

Quick Guide

to the BTEC Tech Award
in Travel and Tourism

First teaching: September 2022
Course level: Level 1/ Level 2
Total Qualification Time: 157 hours
Total Guided Learning Hours: 120
QN: 603/7048/8

Content overview

Component 1: Travel and Tourism Organisations and Destinations

Learners will investigate travel and tourism organisations in the UK, their ownership, aims, key products and services, and how they work together. They will explore the role of different consumer technologies within the travel and tourism industry. Learners will understand the different types of tourism and different types of visitor and will investigate the features of and routes to popular tourist destinations.

Component 2: Customer Needs in Travel and Tourism

Learners will investigate how organisations use market research to identify travel and tourism trends and identify customer needs and preferences. They will apply their understanding by exploring how specific needs are met by organisations and how travel planning meets customer needs and preferences.

Component 3: Influences on Global Travel and Tourism

Learners will explore the different factors that may influence global travel and tourism, and how travel and tourism organisations and destinations respond to these factors. Learners will examine the potential impacts of tourism at global destinations and how destinations can manage the impacts of tourism and control tourism development to achieve sustainable tourism.

Why choose Travel and Tourism?

This qualification is for learners interested in taking a **hands-on course** alongside their GCSEs that will offer them a practical introduction to life and work in the dynamic travel and tourism industry, allowing them to make an informed decision about their future learning and career.

This course will give learners the opportunity to **develop sector-specific applied knowledge and technical skills in a practical learning environment**. They will develop key transferable skills through vocational contexts, by exploring products and services offered by different travel and tourism organisations, the features of popular tourist destinations, how organisations use market research and trends to identify and meet customer needs requirements, and the factors that influence global travel and tourism. The qualification enables learners to develop their transferable skills, such as researching, planning, and making decisions and judgements.

This BTEC Tech Award complements the learning in GCSE programmes such as GCSE Geography and GCSE Business by broadening learners' experience and skills participation in different contexts, with opportunities for them to practically apply knowledge and skills. Following successful completion of this qualification, **learners can progress** onto A Levels, or to a vocational qualification at Level 3, such as a BTEC National in Travel & Tourism.

Assessment overview

Components are interrelated and best seen as part of an integrated whole rather than as distinct study areas.

Component	GLH	Qualification weighting	Marks available	Type of assessment	Length of assessment	Availability
Component 1: Animal Handling	36	30%	60	Internal assessment (PSA*) with 5 tasks. Externally moderated	4 hours of monitored preparation and 6 hours of supervised sessions	Twice a year: June release for December/ January moderation September release for May/June moderation
Component 2: Animal Housing and Accommodation	36	30%	60	Internal assessment (PSA*) with 4 tasks. Externally moderated	5 hours of monitored preparation and 6 hours of supervised sessions	Twice a year: June release for December/ January moderation September release for May / June moderation
Component 3: Animal Health and Welfare	48	40%	60	External synoptic exam. Externally marked	2 hours	Twice a year in January / February and May / June (from 2024)

* Pearson Set Assignments (PSAs) are set by Pearson, marked by the centre, and moderated by Pearson.

Choosing a BTEC Tech Award

BTEC Tech Awards are Level 1/Level 2 courses that are of the **same size and rigour as GCSEs, widening learners' options at Key Stage 4**, while keeping all their options open for progression into post-16 education and training. We have developed all our BTEC Tech Awards in consultation with subject specialists and secondary school and FE representatives, to ensure that they are engaging and fully up to date with current sector skills, behaviours and knowledge.

With a BTEC Tech Award your learners will:

- Get a taste of what a sector is like.
- Gain transferable skills and confidence that will help them in the world today and prepare them for their futures.
- Receive an introduction to vocational study.
- Have opportunities to apply learning from their GCSE subjects to every day and work contexts.
- Build applied knowledge and skills that show an aptitude for further learning, both in the sector and more widely.

Embedding learning through application

BTEC Tech Award qualifications are designed to help learners:

- **Explore** what it's like to work in the sector and gain the underpinning knowledge and skills required to work in it.
- **Develop** key knowledge, skills and behaviours, and learn about essential tools, techniques, and equipment.
- **Apply** their learning to real-life contexts and vocational scenarios in both learning and assessment.

BTEC Tech Awards come from Pearson, the world's lifelong learning company. Our purpose is simple: to help people realize the life they imagine through learning. We do that by providing high quality content and learning experiences, as well as assessments and qualifications that help people build their skills and grow with the world around them.

Designed to offer you more

Through the design of all of our qualifications we've sought to ensure that the courses are as easy as possible for teachers to deliver and administer, and that they give learners as much opportunity as possible to realistically demonstrate their capability and achieve overall success.

- We offer the widest range of BTEC Tech Awards, covering **12 unique subject areas**, all following the same consistent approach – enabling your school to offer multiple BTEC Tech Awards without multiplying complexity.
- All components are mandatory, with **optionality built in** within the content where relevant to the sector, streamlining assessment.
- There is a **consistent mark scheme structure** for each internally assessed component making it easier to apply and standardise.
- **Assessment is compensatory** within components and across the qualification – anywhere learners gain marks, these are added to the total towards a grade. This means grades for each component are no longer restricted to the lowest grade achieved within the component.
- **There are no minimum grade requirements in any component**, so an Unclassified result in any of the components will not prevent a learner from achieving the qualification. This gives your learners more opportunities to achieve and better captures their true ability.
- The moderation process for Pearson Set Assignments (internal assessments) **offers long assessment windows, reduced administration and paperwork, and includes early moderator feedback reports**. We are the only provider offering moderator feedback reports in advance of Results Day, giving you the opportunity to address any issues with assessment before they impact on the learner's results.
- The new Pearson Set Assignments have been based on Authorised Assignment Briefs from current qualifications, so will be familiar to teachers used to the previous qualifications.
