safety risk assessment **Unit 41 Manufacturing secondary machining processes** B1 Health and safety requirements when setting up secondary press machines B2 Risk assessment **Unit 5 Specialist engineering project** B2 Risk and issues project management process processes **Unit 46 Manufacturing joining, finishing and assembly processes** A3 Safe working practices when using joining processes	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	**Title**		
2	**Communications for engineering technicians**	**Fully covered in:** **Unit 3 Product design and manufacture in engineering** A1 Design triggers A2 Design challenges A3 Equipment level and system level constraints and opportunities A4 Design for a customer A5 Regulatory constraints and opportunities A6 Market analysis A7 Performance analysis A8 Manufacturing analysis A9 Statistical methods B1 Design proposals B2 Communicating designs **Unit 2 Delivery of engineering processes safety as a team** A3 Human factors affecting the performance of engineering processes C1 Principles of effective teams C4 Preparation activities for batch manufacture or batch service delivery **Unit 5 Specialist engineering project** B4 Design information	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	**Title**		
3	**Engineering project**	**Fully covered in:** **Unit 5 A specialist engineering project** A1 Project life cycle A2 Project idea generation and solution development A3 Feasibility study B1 Planning and monitoring project management processes B2 Risk and issue project management processes B3 Technical specification B4 Design information C1 Undertake and test the solution to the problem C2 Demonstrate relevant behaviours C3 Present a solution to the problem	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	**Title**		
4	**Mathematics for engineering technicians**	**Fully covered in:** **Unit 1 Mechanical principles** A1 Algebraic methods A2 Trigonometric methods **Unit 7 Calculus to solve engineering problems** A2 Methods of differentiation B1 Integration as the reverse/inverse of differentiation B2 Integration as a summating tool B3 Numerical integration C4 Solution implementation **Unit 8 Further engineering mathematics** D1 Statistical techniques **Unit 57 Electrical and electronic principles** A1 Algebraic Methods A2 Trigonometric methods A3 Statistical methods **Unit 3 Product design and manufacture in engineering** A9 Statistical methods	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	**Title**		
5	**Mechanical principles and applications**	**Fully covered in:** **Unit 1 Mechanical principles** B1 Static engineering systems B2 Loaded components C1 Kinetic parameters C2 Dynamic parameters D1 Fluid systems D2 Immersed bodies **Unit 28 Dynamic mechanical principles in practice** A1 Dynamics of systems undergoing acceleration A2 Linear systems **Unit 31 Thermodynamic principles and practice** B1 Closed thermodynamic systems B2 Open thermodynamic systems	
6	**Electrical and electronic principles**	**Fully covered in:** **Unit 57 Electrical and electronic principles** B1 Static and direct current electricity principles B2 Direct current circuit theory B3 Direct current networks C1 Magnetism C2 Electromagnetic induction D1 Alternating current waveforms D2 Single-phase alternating current principles	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
7	**Business operations in engineering**	**Fully covered in:** **Unit 4 Applied commercial and quality principles in engineering** B1 Reasons for cost control and types of costs B2 Activity-based costing method **Unit 2 Delivery of engineering processes safely as team** A1 Common engineering processes **Unit 58 Entrepreneurship and entrepreneurship in practice** A1 Features of the environment A2 Influence of stakeholders on planning and decision making A3 Organisational risks **Unit 41 Manufacturing secondary machining processes** B1 Health and safety requirements when setting up secondary press machines B2 Risk assessment **Unit 5 Specialist engineering project** B2 Risk and issues project management process processes	
8	**Engineering design**	**Fully covered in:** **Unit 3 Product design and manufacture in engineering** A1 Design triggers A4 Designing for a customer A5 Regulatory constraints and opportunities A8 Manufacturing analysis B1 Design proposals B2 Communicating designs B3 Iterative development process	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	**Title**		
9	**Commercial aspects for engineering organisations**	**Fully covered in:** **Unit 4 Applied commercial and quality principles in engineering** A1 Business functions and key activities A2 Trade considerations A3 Competitive advantage C1 Quality systems **Unit 3 Product design and manufacture in engineering** A5 Regulatory constraints and opportunities A6 Market analysis	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
10	**Properties and applications of engineering materials**	**Fully covered in:** **Unit 25 Mechanical behaviour of metallic materials** A1 Types of ferrous metals and alloys A2 Types of non-ferrous metals and alloys A3 Mechanical properties of metallic materials A4 Grain structure of metallic materials A5 Effects of processing on the mechanical properties of metallic materials A6 Microstructures investigation of metallic materials B2 Destructive test procedures C1 Ductile and brittle fracture C2 Creep failure C3 Fatigue failure **Unit 26 Mechanical behaviour of non-metallic materials** A1 Types of non-metallic materials A2 Structures of non-metallic materials A3 Mechanical properties of non-metallic materials B2 Destructive test procedures to determine mechanical properties B3 Material defects in non-metallic materials B4 Non-destructive tests used to identify material defects C1 Ductile and brittle fracture C2 Creep failure C3 Fatigue failure C4 Degradation processes	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
		Unit 13 Welding technology B1 The properties and behaviours of metallic materials B2 Unalloyed steel materials B3 Alloyed steel and non-ferrous materials **Unit 3 Product design and manufacture in engineering** A7 Performance analysis	
15	**Electro, pneumatic and hydraulic systems and devices**	**Fully covered in:** **Unit 12 Pneumatic and hydraulic systems** A1 Hydraulic and pneumatic power supply components A2 Hydraulic and pneumatic actuator components A3 Hydraulic and pneumatic system control components A4 General system safety and maintenance B1 Creating hydraulic and pneumatic power circuit diagrams B2 Simulating the operation of hydraulic and pneumatic power circuits C1 Health and safety requirements for the age operation of hydraulic and pneumatic power systems C2 System assembly C3 Testing and fault finding hydraulic and pneumatic powered systems	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	**Title**		
16	**Engineering drawing for technicians**	**Fully covered in:** **Unit 2 Delivery of engineering processes safely as a team** B1 Principles of engineering drawing B2 2D computer aided drawing C4 Preparation activities for batch manufacture or batch service delivery **Unit 3 Product design and manufacture in engineering** B2 Communicating designs **Unit 5 A specialist engineering project** B4 Design information **Unit 40 Computer aided manufacturing and planning** B1 Model a component in preparation for manufacture C3 Product and/or component specification for manufacture **Unit 19 Electronic devices and circuits** A5 Schematic capture and simulation of analogue circuits B4 Schematic capture and simulation of digital circuits	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	**Title**		
17	**Computer aided drafting in engineering**	**Partially covered in:** **Unit 10 Computer aided design in engineering** A1 3D parametric modelling A2 Develop 3D components A3 Develop a 3D model A4 Output of drawings form a model B1 2D drawing commands B2 Development of 2D engineering drawings B3 Output of 2D drawings C1 3D modelling commands C2 Develop 3D components C3 Developments of a 3D model C4 Output of product drawings **Unit 2 Delivery of engineering processes safely as a team** B1 Principles of engineering drawing B2 2D computer aided drawing	**Not covered:** LO2 Know about the software and hardware required to produce CAD drawings
19	**Mechanical measurements and inspection techniques**	**Fully covered in:** **Unit 30 Mechanical measurement and inspection technology** A1 Limits and fits A2 Tolerances B2 Types of mechanical measurement B3 Comparators B4 Gauging system B5 Component features, types and manufacturing processes C1 Principles of statistics C2 SPC procedure	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
20	**Engineering primary forming processes**	**Fully covered in:** **Unit 42 Manufacturing primary forming processes** A1 Metal moulding processes A2 Ceramic moulding processes A3 Polymer moulding processes B1 Metal deformation processes B Polymer deformation processes C1 Safe working practices for primary forming processes **Unit 47 Composites manufacture and repair processes** A1 Characteristics of fibre materials A2 Characteristics of polymer resin materials A4 Applications of FRP composites B2 Characteristics of wet and dry lay-up manufacturing processes C1 Applying wet and dry lay-up manufacturing processes **Unit 3 Product design and manufacture in engineering** A8 Manufacturing analysis B6 Manufacturing processes **Unit 2 Delivery of engineering processes safety as a team** A2 Health and safety requirements C3 Health and safety risk assessment	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	**Title**		
21	**Engineering secondary and finishing techniques**	**Partially covered in:** **Unit 41 Manufacturing secondary machine processes** A1 Traditional secondary machining processes A2 Specialist secondary machine processes B1 Health and safety requirements when setting up secondary process machines **Unit 2 Delivery of engineering processes safely as a team** A1 Common engineering processes A2 Health and safety requirements **Unit 46 Manufacturing joining, finishing and assembly processes** B1 Hot finishing processes B2 Anodising finishing processes B3 Plating finishing processes	**Not covered:** LO3 Know how heat treatment processes and assembly techniques are used

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	**Title**		
22	**Fabrication processes and technology**	**Fully covered in:** **Unit 2 Delivery of engineering processes safety as a team** A2 Health and safety requirements **Unit 44 Fabrication manufacturing processes** A1 Fabricated products A2 Sheets materials A3 Cutting processes A4 Forming processes A5 Joining processes A6 Finishing processes B3 Interpreting design specifications C1 Using fabrication manufacturing processes C2 Alignment and clamping C3 Quality control procedures **Unit 46 Manufacturing joining, finishing and assembly processes** A3 Safe working practices when using joining processes	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
23	**Welding technology**	**Fully covered in:** **Unit 13 Welding technology** A1 Welding terminology for processes and equipment A2 Gas-shielded arc welding - shielding gases A3 Common welding processes A4 Welding electrotechnics B1 The properties and behaviours of metallic materials B2 Unalloyed steel materials B3 Alloyed steel and non-ferrous materials B4 Defects and irregularities in welded joints C1 Prepare for welding operations C2 Welding parameters and settings C3 Welding of joints safely **Unit 2 Delivery of engineering processes safely as a team** A2 Health and safety requirements C3 Health and safety risk assessment **Unit 33 Fabrication manufacturing processes** C3 Quality control procedures	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	**Title**		
25	**Selecting and using programmable controllers**	**Fully covered in:** **Unit 6 Microcontroller systems** A1 Control hardware A2 Input devices A3 Output devices A4 Selecting hardware devices and system design B1 Assembling and operating a microcontroller system B2 Programming techniques B3 Coding constructs B4 Structured program design B5 Number systems **Unit 14 Electrical installation of hardware and cables** C1 Cables C2 Connectors C3 Wiring enclosures	
26	**Applications of computer numerical control in engineering**	**Fully covered in:** **Unit 26 Applications of computer numerical control in engineering** A1 CNC machine tool control systems A2 Open and closed loop feedback systems B1 CNC Processes for milling and turning B2 Tooling parameters B3 Component parameters B4 Machine set-up parameters B5 Development of CNC part program C1 Manufacture a component using a CNC machine	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
27	**Welding principles**	**Fully covered in:** **Unit 13 Welding technology** A1 Welding terminology for processes and equipment A2 Gas-shielded arc welding - shielding gases A3 Common welding processes A4 Welding electrotechnics B2 Unalloyed steel materials B3 Alloyed steel and non-ferrous materials B4 Defects and irregularities in welded joints C1 Prepare for welding operations **Unit 2 Delivery of engineering processes safely as a team** A2 Health and safety requirements C3 Health and safety risk assessment **Unit 33 Fabrication manufacturing processes** C3 Quality control procedures	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	**Title**		
28	**Further mathematics of engineering technicians (issue 2)**	**Fully covered in:** **Unit 1 Mechanical principles** A1 Algebraic methods A2 Trigonometric methods **Unit 7 Calculus to solve engineering problems** A2 Methods of differentiation B1 Integration as the reverse/inverse of differentiation B2 Integration as a summating tool B3 Numerical integration **Unit 8 Further engineering mathematics** A1 Arithmetic and geometric progressions C1 Complex numbers D1 Statistical techniques D2 Probability distributions D3 Statistical investigation	
29	**Manufacturing planning**	**Fully covered in:** **Unit 39 Modern manufacturing systems** A2 Performance objectives in manufacturing operations B1 Process types and typical industrial applications B3 Characteristics of effective system layout B4 Manufacturing documentation **Unit 40 Computer aided manufacturing and planning** C1 Manufacture planning C2 Schedule for manufacture C3 Product and/or component specification for manufacture	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	**Title**		
29	**Mathematics for engineering technicians (Level 2 unit)**	**Fully covered in:** **Unit 1 Mechanical principles** A1 Algebraic methods A2 Trigonometric methods **Unit 3 Product design and manufacture in engineering** A9 Statistical methods **Unit 57 Electrical and electronic principles** A3 Statistical methods **Unit 7 Calculus to solve engineering problems** A2 Methods of differentiation B1 Integration as the reverse/inverse of differentiation	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	**Title**		
30	**Applied electrical and mechanical science for engineering (Level 2 unit)**	**Fully covered in:** **Unit 15 Electrical machines** B2 Operation of DC motors and generators **Unit 57 Electrical and electronic principles** A3 Statistical methods B1 Static and direct current electricity principles B2 Direct current circuit theory C1 Magnetism C2 Electromagnetic induction **Unit 27 Static mechanical principles in practice** A1 Static parameters **Unit 28 Dynamic mechanical principles in practice** A1 Dynamics of systems undergoing acceleration A2 Linear systems **Unit 29 Principles and applications of fluid mechanics** A1 Properties and characteristics of fluids	
30	**Setting and proving secondary processing machines**	**Fully covered in:** **Unit 41 Manufacturing secondary machining processes** A1 Traditional secondary machining processes A2 Specialist secondary machining processes B1 Health and safety requirements when setting up secondary process machines B3 Setting up secondary press machines C1 Features of traditional secondary machining processes C2 Parameters of traditional secondary machining processes C3 Quality control methods	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	**Title**		
31	**Computer aided manufacturing**	**Fully covered in:** **Unit 5 A specialist engineering project** B4 Design information C1 Undertake and test the solution to the problem C3 Present a solution to the problem **Unit 10 Computer aided design in engineering** A1 3D parametric modelling A2 Develop 3D components A3 Develop a 3D model **Unit 40 Computer aided manufacturing and planning** A1 Benefits and applications of CAM systems A2 Technology used in CAM systems B1 Model a component in preparation for manufacture B2 Simulate the manufacture of a component **Unit 56 Industrial robotics** A1 Health and safety requirements A2 Maintenance B1 Principles of operation and their applications B2 Design principles B3 Control systems	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	**Title**		
32	**Production system design**	**Fully covered in:** **Unit 39 Modern manufacturing systems** B1 Process types and typical industrial applications B2 Manufacturing layout types B3 Characteristics of effective system layout C1 The lean philosophy C2 Key elements of lean C3 Lean tools and methods	
33	**Six sigma quality**	**Partially covered in:** **Unit 4 Applied commercial and quality principles in engineering** C1 Quality systems C2 The principles and processes of value management **Unit 39 Modern manufacturing systems** C1 The lean philosophy C2 Key elements of lean C3 Lean tools and methods	**Not covered:** LO2 Be able to apply the DMAIC model to a project LO3 Be able to carry out a Six Sigma detailed process mapping activity LO4 Know about quality function deployment (QFD)

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	**Title**		
34	**Electronic circuit design and manufacture**	**Fully covered in:** **Unit 22 Electronic printed circuit board design and manufacture** A1 PCB types, technologies and applications A2 Characteristics of printed circuit boards A3 Heat and gain thermal management A4 Manufacturing processes A5 Quality control methods B1 Schematic capture B2 Circuit simulation C1 PCB design C2 Health and safety requirements when manufacturing a PCB C3 Risk assessment C4 Manufacture of a single-sided PCB	
35	**Principles and applications of electronic devices and circuits**	**Fully covered in:** **Unit 19 Electronic Devices and circuits** A2 Diode devices and diode-based circuits A3 Transistor devices and transistor-based circuits A4 Operational amplifier circuits A5 Schematic capture and simulation of analogue circuits B1 Logic gates and Boolean algebra B2 Combination logic circuits B3 Sequential logic circuits B4 Schematic capture and simulation of digital circuits B5 Testing physical digital circuits	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	**Title**		
36	**Mechanical and thermal treatment of metals**	**Partially covered in:** **Unit 42 Manufacturing primary forming processes** A2 Ceramic moulding processes B1 Metal deformation processes C2 Forming process selection **Unit 44 Fabrication manufacturing processes** A4 Forming processes **Unit 3 Product design and manufacture in engineering** A7 Performance analysis **Unit 25 Mechanical behaviour of metallic materials** A5 Effects of processing on the mechanical properties of metallic materials	**Not covered:** LO4 Understand process controls and typical defects in wrought and heat-treated products
37	**Structure and properties of metals**	**Partially covered in:** **Unit 23 Mechanical behaviour of metallic materials** A3 Mechanical properties of metallic materials A4 Grain structure of metallic materials A5 Effects of processing on the mechanical properties of metallic materials	**Not covered** LO2 Be able to contract and read the thermal equilibrium diagram of a binary alloy

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
38	**Industrial alloys**	**Fully covered in:** **Unit 23 Mechanical behaviour of metallic materials** A1 Types of ferrous metals and alloys A2 Types of non-ferrous metals and alloys A4 Grain structure of metallic materials A5 Effects of processing on the mechanical properties of metallic materials A6 Microstructure investigation of metallic materials C1 Ductile and brittle fracture C2 Creep failure C3 Fatigue failure	
39	**Metallurgic techniques**	**Fully covered in:** **Unit 30 Mechanical measurement and inspection technology** A1 Limits and fits B1 Measuring practice **Unit 25 Mechanical behaviour of metallic materials** A6 Microstructure investigation of metallic materials B2 Destructive test procedures B3 Non-destructive test procedures C1 Ductile and brittle fracture C2 Creep failure C4 Corrosion mechanisms	
40	**Extraction and refining of metals**	None	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	**Title**		
41	**Liquid metal casing processes**	**Partially covered in:** **Unit 3 Product design and manufacture in engineering** B6 Manufacturing processes **Unit 25 Mechanical behaviour of metallic materials** B1 In-service requirements of metallic materials B2 Destructive test procedures B3 Non-destructive test procedures **Unit 2 Delivery of engineering processes safety as a team** A2 Health and safety requirements C3 Health and safety risk assessment	**Not covered:** LO2 Know the main furnace types and melt procedures used in the preparation and treatment of common casting alloys LO3 Know about the defects in castings and their possible causes
42	**Quality business improvement**	**Partially covered in:** **Unit 4 Applied commercial and quality principles in engineering** B1 Reasons for cost control B2 Activity-based costing methods C2 Principles and value management	**Not covered** LO2 Be able to apply the principles and techniques of potential failure modes and effects analysis LO3 Understand and apply basic statistical techniques and statistical process control procedures LO4 Be able to carry out a process capability study

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	Title		
43	**Teamwork in a continuous improvement environment**	**Fully covered in:** **Unit 2 Delivery of engineering processes safely as a team** A1 Common engineering processes A3 Human factors affecting the performance of engineering processes C1 Principles of effective teams C2 Team set-up and organisation C4 Preparation activities for batch manufacture or beach delivery service C5 Delivery of manufacturing or search engineering process **Unit 58 Entrepreneurship and intrapreneurship in practice** B1 Different leadership and management styles B2 Teams and organisational structures	
134	**Using secondary machining techniques to produce components**	**Fully covered in:** **Unit 41 Manufacturing secondary machining processes** A1 Traditional secondary machining processes A2 Specialist secondary machining processes B1 Health and safety requirements when setting up secondary press machines B2 Risk assessment B3 Setting up secondary process machines C1 Features of traditional secondary machining processes C2 Parameters of traditional secondary machining processes C3 Quality control methods	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	**Title**		
140	**Basic polymer technology**	**Partially covered in:** **Unit 26 Mechanical behaviour of non-metallic materials** A1 Types of non-metallic materials A2 Structures of non-metallic materials B1 In-service behaviour of non-metallic materials B2 Destructive test procedures to determine mechanical properties **Unit 3 Product design and manufacture in engineering** B6 Manufacturing processes	**Not covered** LO2 Know how additives modify polymer properties
141	**Plastics materials**	**Fully covered in:** **Unit 26 Mechanical behaviour of non-metallic materials** A1 Types of non-metallic materials A2 Structures of non-metallic materials A3 Mechanical properties of non-metallic materials A4 Typical engineering applications of non-metallic materials B1 In-service behaviour of non-metallic materials B2 Destructive test procedures to determine mechanical properties **Partially covered in:** **Unit 3 Product design and manufacture in engineering** B6 Manufacturing processes	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	**Title**		
142	**Plastics processing**	**Partially covered in:** **Unit 3 Product design and manufacture in engineering** B6 Manufacturing processes **Unit 47 Composites manufacture and repair processes** A2 Characteristics of polymer resin matrix materials B2 Characteristics of wet and dry lay-up manufacturing processes	**Not covered:** LO2 Understand the features of plastics extruder design and extrusion processes LO3 Understand the manufacture of film and sheet materials and conversion to products
143	**Polymer process engineering**	**Fully covered in:** **Unit 3 Product design and manufacture in engineering** B5 Mechanical power transmission **Unit 12 Pneumatic and hydraulic systems** A1 Hydraulic and pneumatic power supply components A2 Hydraulic and pneumatic actuator components A3 Hydraulic and pneumatic system control components **Unit 12 Pneumatic and hydraulic systems** A1 General system safety and maintenance **Unit 56 Industrial robotics** B2 Design principles B3 Control systems C1 Sensors C2 End effectors	
144	**Rubber products and specialist elastomers**	None	
145	**Rubber technology**	None	

2010 QCF Unit		International BTEC Level 3 unit to which 2010 unit relates	Areas of content in the 2010 unit not covered in the International unit
No.	**Title**		
146	**Manufacturing of advanced composite materials**	**Fully covered in:** **Unit 47 Composites manufacture and repair processes** A1 Characteristics for fibre materials A2 Characteristics of palmer resin matrix materials A3 Structure and mechanical properties of FRP composites B1 Safe working practices for FRP composites B2 Characteristics of wet and dry lay-up manufacturing processes B3 Repairing FRP composites C1 Applying wet and dry lay-up manufacturing processes C2 Applying FRP compost repair processes	**Not covered:** LO3 Understand the effects of design decisions on component manufacturability
147	**Composite materials and processing**	**Fully covered in:** **Unit 47 Composites manufacture and repair processes** A1 Characteristics for fibre materials A2 Characteristics of palmer resin matrix materials A3 Structure and mechanical properties of FRP composites B1 Safe working practices for FRP composites B2 Characteristics of wet and dry lay-up manufacturing processes B3 Repairing FRP composites C1 Applying wet and dry lay-up manufacturing processes C2 Applying FRP compost repair processes	

BTEC International Level 3 units not mappable to QCF qualification

International Unit Number	International Unit Name
33	**Computer systems security**
34	**Computer systems support and performance**
37	**Computer networks**
38	**Website production to control devices**
58	**Entrepreneurship and intrapreneurship in practice**
