About Pearson

We are the world's leading learning company operating in countries all around the world. We provide content, assessment and digital services to schools, colleges and universities, as well as professional and vocational education to learners to help increase their skills and lifelong employability prospects. We believe that wherever learning flourishes so do people.

This specification is Issue 3. We will inform centres of any changes to this issue. The latest issue can be found on our website.

References to third-party material made in this specification are made in good faith. We do not endorse, approve or accept responsibility for the content of materials, which may be subject to change, or any opinions expressed therein. (Material may include textbooks, journals, magazines and other publications and websites.)

Pearson BTEC Tech Awards – introduction

About the BTEC Tech Award suite

Tech Awards have been developed by Pearson to give learners at Key Stage 4 in England, Northern Ireland and Wales the opportunity to study one or more vocational areas as part of their curriculum. We have developed the qualifications in consultation with secondary school and further education representatives, and subject specialists to ensure that they engage and prepare learners for either academic or vocational progression post-16.

As part of a Key Stage 4 programme, learners will be studying a broad range of GCSEs, including English, mathematics and science. The BTEC Tech Award suite has been designed to allow learners to draw on the knowledge and skills acquired from these subjects where relevant. When studying for a ‘BTEC’, learners can use the knowledge and skills from GCSEs, giving them the opportunity to apply their academic knowledge to everyday and work contexts.

The BTEC Tech Award suite is an introduction to vocational learning. The qualifications give learners the opportunity to build applied knowledge and skills that show an aptitude for further learning, both in the sector and more widely. The approach to the suite is based on well-established BTEC assessment approaches that are proven to be successful in building applied knowledge and skills and motivating learners to engage fully with challenging study. There are many progression options as the skills acquired are applicable to a range of post-16 study options.

The BTEC Tech Award suite differs from other BTECs designed to be taken post-16 as the qualifications offer a basis for further study, rather than meeting all the vocational requirements that learners need to progress directly to a job role in a defined occupational area. The focus is on building applied knowledge and skills to show aptitude and improving understanding of progression options so that learners who achieve one or more of the qualifications are equipped to go on to become work ready for an occupation post-16.

About recognition as Department for Education technical awards

The BTEC Tech Award suite has been designed to meet the Department for Education (DfE) requirements for qualifications to be offered as technical awards for 14–16-year-olds.

The DfE has set out characteristics for technical awards through which vocational qualifications can be recognised as part of performance measures in the open category of Progress 8. To be recognised as technical awards, it is expected that qualifications will focus on developing sector-specific applied knowledge and skills through realistic vocational contexts. It is also expected that the qualifications form part of a Key Stage 4 learning programme that enables both academic and vocational progression.
About the creative media production sector

The skills developed through an education in creative media are integral to many roles within the creative sector, which is a collection of exciting and vibrant industries including film, television, games, web and app development, and publishing. As digital technology continues to evolve, media techniques have become more sophisticated and media products are becoming more advanced. However, what hasn't changed is that media products still have the power to enthral, intrigue and affect audiences. Collectively, the creative sector in the UK contributed nearly £112 billion to the economy in 2019 and has grown by 7.4 per cent since 2017, a rate of growth five times that of the overall UK economy.

1 Pearson BTEC Level 1/Level 2 Tech Award in Creative Media Production – purpose

Who is the qualification for?

The Pearson BTEC Level 1/Level 2 Tech Award in Creative Media Production (603/7053/1) is for learners who want to acquire sector-specific applied knowledge and skills through vocational contexts by investigating, exploring and creating media products as part of their Key Stage 4 learning. The qualification enables learners to develop skills across a range of media practices using a combination of practical exploration, experimentation and realistic vocational contexts. They will develop personal skills, such as managing their creative projects, documenting progress of skills and work, responding to briefs and presenting work through a practical and skills-based approach to learning and assessment. The qualification recognises the value of learning skills, knowledge and vocational attributes to complement GCSEs. The qualification will broaden learners' experience and understanding of the varied progression options available to them.

What does the qualification cover?

The Tech Award gives learners the opportunity to develop sector-specific applied knowledge and skills through realistic vocational contexts. Learners will have the opportunity to develop and apply knowledge and skills in the following areas:

- development of key skills that prove their aptitude in creative media production such as investigating and developing ideas through pre-production, production and post-production of media products
- processes that underpin effective ways of working in creative media production, such as responding to briefs and feedback, planning and generating ideas
- attitudes that are considered most important in creative media production, including personal management and communication
- knowledge that underpins an effective use of skills, processes and attitudes in the sector, such as production processes and techniques.

This Tech Award complements the learning in GCSE programmes such as Design and Technology, Art and Design, and Computer Science, by broadening the application of ‘design and make’ tasks, working with a media brief, and understanding and engaging different audiences through making compelling media products.

What can the qualification lead to?

Study of the qualification as part of Key Stage 4 learning will help learners to make more informed choices for further learning, either generally or in this sector. The choices that learners can make post-16 will depend on their overall level of attainment and their performance in the qualification.

Learners who generally achieve at Level 2 across their Key Stage 4 learning might consider progression to:

- A Levels as preparation for entry to higher education in a range of subjects
• study of a vocational qualification at Level 3, such as a BTEC National in Media which prepares learners to enter employment or apprenticeships, or to move on to higher education by studying a degree in the media sector.

Learners who generally achieve at Level 1 across their Key Stage 4 learning might consider progression to study at Level 2 post-16 in a range of routes designed to lead to work, employment, apprenticeships or further study at Level 3.
2 Structure

Total Qualification Time

For all regulated qualifications, Pearson specifies a total number of hours that it is estimated learners will require to complete and show achievement for the qualification: this is the Total Qualification Time (TQT). Within the TQT, Pearson identifies the number of Guided Learning Hours (GLH) that we estimate a centre delivering the qualification might provide. Guided learning means activities such as lessons, tutorials, online instruction, supervised study and giving feedback on performance that directly involve teachers and assessors in teaching, supervising and invigilating learners. Guided learning includes the time required for learners to complete external assessment under examination or supervised conditions.

In addition to guided learning, other required learning directed by teachers or assessors will include private study, preparation for assessment and undertaking assessment when not under supervision, such as preparatory reading, revision and independent research.

The Pearson BTEC Level 1/Level 2 Tech Award in Creative Media Production has:

- Total Qualification Time: 150 hours
- Guided Learning Hours: 120 hours.

Centres should take note of these hours in planning their programme but should also use their professional judgement to determine the provision of guided learning and study time across the components.

Components

Learners are required to complete and achieve all three components in the qualification.

| Pearson BTEC Level 1/Level 2 Tech Award in Creative Media Production |
|------------------------|-----------------|--------|-----------|------------------|
| Component number       | Component title | GLH    | Level     | How assessed     |
| 1                      | Exploring Media Products | 36     | 1/2       | Internal         |
| 2                      | Developing Digital Media Production Skills | 36     | 1/2       | Internal         |
| 3                      | Create a Media Product in Response to a Brief | 48     | 1/2       | External Synoptic |

The three components focus on the assessment of applied knowledge, skills and practices. These are all essential to developing a basis for progression and therefore learners need to achieve all components in order to achieve the qualification.
The components are interrelated and they are best seen as part of an integrated whole rather than as totally distinct study areas. Learners will normally take this qualification over a two-year period or longer. This means that they must be given the opportunity to build their confidence in understanding the sector, vocational contexts and vocational attributes over a long period during the course of study before they are assessed. As the interrelated components are not linked to occupational roles, certification is not available at component level.

**Assessment**

The three components in the qualification give learners the opportunity to develop broad knowledge and understanding of the media sector, and relevant skills such as research, planning, problem solving and communication at Levels 1 and 2.

**Internal assessment – externally moderated**

Components 1 and 2 are assessed through non-exam internal assessment. The non-exam internal assessment for these components has been designed to demonstrate application of the conceptual knowledge underpinning the sector through realistic tasks and activities. This style of assessment promotes deep learning through ensuring the connection between knowledge and practice. The components focus on:

- the development of core knowledge and understanding, including the range of different types of media products, production processes and techniques
- the development and application of skills such as research skills and stylistic and practical skills
- reflective practice through the refinement of learners’ own media products that allows them to respond to feedback and identify areas for improvement.

Non-exam internal assessment is delivered through Pearson-set Assignments. These assignments are set by Pearson, marked by the centre and moderated by Pearson.

For each component new assignments are released twice a year through the secure area of our website. Each Pearson-set Assignment will be clearly marked with the assessment series and academic year of release; centres must ensure that they are using the current series’ assignment to assess their learners. Centres must use these assignments for summative assessments and the assignments must be completed under supervised conditions.

Centres will mark the completed assignments using the descriptors in the marking grid given in each component. Prior to submitting marks for moderation, where a learner has not achieved their expected level of performance for an assignment, the centre may authorise one opportunity over 15 working days for learners to improve evidence and resubmit for internal assessment.

Following submission of marks for moderation, there is no further opportunity to resubmit improved evidence based on the same completed assignment. Learners may be offered a single retake opportunity in a later assessment series using the new Pearson-set Assignment released for that assessment series. Retakes must be completed prior to or in the same series as the externally assessed component to meet terminal assessment requirements. For further information on the design of the assignments, retakes and the approach to marking, see Section 5: Non-exam internal assessment.
### Component 1: Exploring Media Products

Non-exam internal assessment set by Pearson, marked by the centre and moderated by Pearson. The Pearson-set Assignment will be completed in approximately 10 hours of supervised assessment. 60 marks.

**Window for assessment:** December/January and May/June from 2023 onwards

### Component 2: Developing Digital Media Production Skills

Non-exam internal assessment set by Pearson, marked by the centre and moderated by Pearson. The Pearson-set Assignment will be completed in approximately 10 hours of supervised assessment. 60 marks.

**Window for assessment:** December/January and May/June from 2023 onwards

### External synoptic assessment

There is one external assessment, Component 3, which provides the main synoptic assessment for the qualification. Component 3 builds directly on Components 1 and 2 and enables learning to be brought together.

**Component 3: Create a Media Product in Response to a Brief** requires learners to apply their production skills to the creation of a media product in response to a brief.

The design of this external assessment ensures that there is sufficient stretch and challenge, enabling the assessment of knowledge and understanding at the end of the learning period.

The external assessment is based on a key task that requires learners to demonstrate that they can identify and use effectively an appropriate selection of skills, techniques, concepts, theories and knowledge from across the whole qualification in an integrated way.

The external assessment takes the form of a set task taken under supervised conditions, which is then marked and a grade awarded by Pearson. However, as this is the terminal assessment for the qualification, learners can only use the external assessment results achieved in the same assessment series in which they are requesting certification for the qualification. The external assessment comprises 40 per cent of the total GLH of the qualification and is weighted accordingly in the calculation of the overall qualification grade.
This component should be delivered and assessed at the end of the course of study.

<table>
<thead>
<tr>
<th>Component</th>
<th>Description of set task</th>
<th>Assessment</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Component 3:</strong> Create a Media Product in Response to a Brief</td>
<td>Task set and marked by Pearson completed under supervised conditions. The set task will be completed in 10 hours of supervised sessions in a period timetabled by Pearson. 60 marks.</td>
<td>May/June from 2024 onwards</td>
</tr>
</tbody>
</table>

**Language of assessment**

Assessment of the internal and external components for these qualifications will be available in English. All learner work must be in English. A learner taking the qualifications may be assessed in British Sign Language where it is permitted for the purpose of reasonable adjustment. For information on reasonable adjustments see Section 9: Administrative arrangements.

**Grading of the qualification**

This qualification has a grading scale that fully encompasses achievement at Levels 1 and 2 of the Regulated Qualifications Framework. This enables learners of all abilities to receive appropriate recognition of their achievement and will motivate them to improve and progress during their period of learning and formative assessment. This grading scale also gives clearer information for progression providers on the capability of learners to succeed in post-16 study programmes.

Non-exam internally-assessed components are assessed using a mark-based scale. Centres report marks which will be submitted for moderation. The externally-assessed component is marked externally by Pearson.

All components are awarded on a six-point grade scale from Level 1 Pass to Level 2 Distinction. Learners will receive a Uniform Mark for each component.

The qualification is graded over seven grades from Level 1 Pass to Level 2 Distinction*. The overall grade is a direct aggregation of performance across individual components, with each component weighted according to GLH. Please see Section 8: Final grading and awarding for more information on the approach we are using to grade qualifications.
3 Components

Understanding your components

The components in this specification set out details of all the knowledge and skills a learner must acquire and the assessment requirements that will support you in preparing your learners.

The components help you to undertake assessment and quality assurance effectively.

The tables here explain the key terms used for the internal and external components. It is important that all teachers, assessors, Programme Leads and other staff responsible for the delivery and quality assurance of the programme read and digest this section.

Internal assessment – externally moderated

Component 1: Exploring Media Products

Levels: 1/2
Assessment type: Internal, externally moderated
Guided learning hours: 36

Component in brief
Learners will develop their understanding of how media products create meaning for their audiences. Learners will examine existing products and explore media production techniques.

Introduction
As media technology continues to evolve and media techniques become more sophisticated, media products have become more advanced – from 3D films, interactive advertisements and mobile apps to responsive web design. However, the power of media products to engage, intrigue and affect audiences has not changed.

In this component, you will develop your understanding of how media products are created for specific audiences and purposes in each of these sectors: audio/moving image, print and interactive media. You will explore the relationship between genre, narrative and representation in media products, and develop your understanding of how they are interpreted by audiences. You will learn how media production techniques are used to create different effects to communicate meaning to audiences.

This component will give you an understanding of media practitioners’ work, and how techniques and technology are used to contribute to the creation of media products. You will develop transferable skills, such as analysis and communication, which will help you to progress to Level 2 or Level 3 vocational or academic qualifications and employment.

Learning outcomes
A Investigate media products
B Explore how media products are created to provide meaning and engage audiences.
Teaching content

Learning outcome A: Investigate media products

A1 Media products, audiences and purpose

Learners will develop their understanding of the relationship between media products, their audiences and purposes. Learners must explore media products from each of the three sectors: audio/moving image, print and interactive.

- Researching media products and practice, to include:
  - primary sources, e.g. observations, discussions, interviews conducted by learners, surveys
  - secondary sources, e.g. internet, film, television, magazines.

- Media research techniques, to include:
  - textual analysis, e.g. denotation and connotation, encoding, anchorage, polysemy
  - personal response, e.g. interpretation, identification
  - practical experimentation, e.g. sketches, plans, practical skills exercises
  - recording research outcomes, e.g. note taking, audio-visual recordings, screen recordings, research logs.

- Contemporary (post-2000) and historical (pre-2000) media products, to include:
  - audio/moving image products, e.g. TV programmes, films, music videos, animations, advertisements, radio broadcasts, podcasts
  - print products, e.g. newspapers, magazines, comics, brochures, advertisements
  - interactive media products, e.g. websites, mobile apps, interactive magazines, mobile games, video games, online games, advertisements.

- Context of production, to include:
  - media producer, e.g. media conglomerate, public service broadcaster, independent media producer, community media organisation
  - purposes of media products, e.g. to entertain, inform, educate, persuade, inspire, challenge
  - motivations of the media producer, e.g. generate profit, raise awareness, benefit a community, self-expression, innovation, experimentation, public service responsibilities
  - aims of the producer, e.g. to create media products that are high quality, distinctive, accessible, diverse, inclusive, impartial.

- Audience interpretation, to include:
  - defining primary and secondary audiences, e.g. gender, age, socio-economic groupings, lifestyle profiles
  - audience statistics, e.g. box office figures, circulation, sales, hits, subscriptions, followers
  - situation, e.g. the effect of where, when and with whom the audience engages with a media product
  - audience involvement, e.g. using interactive features, online voting, consumer-generated content, passive audiences
  - audience responses, e.g. preferred, negotiated and oppositional readings
  - audience uses and gratifications, e.g. information, entertainment, escapism, personal identity, social interaction.
Learning outcome B: Explore how media products are created to provide meaning and engage audiences

B1 Genre, narrative and representation

Learners will develop their understanding of how media products combine genre, narrative and representation to create meaning for audiences.

- Genre, to include:
  - identification of generic characteristics, e.g. iconography of film genres, conventions of national newspapers, components of a web page
  - how genres change over time, e.g. development of sub-genres, hybrids, subverting generic conventions
  - repetition and difference, e.g. the extent to which a TV programme, magazine or website conforms to generic codes and conventions and introduces elements of originality.

- Narrative, to include:
  - storytelling, e.g. story and plot in a film, inverted pyramid in a newspaper article, visual representations to reinforce the text on an app
  - narrative structures, e.g. linear, non-linear, circular, interactive, open/closed, single/multi-strand
  - point of view (POV), e.g. third-person narrator in a radio documentary, editorial in a newspaper, first-person shooter computer game
  - characterisation, e.g. character functions in film, print advertisements, computer games
  - themes, e.g. dystopia in science fiction films, identity in music magazines, apocalypse in zombie games
  - setting, e.g. location in a film, photographs in a magazine, open-world diegesis of a computer game
  - mode of address, e.g. formal style of TV news, the direct address of a magazine cover, the informal address of a computer game.

- Representation of people, places, issues and events, to include:
  - audience positioning and perspective
  - audience identification
  - use of stereotyping
  - positive and negative representations.
**B2 Media production techniques**

Learners will deconstruct media products to examine how media production techniques are combined in media products to create specific effects and engage audiences. Learners may focus on techniques from one sector or combine techniques from across sectors.

- **Audio/moving image media products:**
  - camerawork, e.g. set-up, framing, shot type/length, angle, movement
  - mise en scène, e.g. sets, props, lighting, costume, blocking, production design
  - use of sound, e.g. diegetic and non-diegetic, sound effects, voiceovers, dialogue, music, sound bridges, audio beds, aural motifs, ambient sound, silence
  - editing techniques, e.g. continuity, montage, flashbacks, transitions, synchronising, pace, rhythm, flow, tone, balance
  - effects, e.g. audio effects, visual effects, motion graphics.

- **Print media products:**
  - layout and design, e.g. alignment, balance, contrast, proximity, repetition, white space
  - typography, e.g. serif and sans serif typefaces, fonts and font size, continuity, letter spacing and line height, readability
  - photographic techniques, e.g. composition, image quality, lighting effects, depth of field, aesthetic
  - image editing techniques, e.g. adding filters, colour and contrast, layering images, distorting images.

- **Interactive media products:**
  - interactive features, e.g. image galleries, option menus, navigation screens, levels
  - user interface, e.g. screen, interaction, graphics, buttons, layout, colour
  - usability/playability, e.g. accessibility, navigation, controls, rules, challenge
  - mise en scène and lighting, e.g. graphics, sprites, character models, 3D environments, interactive objects, textures, lighting schemes
  - sound design, e.g. soundtracks, sound effects, sounds triggered by game events.
Suggestions for delivery

Successful delivery of this component will allow learners to develop their knowledge and understanding of the way media products are created, and the codes, conventions and techniques used to make them, to communicate meaning and engage audiences for a given purpose.

You may choose to deliver this component alongside Component 2.

Assignments

Pearson sets the assignments for the assessment of this component.

The assignment for this component consists of two tasks.

- In response to Task 1, learners will use research techniques to select examples of media products from each sector that have approached a theme in different ways.
- In response to Task 2, based on the research relating to the theme, learners will explore how different media products use genre, narrative, representation and media production techniques to communicate meaning to audiences.

The assignment will take approximately 10 supervised hours to complete.

The assignments will be marked by centres and moderated by Pearson. Assignments for this component will be made available in September and then January of each academic year through the secure area of the website. Learners must use the Pearson-set Assignment to provide the required evidence to achieve this component.

A sample assignment is provided on the website.

Assessing the assignment

You will make assessment decisions for each assignment using the marking grid given below. Before making assessment decisions, you should refer to the guidance on using the marking grid provided in Section 5 Non-exam internal assessment. A glossary of terms used in the marking grids is provided in Appendix 1.

For further information on using and assessing through assignments, see Section 5: Non-exam internal assessment.

Please refer to Section 5: Non-exam internal assessment for further guidance on internal assessment, including how to apply these mark schemes to evidence.
Resource requirements

For this component, learners must have access to:

- production facilities for at least one of the three media sectors (audio/moving image, print, interactive)
- a range of existing media products, e.g. DVDs, audio podcasts, advertisements, magazines, brochures, games, websites
- a library and/or internet resources to carry out underpinning research
- video recording and playback facilities to support development throughout the component and for recording of presentations and other evidence
- an internet connection and digital resources.
Component 2: Developing Digital Media Production Skills

Levels: 1/2
Assessment type: Internal, externally moderated
Guided learning hours: 36

Component in brief

Learners will develop and apply skills and techniques in media production processes by creating a media product from one of the following sectors: audio/moving image, print or interactive design.

Introduction

Working in the creative media industry involves the application of a wide range of practical processes, skills and techniques. The industry requires practitioners who can create products that are effective and well-matched to their audience and purpose.

In this component, you will develop practical media production skills and techniques. You will have the opportunity to specialise in one of the following media sectors: audio/moving image, print or interactive media. You will take part in workshops and classes where you will develop practical skills and techniques. You will apply these skills and techniques to relevant pre-production, production and post-production processes when developing a media product. Throughout your development, you will review your progress and consider how you can make improvements to your techniques and practical outcomes.

Being able to learn and apply new practical skills through experimenting, reflecting and refining, is highly valued in the creative industries. This component will help you to progress to Level 2 or Level 3 vocational or academic qualifications. The component will also enable you to develop transferable skills, such as teamwork, time management and communication, to prepare you for further study and employment.

Learning outcomes

A  Develop and apply media pre-production processes, skills and techniques

B  Develop and apply media production and post-production processes, skills and techniques to create a media product.
Teaching content

Learning outcome A: Develop and apply media pre-production processes, skills and techniques

Learners will participate in workshops and classes to develop media planning and pre-production skills and techniques appropriate to one of the following media sectors: audio/moving image, print or interactive media. Learners will apply pre-production processes, practices, skills and techniques in response to a creative brief.

A1 Media pre-production processes and practices

Learners will develop techniques for generating and developing ideas in response to a creative brief.

- Research, discover and evaluate.
- Generate ideas
  - creative techniques, e.g. brainstorming, mind-mapping, visualisation, making new connections
  - developing ideas, e.g. narratives and storylines, synopsis, dialogue, visual appearance, content outline, rules, scoring systems, controls, interactivity, levels.
- Practical experimentation.
- Review ideas, e.g. expand, reject and refine ideas.

A2 Media pre-production skills and techniques

Learners will develop and apply media pre-production skills and techniques to shape their ideas into pre-production material relevant to the media sector.

- Produce, review and refine material for the audio/moving image sector relevant to the production,
  such as:
  - storyboards
  - audio scripts
  - screenplays
  - shot lists.
- Produce, review and refine material for the print sector relevant to the production, such as:
  - mood boards
  - a house style
  - thumbnails and sketches
  - page mock-ups.
- Produce, review and refine material for the interactive sector relevant to the production, such as:
  - wireframes
  - sketches and storyboards
  - structure charts
  - a games design document.
Learning outcome B: Develop and apply media production and post-production processes, skills and techniques to create a media product

Learners will participate in workshops and classes to develop media production and post-production skills and techniques appropriate to one of the following media sectors: audio/moving image, print or interactive media. Learners will apply production and post-production processes, practices, skills and techniques to create a media product in response to a creative brief.

B1 Media production and post-production processes and practices

Learners will develop understanding of media production and post-production processes and practices relevant to the media sector.

- Production and post-production processes and practices, such as:
  - production workflow, e.g. identifying and ordering tasks, setting deadlines, monitoring progress, managing resources
  - preparing assets, e.g. create, select, review, re-create
  - managing assets, e.g. setting up folder structures, selecting file formats, using appropriate file names
  - experimenting with different techniques, e.g. design iterations, rough edits, mock ups, prototyping
  - exporting for digital distribution, e.g. applying compression techniques, export settings, file formats

B2 Media production skills and techniques

Learners will develop practical skills and techniques for creating content relevant to the media sector.

- Skills for the audio/moving image sector relevant to the production, such as:
  - shooting video in different locations, e.g. interior, exterior, transport
  - shot composition, e.g. shot type, framing, angle, focus
  - camera movement techniques, e.g. slow pan, whip pan, tilt, zoom, dolly, crane, steadicam, handheld, combining camera movements
  - lighting techniques, e.g. three-point lighting, soft lighting, hard lighting, natural lighting
  - production design, e.g. set, props, colour, costume, blocking
  - recording audio in a studio and on location, e.g. acoustics, noise reduction techniques, adjusting and monitoring recording levels
  - setting up microphones, e.g. microphone type, placement
  - creating audio, e.g. ambient, foley sound, sound effects, voiceover.

- Skills for the print sector relevant to the production, such as:
  - writing and editing copy, e.g. mode of address, persuasive devices, accuracy, reliability, proofreading
  - taking photographs, e.g. composition, angle, lighting, depth of field
  - image editing, e.g. cropping, scaling and resizing images
  - image manipulation techniques, e.g. layers, selections, image adjustments, transformations, filters, effects
  - creating graphics, e.g. drawing tools, lines, shapes, paths, text, colour, transforming objects, effects.
COMPONENT 2: DEVELOPING DIGITAL MEDIA PRODUCTION SKILLS

- Skills for the interactive sector relevant to the production, such as:
  - creating vector graphics, e.g. buttons, icons, logos
  - creating 2D assets, e.g. character sprites, environments and terrain, GUI
  - creating 3D assets, e.g. models, objects, textures
  - taking photographs, e.g. composition, angle, lighting, depth of field
  - image editing, e.g. cropping, scaling and resizing images
  - image manipulation techniques, e.g. layers, selections, image adjustments, transformations, filters, effects.

B3 Media post-production skills and techniques

Learners will develop practical skills and techniques for editing, combing and refining content relevant to the media sector.

- Skills for the audio/moving image sector relevant to the production, such as:
  - editing audio, e.g. importing audio, multitrack editing, match volume, playback levels, volume, pan and balance, normalisation
  - editing video, e.g. importing assets, editing sequences, rough cuts, synchronising audio and video, rendering and previewing, cutaways, shot reverse shot, eyeline match
  - motion graphics, e.g. graphics, titles, animation and keyframes
  - adding audio and video transitions, e.g. fade, crossfade, dissolve, wipe
  - audio effects, e.g. fade and gain, compression, amplitude, modulation, delay, equalisation, reverb, noise reduction
  - visual effects, e.g. colour correction, distortion, adjustments, masking, keying, time effects, transform effects.

- Skills for the print sector relevant to the production, such as:
  - creating page layouts, e.g. pages and spreads, grids, rulers and guidelines, text frames, linking text in columns, text wrap, paths and frames, aligning objects, tables of information
  - creating visual impact, e.g. creating a visual hierarchy, masthead, cover lines, headlines, subheadings, pull quotes, running heads, using white space
  - designing print products, e.g. typography, use of colour, paragraph and character styles, object styles, drop caps, effects
  - editing text, e.g. readability, editing to fit available space, adding suitable captions.

- Skills for the interactive sector relevant to the production, such as:
  - using web design software, e.g. setting up a site, page layouts, styling objects, HTML tables to present information, use of colour, adding page content, navigation, links, interactivity, forms, coding
  - creating digital publications, e.g. animation, hyperlinks, forms, movies, sound clips, buttons, page transitions
  - designing user interfaces, e.g. importing assets, align and arrange objects, design buttons, drop-downs, tool tips, modal dialogs
  - using game engines, e.g. importing assets, level maps, lighting, sound
  - adding interactivity in games, e.g. scripts, triggers, buttons, actions, colliders, pickups.
B4 Review of progress and development

Learners will develop techniques to monitor and improve skills and outcomes throughout the production process.

- Reviewing content, e.g. the amount, quality, relevance, accuracy.
- Testing and reviewing practical outcomes, e.g. functionality, consistency, continuity, communication, accessibility.
- On-going review used to inform decisions and refine work:
  - application of skills and techniques
  - respond to audience/user feedback
  - identify strengths and areas for development.
Suggestions for delivery

Successful delivery of this component will allow learners to develop their knowledge and understanding of the practical skills, techniques and processes used to create a media product. They will learn how to review their own practice in order to refine practical production outcomes.

You may choose to deliver this component alongside Component 1.

Assignments

Pearson sets the assignments for the assessment of this component.

The assignment for this component consists of two tasks.

- In response to Task 1, learners will use media pre-production processes and practices to generate ideas and create pre-production materials.
- In response to Task 2, learners will use media production and post-production processes and practices to develop, review and refine a media product in response to the brief.

The assignment will take approximately 10 supervised hours to complete.

The assignments will be marked by centres and moderated by Pearson. Assignments for this component will be made available in September and then January of each academic year through the secure area of the website. Learners must use the Pearson-set Assignment to provide the required evidence to achieve this component.

A sample assignment is provided on the website.

Assessing the assignment

You will make assessment decisions for each assignment using the marking grid given below. Before making assessment decisions, you should refer to the guidance on using the marking grid provided in Section 5 Non-exam internal assessment. A glossary of terms used in the marking grids is provided in Appendix 1.

For further information on using and assessing through assignments, see Section 5: Non-exam internal assessment.

</table>
Please refer to *Section 5: Non-exam internal assessment* for further guidance on internal assessment, including how to apply these mark schemes to evidence.
Resource requirements

For this component, learners must have access to:

- production facilities for at least one of the three media sectors (audio/moving image, print, interactive)
- a range of existing media products, e.g. DVDs, audio podcasts, advertisements, magazines, brochures, games, websites
- a library and/or internet resources to carry out underpinning research
- video recording and playback facilities to support development throughout the component and for recording of presentations and other evidence
- an internet connection and digital resources.
Component 3: Create a Media Product in Response to a Brief

Levels: 1/2
Assessment type: External synoptic
Guided learning hours: 48

Component in brief

Learners will apply and develop their planning and production skills and techniques to create a media product in response to a client brief.

Introduction

Media production is a dynamic and rewarding practice that requires the application of various practical skills and personal qualities. In order to prosper, the media industry needs practitioners who are able to generate ideas and create effective media products in response to a brief.

In this component, you will respond to a client brief and create a product in one of the following media sectors: audio/moving image, print or interactive. You will interpret the client's needs and engage in the process of ideas generation, selecting and refining your ideas until you are satisfied that you have an idea that meets the requirements of the brief. You will undertake pre-production planning to demonstrate to the client how your ideas will be implemented within a planned media product. Throughout the pre-production process, you will need to monitor and review the effectiveness of your planning and intended outcome to ensure that your planned media product is fit for audience and purpose. This should enable you to make the necessary amendments and improvements to your proposed product as you enter the production stage of the process and create a suitable digital media product in response to the brief.

This component will help you to progress to Level 2 or Level 3 vocational or academic qualifications, which will allow you to focus in more detail on your chosen media specialism, such as a Level 3 Moving Image pathway. The component will also enable you to develop transferable skills, such as time management and communication skills, in preparation for further study and employment.

Working in the creative media industry involves the application of a wide range of practical processes, skills and techniques. The industry requires practitioners who can create products that are effective and well-matched to their audience and purpose.
COMPONENT 3: CREATE A MEDIA PRODUCT IN RESPONSE TO A BRIEF

Summary of assessment

This external component builds on knowledge, understanding and skills acquired and developed in Components 1 and 2. Learners will apply their practical skills to the creation of a media product in response to a brief. Learners will submit their ideas, pre-production planning and final media product in a portfolio of evidence.

A task worth 60 marks will be completed under supervised conditions. The supervised assessment period is 10 hours and should be arranged in the period timetabled by Pearson. The assessment availability is May/June only. First assessment is May/June 2024.

Sample assessment materials will be available to help centres prepare learners for assessment.

Assessment objectives

AO1 Understand how to develop ideas in response to a brief

AO2 Develop planning materials in response to a brief

AO3 Apply media production skills and techniques to the creation of a media product

AO4 Create and refine a media product to meet the requirements of a brief
Essential content

A Understand how to develop ideas in response to a brief

A1 Responding to a brief

- Establishing the requirements of the brief, such as:
  - the client, e.g. the type of company or organisation that has set the brief, their market or field, and their competitors
  - the aim or purpose of the brief
  - technical requirements, e.g. product type, size, duration, format.

- Defining the target audience, such as:
  - age, gender, location, income level
  - lifestyle, attitude, values, interests, behaviour, personality.

- Researching similar existing products to understand the marketplace/competition, such as:
  - products, e.g. mainstream, niche, alternative, generic, unconventional
  - textual analysis of the technical and stylistic codes
  - content analysis to establish the contents, order and sequencing.

- Exploring the chosen media sector to support the generation of ideas, such as:
  - audience responses to media products aimed at the same target audience
  - current trends in the chosen media sector.

- Theme of the brief:
  - secondary research into the topic or theme of the brief.

A2 Generating ideas

Learners will need to consider different ideas for their product, its content and style, in order to develop a coherent product proposal.

- Product, such as:
  - audio/moving image, e.g. podcast, radio broadcast, audio guide, news or feature package, advertisement, trailer, viral video, promotional video, short film, animation
  - print, e.g. magazine, brochure, marketing material, newspaper, advertorial, leaflet
  - interactive, e.g. game demo, website, app, interactive magazine, HTML newsletter.

- Content, such as:
  - structure, e.g. storyline, narrative, running order, pages, screens, levels
  - breakdown, e.g. characters, articles, features, rules.

- Style and design, such as:
  - style, e.g. mise en scène, tone, mode of address, house style
  - design, e.g. locations, atmospheric and ambient sound, game environment.

- Idea selection:
  - retain, reject, combine and refine ideas to form a chosen idea for a media product.
COMPONENT 3: CREATE A MEDIA PRODUCT IN RESPONSE TO A BRIEF

B  Develop planning materials in response to a brief

B1  Planning materials

Learners need to produce sector-specific planning materials that are sufficiently detailed to enable the client to visualise the proposed product.

- Storyboarding for moving image, such as:
  - conventions, e.g. types of shot, shot composition, framing, camera movement, transitions, shot duration, dialogue, soundtrack
  - storytelling, e.g. staging, continuity, direction notes.
- Writing a script for audio/moving image, such as:
  - conventions, e.g. title page, description of action, dialogue, timings, script outline
  - audio elements, e.g. music, sound effects, jingles, interviews, vox pop, music bed, speech
  - storytelling, e.g. sequences, scenes, use of language, directions, narration.
- Page layout and design for print, such as:
  - conventions, e.g. thumbnails, sketches
  - positioning, e.g. assets, features, content, columns, white space
  - design, e.g. consistency, colours, fonts, styles, effects.
- Layout and design for interactive, such as:
  - conventions, e.g. storyboards, wireframes, sketches
  - positioning, e.g. text, images, assets, white space
  - flow, e.g. interactivity, navigation, movement, sound, rules.

B2  Managing the production process

Learners will need to manage the following aspects of the production process.

- Time management, such as:
  - schedules, e.g. maintain production schedules of tasks and deadlines
  - contingency planning.
- Copyright, clearances and permissions, such as:
  - checking copyright status of secondary assets and material, e.g. public copyright licences such as Creative Commons, royalty free (RF), public domain (expired copyright), obtaining permission to use copyrighted assets or material
  - clearances to use locations, participants for public screening/viewing.

C  Apply media production skills and techniques to the creation of a media product

Learners will apply production skills and techniques to the creation of their media product within their chosen sector through selection and use of appropriate equipment and in response to the client’s needs.

C1  Monitor and review the outcomes of the production process

Learners will need to continually reflect on the progress of their media product as they engage in the different stages of the production process.

- Monitoring outcomes to identify strengths and potential areas for improvement.
- Making refinements to the media product to improve the outcome.
C2 Production skills and techniques

Learners will use relevant skills and techniques developed in Components 1 and 2 to prepare the content needed for the construction of their chosen media product.

- Capturing footage and audio, such as:
  - equipment, e.g. cameras, tripods, lights, microphones, portable audio digital recorders, microphone stands, pop filters, headphones
  - techniques, e.g. camerawork, framing, shot type and length, angle, movement, checking sound levels, sound capture.

- Creating images and assets, such as:
  - equipment and software, e.g. digital cameras, vector drawing tools and packages, image editing and manipulation tools and packages, game authoring software
  - techniques, e.g. composition, cropping, resizing, image adjustments, image manipulation, image quality, preparing assets.

- Creating copy, such as:
  - equipment and software: word processing
  - techniques, e.g. speak to the reader, use facts and statistics, check sources, organisation of content and ideas, short paragraphs, repetition, proofreading.

- Sourcing content from secondary sources, such as:
  - compatibility, e.g. file size, and file format
  - assessing quality, suitability and fitness for purpose.

C3 Combining and refining content

Learners will need to edit their content together to create a finished product for presentation to the client.

- Editing audio and moving image, such as:
  - software, e.g. digital video editing, digital audio editing
  - techniques, e.g. continuity editing, non-continuity editing, transitions, audio mixing, audio and visual effects, titles and credits, sound beds
  - stylistic codes, e.g. camera framing, angle, movement, mise en scène, lighting, editing and sound.

- Combining assets for the page and screen, such as:
  - software, e.g. graphics or image manipulation, desktop publishing
  - techniques, e.g. alignment, formatting text and images, use of colour
  - stylistic codes, e.g. layout and design principles, typography, image editing.

- Adding interactivity, such as:
  - software, e.g. web design, games authoring, app development
  - techniques, e.g. incorporating interactive objects and features, navigation, controls
  - stylistic codes, e.g. interactivity, user interface, usability/playability, mise en scène, gaming environments, lighting and sound.
C4 Testing and exporting for distribution

Learners will need to test their media product to ensure it functions as intended and save it in an appropriate file format for distribution.

- Testing: usability testing, functionality testing.
- Compressing: rendering audio and video, file optimisation.
- Exporting in appropriate file formats for the chosen distribution platform.

C5 Technical records

Learners will need to produce technical records that outlines how they have created key aspects of their work.

- Use of software and equipment.
- Creation and manipulation of assets.
- Construction of work and outcomes.
Links to other components

The table below illustrates how knowledge, understanding and skills from components across this qualification could be integrated to the delivery of this component. The skills support learners in making a synoptic response.

4 Planning your programme

Is there a learner entry requirement?
As a qualification designed to be used in Key Stage 4, there are no formal entry requirements. It is assumed that learners are studying GCSEs and other qualifications alongside this qualification. As a centre, it is your responsibility to ensure that learners who are recruited make reasonable progress and are likely to achieve at this level. Overall achievement can be improved by highlighting links between this qualification and other qualifications as part of a Key Stage 4 programme of learning, such as through project-based learning.

What level of sector knowledge is needed to teach this qualification?
We do not set any requirements for teachers but recommend that centres assess the overall skills and knowledge of the teaching team to ensure that they are relevant and up to date. This will give learners a rich programme that will prepare them for progression.

What resources are required to deliver this qualification?
As part of your centre approval, you will need to show that the necessary material resources and workspaces are available to deliver the qualifications. For some components, specific resources are required; please refer to individual components.

How does this qualification contribute to Key Stage 4 learning?
This qualification gives learners opportunities to apply learning from GCSE English and mathematics to vocational learning. For example, the skills developed in extended writing can be applied when communicating knowledge and understanding of media products, processes and techniques.

What makes good vocational teaching?
The approach to vocational teaching must be led by what is right for the particular sector. For vocational teaching to be effective, it is important that teaching and learning are contextualised to the relevant sector. Therefore, we have provided delivery guidance for each component and other resources, such as Schemes of Work, to help you build a course that contextualises learning in real-life and/or employment scenarios. This draws naturally on the kind of broader attributes valued in the sector, for example researching, planning, problem solving and communicating, as well as the more general skills needed in work that fit well with project-based learning, for example teamwork and independent learning.
5 Non-exam internal assessment

Pearson-set Assignments

In this qualification, there are two non-exam internally-assessed components, which will be assessed through Pearson-set Assignments.

These assignments are set by Pearson and are summative assessments, which means they are distinct periods of assessment that are separate from the practice, exploration activities and formative assessments that have been used during the learning period. It is important that you explain to learners that these assignments are being used to formally assess their performance against the learning outcomes.

Each Pearson-set Assignment will:

- provide a vocational context to engage learners and to set the scene for the tasks to be completed across all the learning outcomes
- give learners clear tasks with the associated marks and the approximate time to complete each task
- give clear structures for evidence and specify the form(s) of evidence that learners should produce
- ensure that learners are drawing on the specified range of teaching content
- allow learners to select and apply their learning using appropriate self-management of tasks if a component contains synoptic assessment.

For each component, new Pearson-set Assignments are released twice a year through the secure area of our website. Release dates will vary by sector; please refer to individual components for the annual release date of the assignments. Each Pearson-set Assignment will be clearly marked with the assessment series and academic year of release; you must ensure that you are using the current series' assignment to assess your learners.

Each Pearson-set Assignment is to be issued to learners with a defined start date and completion date set by the centre and clear requirements for the evidence that they need to provide. You will need to give learners a guide that explains how these assignments are used for assessment, how they relate to the teaching programme, and how learners should use and reference source materials, including what would constitute plagiarism. The guide should also set out your approach to operating assessment, such as how learners must submit work and request extensions.

All Pearson-set Assignments must be completed under supervised conditions; please refer to the guidance in the Pearson-set Assignment for individual components for any supervision requirements specific to each assignment.
Sample Pearson-set Assignments for internal components

Each non-exam internally-assessed component has a sample Pearson-set Assignment that accompanies this specification. This sample assignment is an example of what the assessment will look like in terms of the feel and level of demand of the assessment.

The sample assignment shows the nature of the tasks that may appear in the live Pearson-set Assignments and will give you a good indication of how the assessments will be structured. While the sample Pearson-set Assignment can be used for practice with learners, as with any assessment the content covered and specific details of the tasks may vary in each live Pearson-set Assignment, however, the marking grids will remain unchanged.

The sample Pearson-set Assignment can be downloaded from our website. This is for you to use and mark as you wish. Pearson does not mark sample Pearson-set Assignments.

Marking Pearson-set Assignments

Live Pearson-set Assignments are marked by the centre and will be moderated by a moderator appointed by Pearson. Centres are responsible for appointing someone to act as the assessor. This may be you (the teacher who has delivered the programme) or another teacher from the subject team.

Learners’ evidence for a Pearson-set Assignment must be marked using the marking grid for that particular component. Each learner's marks are to be recorded on an Assessment Record Sheet (or centre devised documentation) and authenticated by the learner and Assessor. The Assessment Record Sheet is also required to be submitted with the learner's work for moderation.

The marking grid has four mark bands, each containing the descriptors specifying the level of knowledge, understanding and skills that learners are required to demonstrate to be awarded the marks associated with that band for each task. The descriptors for each band are written to reflect the marks at the top of the mark band; the descriptors should be read and applied as a whole.

Using a ‘best fit approach’ to marking the assignments

In applying the marking grid, you are required to first make a holistic judgement about which mark band most closely matches the learner’s response for the evidence being assessed. Each mark band contains ‘traits’ that provide a descriptor of the learner’s expected performance in relation to the individual task within the assignment. Consideration should also be given to the descriptors in the mark bands above and below to ensure the correct band is selected. The learner’s response does not have to meet all the characteristics of a mark band's descriptor before being placed in that band, as long as it meets more of the characteristics of that mark band than of any other.

After placing the learner’s response within a mark band, you should then make a more refined judgement as to whether the learner’s response is towards the higher or the lower end of the range for that band and allocate a final mark accordingly within the marks available in that band.
Further guidance on deciding a final mark

The award of marks must be directly related to the descriptors in a mark band. You should be prepared to use the full range of marks available. When deciding upon a final mark, you should take into account how well the learner’s response meets the requirements of the descriptor in that mark band.

- If the learner’s response meets the requirements of the descriptor fully, you should be prepared to award full marks within the mark band. The top mark in the band is used for a learner’s response that is as good as can realistically be expected in that band.
- If the learner’s response only barely meets the requirements of the descriptor (but is better than the previous descriptor), you should consider awarding marks at the bottom of the mark band. The bottom mark in the band is used for a learner’s response that is the weakest that can be expected in that mark band.
- The middle marks of the mark band are for a learner’s response that is a reasonable match to the descriptor. This might represent a balance between some characteristics of the descriptor that are fully met and others that are barely met.
- Where there is no evidence worthy of credit, no marks (0 marks) must be awarded.

Authenticity of learner work

You must ensure that learner evidence is authentic by supervising them during the assessment period according to the requirements of each internally-assessed component. You must take care not to provide direct input, instructions or specific feedback that may compromise authenticity.

Once an assessment has begun, learners must not be given feedback that relates specifically to their evidence and how it can be improved, as learners must work independently.

You must assess only learner work that is authentic, i.e. learners’ own independent work. Learners must authenticate the evidence that they provide for assessment through signing a declaration stating that it is their own work.

You must complete a declaration that:

- the evidence submitted for this assignment is the learner’s own
- the learner has clearly referenced any sources used in the work
- you understand that false declaration is a form of malpractice.

Centres can use Pearson templates or their own templates to document authentication.

During assessment, if you suspect that some or all of the evidence from a learner is not authentic, you must take appropriate action using the centre's policies for malpractice. Further information is given in Section 9: Administrative arrangements.
Resubmission of evidence and retakes

Prior to submitting marks for moderation, where a learner has not achieved their expected level of performance for an assignment, the centre may authorise one opportunity over 15 days for learners to improve evidence and resubmit for internal assessment. Internal assessment should be conducted in time to allow for this resubmission window prior to moderation should it be needed.

Feedback to learners can only be given in order to clarify areas where they have not achieved expected levels of performance. Learners cannot receive any specific guidance or instruction about how to improve work to meet mark bands, or be given solutions to questions or problems in the tasks.

Following submission of marks for moderation, there is no further opportunity to resubmit improved evidence based on the same completed assignment. Learners may be offered a single retake opportunity in a later assessment series using the new Pearson-set Assignment released for that series. Retakes must be completed prior to or in the same series as the externally assessed component to meet terminal assessment requirements.

For further information on offering resubmission of evidence and retake opportunities, giving feedback, conditions for supervision and planning, and record-keeping requirements, you should refer to the centre guidance for internal assessment for BTEC Tech Awards, available on our website. All members of the assessment team need to refer to this document.

Internal standardisation

If there are a number of staff acting as assessors for this qualification, prior to assessment, you must carry out internal standardisation to make sure all learners’ work is assessed consistently to the required standard.

If you are the only assessor in your centre for this qualification, it is still advisable to make sure your assessment decisions are internally standardised by someone else in your centre. This could be someone who has experience of the nature of this qualification or relevant subject knowledge.

Pearson will supply standardisation materials giving assessors the opportunity to discuss standardised learner work, assessment and administration.

Marking should be applied consistently as adjustments made through moderation can affect the whole cohort. Effective internal standardisation ensures that the work of all learners at the centre is marked to the same standard. It may not be possible for moderation to take place if effective internal standardisation has not been carried out.

You are not required to submit evidence of internal standardisation of assessment decisions to the moderator, but it must be retained in the centre should Pearson request it, or where there is a disagreement with the marking.

If it appears to the Pearson moderator that internal standardisation has not been carried out, they may discontinue the moderation process. The centre will then be required to remark all learners’ work and carry out internal standardisation; another moderation activity will then be scheduled at the centre’s expense. Submission of marks will be considered as confirmation that internal standardisation has taken place.
Moderation

The purpose of external moderation is to ensure that the standard of marking is the same for each centre and across different assessors within a centre.

There are two annual moderation windows, December/January and May/June; the first moderation window for this qualification is December/January 2023.

Centres must ensure that they plan their assessment so that they can make the necessary entries and submit marks to meet the moderation deadlines. More details are provided in the Administrative Support Guide.
6 Quality assurance

Centre and qualification approval

As part of the approval process, your centre must make sure that the resource requirements listed below are in place before offering the qualification.

- Centres must have appropriate physical resources (for example equipment, IT, learning materials, teaching rooms) to support the delivery and assessment of the qualification.
- Staff involved in the assessment process must have relevant expertise and/or occupational experience.
- There must be systems in place to ensure continuing professional development for staff delivering the qualification.
- Centres must have in place appropriate health and safety policies relating to learners' use of equipment.
- Centres must deliver the qualification in accordance with current equality legislation.
- Centres should refer to the teacher guidance section in individual components to check for any specific resources required.

Continuing quality assurance

The key principles of quality assurance are that:

- a centre delivering BTEC programmes must be an approved centre, and must have approval for the programmes or groups of programmes that it is delivering
- the centre agrees, as part of gaining approval, to abide by specific terms and conditions around the effective delivery and quality assurance of assessment; it must abide by these conditions throughout the period of delivery
- Pearson makes available to approved centres a range of materials and opportunities, intended to exemplify the processes required for effective assessment, and examples of effective standards. Approved centres must use the materials and services to ensure that all staff delivering BTEC qualifications keep up to date with the guidance on assessment
- an approved centre must follow agreed protocols for standardisation of assessors, for the planning, monitoring and recording of assessment processes, and for dealing with special circumstances, appeals and malpractice.

We will make sure that each centre follows best practice and employs appropriate technology to support quality-assurance processes, where practicable. We work to support centres and seek to make sure that our quality-assurance processes do not place undue bureaucratic processes on centres. We monitor and support centres in the effective operation of assessment and quality assurance.
The methods we use to do this for BTEC Tech Award qualifications include:

- making sure that all centres complete appropriate declarations at the time of approval
- undertaking approval visits to centres
- making sure that centres have effective teams of assessors who are trained to undertake assessment
- assessment moderation, through requested samples of assessments, completed assessed learner work and associated documentation
- an overarching review and assessment of a centre's strategy for delivering and quality assuring its BTEC programmes, for example making sure that the synoptic component is placed appropriately in the delivery of the programme.

Centres that do not fully address and maintain rigorous approaches to delivering, assessing and quality assurance cannot seek certification for individual programmes or for the BTEC Tech Award qualifications. An approved centre must make certification claims only when authorised by us and strictly in accordance with requirements for reporting.
7 External assessment

Role of external assessment for the BTEC Tech Award suite

The externally-assessed component in the BTEC Tech Award suite comprises 40 per cent of the total qualification GLH. The external assessment is weighted to contribute the same proportion of the overall qualification grade. To ensure that the assessment is fully challenging and that the grading of the component reflects performance in a qualification as a whole, the assessment is synoptic and is taken at or near the end of a learner's programme. Our approach ensures that learners are able to show depth of understanding through being able to apply their conceptual and sector knowledge in practical contexts. The external assessment is rigorous but fully valid as preparation for progression to vocational qualifications.

This section gives an overview of the key features of external assessment and how you, as an approved centre, can offer it effectively.

External assessment

The Summary of assessment section in Component 3 sets out the specific arrangements for the external assessment. External assessment includes a preparatory period and the task is taken under supervised conditions. The expected evidence that must be submitted is explained in the component and sample assessment materials (SAMs). Your learners will undertake the external assessment during the period timetabled by Pearson.

Timing of external assessment

External assessment for this qualification is available in May/June from 2024 onwards. As this is the terminal assessment for the qualification, learners can only use the external assessment results achieved in the same assessment series in which they are requesting certification for the qualification.

Sample assessment materials

Each externally-assessed component has a set of SAMs that accompanies this specification. SAMs are there to give you an example of what the external assessment will look like in terms of the feel and level of demand of the assessment. The SAMs show the range of possible activity types that may appear in the actual assessments and give you a good indication of how the assessments will be structured. While SAMs can be used for practice with learners, as with any assessment the content covered and specific details of the activities will vary in each assessment.

These sample assessments can be downloaded from our website. We will provide further materials over time to support assessment, for example sample marked learner work, further sample materials and examiner feedback.
Conduct of set tasks for external assessment

The external assessment is set and marked by Pearson. You need to ensure that learners are aware that they need to work independently and of the requirements for any external assessment.

We define the degree of control for assessments for BTEC qualifications in this specification as:

- **medium control**
  this is the completion of assessment, usually over a longer period of time, which may include a period of supervised conditions. The supervised conditions may allow learners to access resources, prepared notes or the internet to help them complete the task.

Further information on responsibilities for conducting external assessment is given in the document *Instructions for Conducting External Assessments (ICEA)*, available on our website, qualifications.pearson.com (search for *ICEA*).

Pearson marking

Marking

Pearson will allocate standardised examiners to mark the evidence remotely. Your Examinations Officer will be given guidance as to how to send this evidence to us or the examiner directly.

We review quality of marking throughout the marking period and ensure that our examiners mark to the agreed marking scheme during this time.
8 Final grading and awarding

Awarding and reporting for the qualification

The BTEC Tech Award qualifications will be graded and certificated on a seven-grade scale from Level 2 Distinction* to Level 1 Pass. Individual components will be graded on a six-point scale from Level 2 Distinction to Level 1 Pass. Individual component results will be reported.

Learners who do not meet the minimum requirements for a qualification grade to be awarded will be recorded as Unclassified (U) and will not be certificated.

Grade boundaries will be set for each component in the series in which it is offered through a process known as awarding. Awarding is used to set grade boundaries and ensure that standards are maintained over time. This is important as we must ensure that learners have the same opportunity to achieve, regardless of the assessment opportunity.

Learners’ raw component marks will be converted to a Uniform Mark Scale (UMS). The UMS is used to convert learners’ component ‘raw’ marks into uniform marks. This is done in order to standardise marks from one series to another. (Further details of the UMS are provided below in the section ‘Calculation of a Qualification Grade’.)

The awarding and certification of the qualification will comply with the requirements of the Office of Qualifications and Examinations Regulation (Ofqual), CCEA Regulation and Qualifications Wales.

Eligibility for an award

In order to be awarded a qualification, a learner must complete and achieve an outcome for all three components and achieve the minimum number of uniform marks at a qualification grade threshold.

Unclassified is considered an outcome for the purposes of aggregating a final award.

Subject to eligibility, Pearson will automatically calculate the qualification grade for your learners when the qualification claim is made.

In order to meet the terminal rule requirement, a learner must take the external assessment, Component 3 in their final series, i.e. the one in which a final award is claimed. If resitting, any prior attempts of Component 3 will not be used towards the learner’s qualification grade, even if the result from the earlier attempt is higher.

The Level 2 Distinction* grade at qualification level will be awarded only if a learner has achieved a Level 2 Distinction in each component and the minimum number of uniform marks for the Level 2 Distinction* at qualification level.
Calculation of the qualification grade

The final grade awarded for a qualification represents an aggregation of a learner's performance across the three components. A higher performance in some components may be balanced by a lower outcome in others.

The UMS is used to convert learners' component ‘raw’ marks into uniform marks. This is done in order to standardise marks from one series to another. For example, a learner who just achieves a Level 2 Pass in an internal component one series will receive the same uniform mark as a learner achieving that same component grade the following series, regardless of their raw marks.

The minimum uniform marks required for each grade for each component

### Components 1 and 2

<table>
<thead>
<tr>
<th>Component Grade</th>
<th>L2D</th>
<th>L2M</th>
<th>L2P</th>
<th>L1D</th>
<th>L1M</th>
<th>L1P</th>
</tr>
</thead>
<tbody>
<tr>
<td>Maximum UMS = 90</td>
<td>72</td>
<td>63</td>
<td>54</td>
<td>45</td>
<td>36</td>
<td>27</td>
</tr>
</tbody>
</table>

Learners who do not achieve the standard required for a Level 1 Pass will receive a uniform mark in the range 0–26.

### Component 3

<table>
<thead>
<tr>
<th>Component Grade</th>
<th>L2D</th>
<th>L2M</th>
<th>L2P</th>
<th>L1D</th>
<th>L1M</th>
<th>L1P</th>
</tr>
</thead>
<tbody>
<tr>
<td>Maximum UMS = 120</td>
<td>96</td>
<td>84</td>
<td>72</td>
<td>60</td>
<td>48</td>
<td>36</td>
</tr>
</tbody>
</table>

Learners who do not achieve the standard required for a Level 1 Pass will receive a uniform mark in the range 0–35.

### Qualification level results: the minimum uniform marks required for each grade

<table>
<thead>
<tr>
<th>Qualification Grade</th>
<th>L2D*</th>
<th>L2D</th>
<th>L2M</th>
<th>L2P</th>
<th>L1D</th>
<th>L1M</th>
<th>L1P</th>
</tr>
</thead>
<tbody>
<tr>
<td>Maximum UMS = 300</td>
<td>270</td>
<td>240</td>
<td>210</td>
<td>180</td>
<td>150</td>
<td>120</td>
<td>90</td>
</tr>
</tbody>
</table>

Learners who do not achieve the standard required for a Level 1 Pass grade will receive a uniform mark in the range 0–89.

The Level 2 Distinction* grade at qualification level will be awarded only if a learner has achieved a Level 2 Distinction in each component and the minimum number of uniform marks for the Level 2 Distinction* at qualification level.
Results issue

Results are issued in line with advertised timeframes, which can be found in the ‘key dates’ section of our *Information Manual* available on our website: qualifications.pearson.com (search for key dates).
9 Administrative arrangements

Introduction
This section focuses on the administrative requirements for delivering BTEC Tech Award qualifications. It will be of value to Quality Nominees, Programme Leads, Assessors and Examinations Officers.

Learner registration and entry
Learners must be registered in line with the Information Manual (by 1 November). Shortly after learners start the programme of learning, you need to make sure that they are registered for the qualification and that appropriate arrangements are made for internal and external assessment. You need to refer to our Information Manual for information on making registrations for the qualification and entries for internal or external assessments.

Learners can be formally assessed only for a qualification on which they are registered. If learners' intended qualifications change, for example if a learner decides to choose a qualification from a different sector, then you must transfer the learner appropriately.

Access to assessment
All assessments need to be administered carefully to ensure that all learners are treated fairly and that results and certification are issued on time to allow learners to access their chosen progression opportunities.

Our equity, diversity and inclusion policy requires all learners to have equitable opportunity to access our qualifications and assessments, and that our qualifications are awarded in a way that is fair to every learner. We are committed to making sure that:

- learners with a protected characteristic (as defined by the Equality Act 2010) are not, when they are undertaking one of our qualifications, disadvantaged in comparison to learners who do not share that characteristic
- all learners achieve the recognition they deserve for undertaking a qualification and that this achievement can be compared fairly to the achievement of their peers.

Further information on access arrangements can be found in the Joint Council for Qualifications (JCQ) document Access Arrangements, Reasonable Adjustments and Special Consideration for General and Vocational Qualifications.

The Pearson Equity, Diversity and Inclusion in Pearson Qualifications and Related Services Policy is on our website.
Administrative arrangements for internal assessment

Records
You are required to retain records of assessment for each learner. Records should include assessments taken, marks awarded and any adjustments or appeals. Further information can be found in our Information Manual. We may ask to audit your records, so they must be retained as specified.

Reasonable adjustments for assessment
A reasonable adjustment is one that is made before a learner takes an assessment to ensure that they have fair access to demonstrate the requirements of the assessments. You are able to make adjustments to internal assessments to take account of the needs of individual learners. In most cases, this can be achieved through a defined time extension or by adjusting the format of evidence. We can advise you if you are uncertain as to whether an adjustment is fair and reasonable. You need to plan for time to make adjustments if necessary.

Further details on how to make adjustments for learners with protected characteristics are on our website in the document Supplementary guidance for reasonable adjustment and special consideration in vocational internally-assessed components.

Special consideration
Special consideration is given after an assessment has taken place for learners who have been affected by adverse circumstances, such as illness. You must operate special consideration in line with our policy (see previous paragraph). You can provide special consideration related to the period of time given for evidence to be provided or for the format of the assessment if it is equally valid. You may not substitute alternative forms of evidence to that required in a component, or omit the application of any part of a mark scheme to judge attainment. Pearson can consider applications for special consideration in line with the policy.

Appeals against assessment
Your centre must have a policy for dealing with appeals from learners. These appeals may relate to assessment decisions being incorrect or assessment not being conducted fairly. The first step in such a policy could be a consideration of the evidence by a Programme Lead or other member of the programme team. Sufficient time should be allowed for potential appeals after assessment decisions have been given to learners. If there is an appeal by a learner, you must document the appeal and its resolution. Learners have a final right of appeal to Pearson but only if the procedures that you have put in place have not been followed. Further details are given in our Internal Assessment in Vocational Qualifications: Reviews and Appeals Policy document.
Administrative arrangements for external assessment

Entries
For information on the timing of assessment and entries, please refer to the annual examinations timetable on our website.

Access arrangements requests
Access arrangements are agreed with Pearson before an assessment. They allow learners with special educational needs, disabilities or temporary injuries to:

● access the assessment
● show what they know and can do without changing the demands of the assessment.

Access arrangements should always be processed at the time of registration. Learners will then know what type of arrangements are in place for them.

Granting reasonable adjustments
For external assessment, a reasonable adjustment is one that we agree to make for an individual learner. A reasonable adjustment is defined for the individual learner and informed by the list of available access arrangements.

Whether an adjustment will be considered reasonable will depend on a number of factors, to include:

● the needs of the learner with the disability
● the effectiveness of the adjustment
● the cost of the adjustment
● the likely impact of the adjustment on the learner with the disability and other learners.

Adjustment may be judged unreasonable and not approved if it involves unreasonable costs or timeframes or affects the integrity of the assessment.

Special consideration requests
Special consideration is an adjustment made to a learner’s mark or grade after an external assessment to reflect temporary injury, illness or other indisposition at the time of the assessment. An adjustment is made only if the impact on the learner is such that it is reasonably likely to have had a material effect on that learner being able to demonstrate attainment in the assessment.

Centres are required to notify us promptly of any learners that they believe have been adversely affected and request that we give special consideration. Further information can be found in the special requirements section on our website.
Dealing with malpractice in assessment

‘Malpractice’ refers to acts that undermine the integrity and validity of assessment, the certification of qualifications, and/or may damage the authority of those responsible for delivering the assessment and certification.

Pearson does not tolerate actual or attempted actions of malpractice by learners, centre staff or centres in connection with Pearson qualifications. Pearson may impose sanctions on learners, centre staff or centres where malpractice or attempted malpractice has been proven.

Malpractice may occur or be suspected in relation to any component or type of assessment within a qualification. For further details on malpractice and advice on preventing malpractice by learners, please see Pearson's Centre Guidance: Dealing with Malpractice, available on our website.

Centres are required to take steps to prevent malpractice and to assist with investigating instances of suspected malpractice. Learners must be given information that explains what malpractice is and how suspected incidents will be dealt with by the centre. The Centre Guidance: Dealing with Malpractice document gives full information on the actions we expect you to take.

Pearson may conduct investigations if we believe a centre is failing to conduct internal assessment according to our policies. The above document gives further information and examples, and details the sanctions that may be imposed.

In the interests of learners and centre staff, centres need to respond effectively and openly to all requests relating to an investigation into an incident of suspected malpractice.

Learner malpractice

The head of centre is required to report incidents of suspected learner malpractice that occur during the delivery of Pearson qualifications. We ask centres to complete JCQ Form M1 (www.jcq.org.uk/malpractice) and email it with any supporting documents (signed statements from the learner, invigilator, copies of evidence, etc.) to the Investigations Processing team at candidatemalpractice@pearson.com. The responsibility for determining appropriate sanctions on learners lies with Pearson.

Learners must be informed at the earliest opportunity of the specific allegation and the centre’s malpractice policy, including the right of appeal. Learners found guilty of malpractice may be disqualified from the qualification for which they have been entered with Pearson.

Failure to report malpractice constitutes staff or centre malpractice.
Teacher/centre malpractice

The head of centre is required to inform Pearson's Investigations team of any incident of suspected malpractice (which includes maladministration) by centre staff before any investigation is undertaken. The head of centre is requested to inform the Investigations team by submitting a JCQ M2 form (downloadable from www.jcq.org.uk/malpractice) with supporting documentation to pqsmalpractice@pearson.com. Where Pearson receives allegations of malpractice from other sources (for example Pearson staff, anonymous informants), the Investigations team will conduct the investigation directly or may ask the head of centre to assist.

Pearson reserves the right in cases of suspected malpractice to withhold the issuing of results/certificates while an investigation is in progress. Depending on the outcome of the investigation, results and/or certificates may not be released or they may be withheld.

You should be aware that Pearson may need to suspend certification when undertaking investigations, audits and quality assurances processes. You will be notified within a reasonable period of time if this occurs.

Sanctions and appeals

Where malpractice is proven, we may impose sanctions, such as:

- mark reduction for affected external assessments
- disqualification from the qualification
- debarment from registration for Pearson qualifications for a period of time.

If we are concerned about your centre's quality procedures, we may impose sanctions such as:

- working with centres to create an improvement action plan
- requiring staff members to receive further training
- placing temporary suspensions on certification of learners
- placing temporary suspensions on registration of learners
- debarring staff members or the centre from delivering Pearson qualifications
- suspending or withdrawing centre approval status.

The centre will be notified if any of these apply.

Pearson has established procedures for centres that are considering appeals against sanctions arising from malpractice. Appeals against a decision made by Pearson will normally be accepted only from the head of centre (on behalf of learners and/or members or staff) and from individual members (in respect of a decision taken against them personally). Further information on appeals can be found in the JCQ Appeals booklet (https://www.jcq.org.uk/exams-office/appeals).
Certification and results

Once a learner has completed all the required components for a qualification, the centre can claim certification for the learner, provided that quality assurance has been successfully completed. For the relevant procedures, please refer to our Information Manual. You can use the information provided on qualification grading to check overall qualification grades.

Results issue

Learner results will then be issued to centres. The result will be in the form of a grade. You should be prepared to discuss performance with learners, making use of the information we provide and post-results services.

Post-assessment services

It is possible to transfer or reopen registration in some circumstances. The Information Manual gives further information.

Additional documents to support centre administration

As an approved centre, you must ensure that all staff delivering, assessing and administering the qualifications have access to this documentation. These documents are reviewed annually and are reissued if updates are required.

- Centre Guide for BTEC Moderation: this sets out how we will carry out quality assurance of standards and how you need to work with us to achieve successful outcomes.
- Information Manual: this gives procedures for registering learners for qualifications, transferring registrations, entering for external assessments and claiming certificates.
- Regulatory policies: our regulatory policies are integral to our approach and explain how we meet internal and regulatory requirements. We review the regulated policies annually to ensure that they remain fit for purpose. Policies related to this qualification include:
  - JCQ Adjustments for Candidates with Disabilities and Learning Difficulties, Access Arrangements and Reasonable Adjustments
  - age of learners
  - centre guidance for dealing with malpractice
  - recognition of prior learning and process.

This list is not exhaustive; a full list of our regulatory policies can be found on our website.
10 Resources and support

Our aim is to give you support to enable you to deliver the BTEC Tech Award suite with confidence. You will find resources to support teaching and learning and professional development on our website.

Support for setting up your course and preparing to teach

Schemes of Work
The free Schemes of Work give suggestions and ideas on how to teach the qualifications, including teaching tips and ideas, assessment preparation and suggestions for further resources.

Course planner
This gives a high-level overview of how to plan teaching term by term over one or two years.

Support for teaching and learning
Pearson Learning Services provides a range of engaging resources to support BTEC qualifications, including:

- learner textbooks in ebook and print formats
- teacher support, including slides, interactive activities and videos, via the ActiveLearn Digital Service
- teaching and learning resources may also be available from a number of other publishers.

Details of Pearson’s own resources and all endorsed resources can be found on our website.

Support for assessment

Sample assessment materials (SAMs) for externally-assessed components
Sample assessment materials are available for the externally-assessed component and can be downloaded from the Pearson Qualifications website. An additional set of sample assessment materials for the externally-assessed component will also be available, allowing your learners further opportunities for practice.

Sample Pearson-set Assignments for non-exam internally-assessed components
Sample Pearson-set Assignments are available for the non-exam internally-assessed components and can be downloaded from the Pearson Qualifications website.
Training and support from Pearson

People to talk to

There are many people who can support you and give you advice and guidance on delivering your BTEC Tech Awards. They include:

- Lead Standards Verifiers – they can support you in preparing for the moderation activity.
- Subject Advisors – they are available for all sectors. They understand all Pearson qualifications in their sector and so can answer sector-specific queries on planning, teaching, learning and assessment.
- Customer Services – the ‘Support for You’ section of our website gives the different ways in which you can contact us for general queries. For specific queries, our service operators can direct you to the relevant person or department.
- Pearson Quality Advisors – they can support with all quality assurance related aspects of your programme.

Training and professional development

We provide a range of training and professional development events to support the introduction, delivery, assessment, quality assurance and administration of BTEC Tech Awards. These sector-specific events, developed and delivered by specialists, are available both face-to-face and online.
Appendix 1

Glossary of terms used for internally-assessed components

This is a summary of the key terms that may be used to define the requirements in the components.

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Account</td>
<td>Description of particular events or situations.</td>
</tr>
<tr>
<td>Accurate</td>
<td>Produce work competently, fit for purpose and correctly without significant error.</td>
</tr>
<tr>
<td>Accurately</td>
<td>Act or perform with care and precision; correctly within acceptable limits from a standard.</td>
</tr>
<tr>
<td>Adequate</td>
<td>The work is acceptable in most areas, but with some gaps or inconsistencies.</td>
</tr>
<tr>
<td>All</td>
<td>All relevant content for a specific area, as described in the component.</td>
</tr>
<tr>
<td>Analyse/Analysis</td>
<td>Separate information into components and identify characteristics, typically in order to interpret.</td>
</tr>
<tr>
<td>Applied</td>
<td>Put to practical use.</td>
</tr>
<tr>
<td>Appropriate</td>
<td>Relevant and considered in relation to the purpose/task/context. Select and use skills/knowledge in ways that reflect the aim.</td>
</tr>
<tr>
<td>Argument</td>
<td>Propositions supported by evidence.</td>
</tr>
<tr>
<td>Balanced</td>
<td>All factors have been considered in equal detail.</td>
</tr>
<tr>
<td>Basic</td>
<td>The work comprises the minimum required and provides the base or starting point from which to develop. Includes just the core elements or features without elaboration/examples/details.</td>
</tr>
<tr>
<td>Brief/Briefly</td>
<td>Accurate and to the point but lacking detail/contextualisation/examples.</td>
</tr>
<tr>
<td>Clearly</td>
<td>Easy to perceive and unambiguous.</td>
</tr>
<tr>
<td>Coherent</td>
<td>Logically consistent.</td>
</tr>
<tr>
<td>Cohesive</td>
<td>All elements are thoughtfully linked to form a unified outcome/response.</td>
</tr>
<tr>
<td>Communicate</td>
<td>Make known, transfer information, convey ideas to others.</td>
</tr>
<tr>
<td>Compare/Comparison</td>
<td>Identify the main factors relating to two or more items/situations, explain the similarities and differences, and in some cases say which is best and why.</td>
</tr>
<tr>
<td>Competent</td>
<td>Showing the necessary ability, knowledge, or skill to do something successfully.</td>
</tr>
<tr>
<td>Term</td>
<td>Definition</td>
</tr>
<tr>
<td>-----------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Complete</td>
<td>Include the required information.</td>
</tr>
<tr>
<td>Comprehensive</td>
<td>The work is well developed and thorough, covering all pertinent aspects/information to evidence understanding in terms of both breadth and depth. All elements are considered in equal depth and breadth.</td>
</tr>
<tr>
<td>Confident/ce</td>
<td>Exhibit certainty, having command over information/argument, etc. Demonstrate secure application of skills or processes.</td>
</tr>
<tr>
<td>Consider/Consideration</td>
<td>Review and respond to given information.</td>
</tr>
<tr>
<td>Considered</td>
<td>Reached after, or carried out with, careful thought.</td>
</tr>
<tr>
<td>Consistency</td>
<td>Steps in a process followed repeatedly and as intended.</td>
</tr>
<tr>
<td>Creative</td>
<td>Using techniques, equipment and processes to express ideas or feelings in new ways.</td>
</tr>
<tr>
<td>Demonstrate</td>
<td>Carry out and apply knowledge, understanding and/or skills in a practical situation.</td>
</tr>
<tr>
<td>Describe/Description</td>
<td>Set out characteristics. Provide clear information that includes the relevant features, elements or facts.</td>
</tr>
<tr>
<td>Detailed</td>
<td>Point-by-point consideration that includes relevant and accurate features, elements or facts with examples, reasons and attention to particulars, having additional facts or information beyond a simple response.</td>
</tr>
<tr>
<td>Developed</td>
<td>Consider and expand on all relevant points in detail.</td>
</tr>
<tr>
<td>Dexterity/Dextrous</td>
<td>Perform a difficult action quickly and skilfully with the hands or the ability to think quickly and effectively.</td>
</tr>
<tr>
<td>Effective</td>
<td>Applies relevant knowledge and understanding and/or skills appropriately to a task and achieves the desired outcome; successful in producing a desired or intended result.</td>
</tr>
<tr>
<td>Excellent</td>
<td>Consistently high standard of skill in completing a practical task.</td>
</tr>
<tr>
<td>Extensive</td>
<td>Large in range or scope.</td>
</tr>
<tr>
<td>Few</td>
<td>A small number or amount, not many but more than one.</td>
</tr>
<tr>
<td>Fully</td>
<td>Completely or entirely; to the fullest extent.</td>
</tr>
<tr>
<td>Generally</td>
<td>Appropriate in most cases, with a few exceptions.</td>
</tr>
<tr>
<td>Generic</td>
<td>Characteristic of or relating to a class or group of things; not specific.</td>
</tr>
<tr>
<td>Good</td>
<td>The work gives information and careful consideration about many/several elements of the context, usually point by point, and lines of reasoning are clear, valid, relevant and logical.</td>
</tr>
<tr>
<td>Term</td>
<td>Definition</td>
</tr>
<tr>
<td>----------------------</td>
<td>-----------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Identify/ing/Identification</td>
<td>Name or otherwise characterise the main features or purpose of something.</td>
</tr>
<tr>
<td>Inaccurate</td>
<td>Work produced incompetently, unfit for purpose with error.</td>
</tr>
<tr>
<td>Incomplete</td>
<td>Not fully finished, with one or more parts of a task missing.</td>
</tr>
<tr>
<td>In-depth</td>
<td>Covering most, or all, important points of a subject.</td>
</tr>
<tr>
<td>Insightful</td>
<td>Showing an accurate and deep understanding.</td>
</tr>
<tr>
<td>Insufficient/ly</td>
<td>Lacking adequate evidence.</td>
</tr>
<tr>
<td>Interpret</td>
<td>State the meaning, purpose or qualities of something using images, words or other expressions.</td>
</tr>
<tr>
<td>Investigate</td>
<td>Carry out research or trial activities to increase understanding of the application of information.</td>
</tr>
<tr>
<td>Irrelevant</td>
<td>Inapplicable in the argument.</td>
</tr>
<tr>
<td>Judgement</td>
<td>An opinion formed by discerning and comparing.</td>
</tr>
<tr>
<td>Justify</td>
<td>Give reasons or evidence to support an opinion or prove something right or reasonable.</td>
</tr>
<tr>
<td>Largely</td>
<td>Appropriate on the whole or to a great extent.</td>
</tr>
<tr>
<td>Limited</td>
<td>The work is narrow in competence, ability, range or scope, including only a part of the information required to evidence partial, rather than full, knowledge, understanding and/or skills and is often tentative in relation to context.</td>
</tr>
<tr>
<td>Linkages</td>
<td>Factor/content relates directly to another area of content/factor.</td>
</tr>
<tr>
<td>Little</td>
<td>A very small amount of evidence, or low number of examples, compared with what was expected, is included in the work.</td>
</tr>
<tr>
<td>Logical/ly</td>
<td>Reasonable and sensible. Methods or processes followed in a way that shows clear, sound reasoning.</td>
</tr>
<tr>
<td>Many</td>
<td>A large number of (less than ‘most’).</td>
</tr>
<tr>
<td>Methodically</td>
<td>Tasks carried out in an orderly and logical manner.</td>
</tr>
<tr>
<td>Most/ly</td>
<td>Nearly all of the content which is expected has been included.</td>
</tr>
<tr>
<td>Narrow</td>
<td>Limited in terms of range. Only considers a few aspects.</td>
</tr>
<tr>
<td>Often</td>
<td>Most of the time with a few exceptions.</td>
</tr>
<tr>
<td>Partial/ly</td>
<td>To some extent, but not completely. Some key points are included, but others are missing.</td>
</tr>
<tr>
<td>Perceptive</td>
<td>Insightful, showing a deep level of understanding.</td>
</tr>
<tr>
<td>Persuasive</td>
<td>Influencing through reasoning.</td>
</tr>
<tr>
<td>Term</td>
<td>Definition</td>
</tr>
<tr>
<td>------------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Pertinent</td>
<td>Considered and thoughtful approach in relation to the task/activity which demonstrates an astute understanding of contributing factors and/or links.</td>
</tr>
<tr>
<td>Precision</td>
<td>Use of accuracy and refinement to a method or process.</td>
</tr>
<tr>
<td>Professional</td>
<td>According to industry standards.</td>
</tr>
<tr>
<td>Range</td>
<td>The evidence presented is sufficiently varied to give confidence that the knowledge and principles are understood in application as well as in fact.</td>
</tr>
<tr>
<td>Realistic</td>
<td>Will work in a real setting.</td>
</tr>
<tr>
<td>Reasonable</td>
<td>Fair or moderate.</td>
</tr>
<tr>
<td>Reasoned/Reasoning</td>
<td>Justified, to understand and to make judgements based on practical facts.</td>
</tr>
<tr>
<td>Refine</td>
<td>Improve initial work, taking feedback into account.</td>
</tr>
<tr>
<td>Reflect</td>
<td>Think carefully and review information and/or performance – includes articulating ideas, concepts, activities, findings or features.</td>
</tr>
<tr>
<td>Relevant</td>
<td>Correctly focused on the activity. Applicable to the situation/context/task.</td>
</tr>
<tr>
<td>Review</td>
<td>Consider something formally in order to give an opinion on it based on appropriate evidence or information with the intention of instituting change if necessary.</td>
</tr>
<tr>
<td>Secure</td>
<td>Well-practised and confident in ability and skills.</td>
</tr>
<tr>
<td>Select</td>
<td>Choose the best or most suitable option related to specific criteria or outcomes.</td>
</tr>
<tr>
<td>Sensitivity</td>
<td>Understand and respond to needs and emotions.</td>
</tr>
<tr>
<td>Show</td>
<td>Present using practical skills.</td>
</tr>
<tr>
<td>Significant</td>
<td>Of a noticeably or measurably large amount or importance.</td>
</tr>
<tr>
<td>Simplistic</td>
<td>The work is composed of one part only, without elaboration/examples/details.</td>
</tr>
<tr>
<td>Some</td>
<td>A small amount or number of items, several items will be missing, list will be incomplete.</td>
</tr>
<tr>
<td>Specific</td>
<td>Relating directly to a particular area or subject.</td>
</tr>
<tr>
<td>State</td>
<td>Express something definitely or clearly.</td>
</tr>
<tr>
<td>Straightforward</td>
<td>To the point and easy to understand.</td>
</tr>
<tr>
<td>Sufficient</td>
<td>Meet the basic needs or requirements of a situation/context but with some limitations.</td>
</tr>
<tr>
<td>Suitable</td>
<td>Appropriate for a particular purpose.</td>
</tr>
<tr>
<td>Term</td>
<td>Definition</td>
</tr>
<tr>
<td>--------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Summarise</td>
<td>Gather together all of the main aspects of a given situation or experience in a condensed format.</td>
</tr>
<tr>
<td>Superficial</td>
<td>Lacking depth of knowledge or understanding. Generic response, with no link to the task context.</td>
</tr>
<tr>
<td>Supported</td>
<td>Validated with evidence.</td>
</tr>
<tr>
<td>Systematically</td>
<td>Follows a method or procedure accurately, logically and in the correct order of process.</td>
</tr>
<tr>
<td>Tentative</td>
<td>Uncertain in approach or connection to the task or context.</td>
</tr>
<tr>
<td>Thorough</td>
<td>Comprehensive and extremely attentive to accuracy and detail.</td>
</tr>
<tr>
<td>Timely</td>
<td>Methods/techniques used when necessary/appropriate.</td>
</tr>
<tr>
<td>Unbalanced</td>
<td>All factors have not been considered in equal detail; some are considered in more detail than others.</td>
</tr>
<tr>
<td>Unclear</td>
<td>Not obvious or definite; ambiguous.</td>
</tr>
<tr>
<td>Unrealistic</td>
<td>Inappropriate to reality and will not work in a real setting.</td>
</tr>
<tr>
<td>Unsupported</td>
<td>Not verified or substantiated with evidence.</td>
</tr>
<tr>
<td>Well</td>
<td>To a high standard or degree of completion.</td>
</tr>
<tr>
<td>Wide range</td>
<td>Includes many relevant details, examples or contexts, thus avoiding a narrow or superficial approach; a broad approach taken to scope/scale; a comprehensive list of examples given.</td>
</tr>
