

Interactive Essential Digital Skills (iEDS)

New digital product to support EDSQ qualifications

A series of short, easily accessible and bite-sized interactive courses are designed to support learners undertaking Essential Digital Skills Qualifications.

The iEDS digital platform contains clear visual support and audio guidance throughout the courses and comprehensively covers all learning aims in the EDSQ suite at both levels. This helps improve and encourage learner confidence and engagement with digital skills, as well as supporting the tutors delivering EDSQ.

Interested?

iEDS courses are designed to be taken in conjunction with learners undertaking EDSQ qualifications, to help boost and reinforce specific topics within the five key areas. Alternatively, iEDS can also be taken separately to the qualification, as stand-alone individual courses.

Each individual course is **£5.99** (5 available)

Bundle Price for Entry Level: **£22**

Bundle Price for Level 1: **£22**

Each course covers one of five key areas

These digital interactive courses are available for Entry Level and Level 1, covering the five main content areas for the EDSQ qualification standards. Providing focus and direction for learners, enabling them to gain the understanding and knowledge needed to complete the EDSQ qualifications or improve their digital skills alongside other learning developments.

The five key areas covered by the courses are:

- 1 Using devices and handling information** – using hardware and software, searching and navigating on different devices.
- 2 Creating and editing** – using apps to enter and edit information, capturing and saving multimedia in varied locations.
- 3 Communicating** – sending and receiving communications.
- 4 Transactions** – e-commerce and buying online.
- 5 Being safe and responsible online** – being safe online, protecting your data, etc.

The benefits of iEDS courses

- Enable and develop learner confidence in using relevant digital tools in today's current workforce environments.
- The platform can operate on any device. Allowing for flexible learning and ease when getting started with the engaging content within the software.
- EDSQ aims to develop learner confidence in digital skills, iEDS support this, by providing detailed guidance on key digital skills knowledge areas, instrumental in learner's progression.
- Allows learners to develop and practice their skills online, remotely and independently.
- High levels of interactivity and engagement with tasks to complete inside and outside the software.
- Fully mapped to the EDSQ qualifications.
