Functional Skills Qualifications from Pearson

Functional Skills qualifications from Pearson, the world's leading learning company. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications website at qualifications.pearson.com. Alternatively, you can get in touch with us using the details on our contact us page.

Pearson: helping people progress, everywhere

Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

**FUNCTIONAL SKILLS (MATHEMATICS)
MARK SCHEME – LEVEL 1 – NOVEMBER 2017**

Guidance for Marking Functional Skills Maths Papers

General

- All candidates must receive the same treatment. You must mark the first candidate in exactly the same way as you mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- All the marks on the mark scheme are designed to be awarded. You should always award full marks if deserved, i.e. if the answer matches the mark scheme. You should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.

Applying the Mark Scheme

- The mark scheme has a column for **Process** and a column for **Evidence**. In most questions the majority of marks are awarded for the process the candidate uses to reach an answer. The evidence column shows the most likely examples you will see if the candidate gives different evidence for the process, you should award the mark(s).
- **Finding 'the answer'**: in written papers, the demand (question) box should always be checked as candidates often write their 'final' answer or decision there. Some questions require the candidate to give a clear statement of the answer or make a decision, in addition to working. These are always clear in the mark scheme.
- If working is **crossed out and still legible**, then it should be marked, as long as it has not been replaced by alternative work.
- If there is a **choice of methods** shown, then mark the working leading to the answer given in the answer box or working box. If there is no definitive answer then marks should be awarded for the 'lowest' scoring method shown.
- A suspected **misread** may still gain process marks.
- It may be appropriate to **ignore subsequent work (isw)** when the candidate's additional work does not change the meaning of his or her answer.
- You will often see correct working followed by an incorrect decision, showing that the candidate can calculate but does not understand the functional demand of the question. The mark scheme will make clear how to mark these questions.
- **Transcription** errors occur when the candidate presents a correct answer in working, and writes it incorrectly (on the answer line in a written paper); mark the better answer.
- **Incorrect method** if it is clear from the working that the "correct" answer has been obtained from incorrect working, award 0 marks. Send the response to review for your Team Leader to check.
- **Follow through marks (ft)** must only be awarded when explicitly allowed in the mark scheme. Where the process uses the candidate's answer from a previous step, this is clearly shown. Speech marks are used to show that previously incorrect numerical work is being followed through, for example '**240**' means **their** 240.
- Marks can usually be awarded where **units** are not shown. Where units, including money, are required this will be stated explicitly. For example, 5(m) or (£)256.4 indicates that the units do not have to be stated for the mark to be awarded.
- **Correct money notation** indicates that the answer, in money, must have correct notation to gain the mark. This means that money should be shown as £ or p, with the decimal point correct and 2 decimal places if appropriate. e.g. if the question working led to $£12 \div 5$,

FUNCTIONAL SKILLS (MATHEMATICS)
MARK SCHEME – LEVEL 1 – NOVEMBER 2017

Mark as correct: £2.40 240p £2.40p 2.40£ Mark as incorrect: £2.4 2.40p £240p 2.4 2.40 240

- Candidates may present their answers or working in many **equivalent** ways. This is denoted **oe** in the mark scheme. Repeated addition for multiplication and repeated subtraction for division are common alternative approaches. The mark scheme will specify the minimum required to award these marks.
- A **range** of answers is often allowed:
 - [12.5, 105] is the inclusive closed interval
- **Parts of questions:** because most FS questions are unstructured and open, you should be prepared to award marks for answers seen in other parts of a question, even if not explicit in the expected part. E.g. checks in on earlier answer box.
- **Graphs**
 The mark schemes for most graph questions have this structure:

Process	Mark	Evidence
Appropriate graph or chart – (e.g. bar, stick, line graph)	1 or	1 of: linear scale(s), labels, accurate plotting (2 mm tolerance)
	2 or	2 of: linear scale(s), labels, accurate plotting (2 mm tolerance)
	3	all of: linear scale(s), labels, accurate plotting (2 mm tolerance)

The mark scheme will explain what is appropriate for the data being plotted.

A **linear scale** must be linear **in the range where data is plotted**, and use consistent intervals. The scale may not start at 0 and not all intervals must be labelled. Thus a graph that is 'fit for purpose' is one where the **data is displayed clearly and values can be read**, will gain credit.

The minimum requirements for **labels** will be given, but you should give credit if a title is given which makes the label obvious.

Plotting must be correct for the candidate's scale. Candidate's scale must be in numerical order. Award the mark for plotting if you can read the values, even if the scale is not linear.

The mark schemes for **Data Collection and/ or summary Sheets** refer to **input opportunities** and to **efficient input opportunities**. When a candidate gives an input opportunity, it is likely to be an empty cell in a table, it may be an instruction to 'circle your choice', or it may require writing in the data in words. These become efficient, for example, if there is a well-structured 2-way table, or the input is a tick or a tally rather than a written list.

Discuss any queries with your Team Leader.

FUNCTIONAL SKILLS (MATHEMATICS)
MARK SCHEME – LEVEL 1 – NOVEMBER 2017

Question	Skills Standard	Process	Mark	Mark Grid	Evidence
Q1(b)	R2	Extracts information from timetable	1	C	8:15 (bus departure time) May be seen in subsequent working
	R1	Starts process to working with time	1 or	D	45(mins) OR 7:15 + 10(mins) (=7:25 am) oe OR '8:15' – 10 (mins) (=8:05 am) oe OR '8:15' – 7:15 (=1 hour) oe Ft from C mark
	A4	Completes process to find figures to compare	2 or	DE	7:15 + 10(mins) + 45(mins) (=8:10 am) oe OR '8:15' – 10 (mins) – 45(mins) (=7:20 am) oe OR '8:15' – 7:15 (=1 hour) oe and 10 + 45 (=55mins) oe Ft from C mark
	I6	Correct decision with accurate figures	3	DEF	No AND 8:10 (am) AND 8:15 (am) oe OR No AND 7:20 (am) OR No AND 5 (mins extra) OR No AND 1 (hour) and 55(mins)
Total marks for question			6		

FUNCTIONAL SKILLS (MATHEMATICS)
MARK SCHEME – LEVEL 1 – NOVEMBER 2017

Question	Skills Standard	Process	Mark	Mark Grid	Evidence
Q2	R1	Begins mean process or reverse calculation	1 or	G	$56 + 42 + 47 + 59 + 48 (=252)$ OR $50 \times 5 (=250)$ Allow ordering and showing an intention to select the middle value
	A4	Completes process to find figures to compare	2 or	GH	'252' $\div 5 (=50.4)$ OR $56 + 42 + 47 + 59 + 48 (=252)$ and $50 \times 5 (=250)$ Allow selection of 48
	I6	Correct decision with accurate figures	3	GHJ	Yes AND 50(.4) OR Yes AND 252 and 250 Allow No AND 48 All figures must come from correct processes seen
	A5	Valid check	1	K	Valid check e.g. reverse calculation or alternative method
Total marks for question			4		

FUNCTIONAL SKILLS (MATHEMATICS)
MARK SCHEME – LEVEL 1 – NOVEMBER 2017

Question	Skills Standard	Process	Mark	Mark Grid	Evidence															
Q3(a)	R2	Starts to work with amounts	1 or	L	e.g. $80 \div 8 (= 10)$ OR $45 \div 5 (=9)$ OR $8 \div 5 (= 1.6)$ OR $5 \div 8 (=0.625)$ OR $80 \div 45 (=1.7..)$ OR $45 \div 80 (=0.5625)$ oe															
	A4	Correct process to find figures to compare	2 or	LM	e.g. '10' $\times 5 (=50)$ OR '9' $\times 8 (=72)$ OR $80 \div 8 (= 10)$ and $45 \div 5 (=9)$															
	I6	Correct decision with accurate figures	3	LMN	e.g. No AND 50 (eggs) OR No AND 72 (people) OR No AND 10 and 9 (flans) OR No AND 0.5625 AND 0.625 oe															
Q3(b)	R1	Begins to prepare sheet	1 or	P	Input opportunities AND 1 of: Heading for questions (meal, service, value) Heading for rating (poor, OK, good)															
	R3	Improves sheet	2 or	PQ	Input opportunities AND Heading for questions (meal, service, value) AND Heading for rating (poor, OK, good)															
	I6	Efficient fully correct data summary sheet	3	PQR	Fully correct, fit for purpose, efficient input opportunities e.g. <table border="1" style="margin-left: 20px;"> <thead> <tr> <th></th> <th>Poor</th> <th>OK</th> <th>Good</th> </tr> </thead> <tbody> <tr> <td>Meal</td> <td></td> <td></td> <td></td> </tr> <tr> <td>Service</td> <td></td> <td></td> <td></td> </tr> <tr> <td>Value</td> <td></td> <td></td> <td></td> </tr> </tbody> </table>		Poor	OK	Good	Meal				Service				Value		
	Poor	OK	Good																	
Meal																				
Service																				
Value																				
Total marks for question			6																	

FUNCTIONAL SKILLS (MATHEMATICS)
MARK SCHEME – LEVEL 1 – NOVEMBER 2017

Section B: Holiday in Pula

Question	Skills Standard	Process	Mark	Mark Grid	Evidence
Q4	R1	Engages with the diagram	1 or	A	Finds a route starting or finishing at the hotel that goes past/through at least two of: the church, the arch and the Old Town (indicated by names, distances or on diagram)
	I6	Finds a correct route no more than 6 km	2	AB	Finds a route starting and finishing at the hotel that goes past/through all of: the church, the arch and the Old Town with a total distance of no more than 6 km (indicated by names, distances or on diagram) e.g. H to A to OT to C to H
	A4	Full process to find the total distance for their route	1 or	C	e.g. $0.5 + 1.6 + 1.2 + 1.3 + 0.8 (=5.4)$ $0.5 + 0.5 + 0.8 + 0.8 + 0.9 + 1.2 + 0.9 (=5.6)$ NB their route must include at least three distances
	I6	Accurate distance for their route	2	CD	e.g. $(0.5 + 1.6 + 1.2 + 1.3 + 0.8 =) 5.4$ (km) OR $(0.5 + 0.5 + 0.8 + 0.8 + 0.9 + 1.2 + 1.3 + 0.8 =) 6.8$ (km)
Total marks for question			4		

FUNCTIONAL SKILLS (MATHEMATICS)
MARK SCHEME – LEVEL 1 – NOVEMBER 2017

Question	Skills Standard	Process	Mark	Mark Grid	Evidence
Q5(a)	R1	Begins to draw graph or chart	1 or	E	One of: Linear scale, labels, accurate plotting (2 mm tolerance)
	I6	Develops graph or chart	2 or	EF	Two of: Linear scale, labels, accurate plotting (2 mm tolerance)
	I6	Fully correct suitable graph or chart	3	EFG	All of: Linear scale, labels, accurate plotting (2 mm tolerance) Graph must be of a sensible or appropriate size Minimum labels: number or people, W(alking), D(ay boat trip), E(vening boat trip), C(able car), L(ake)
Q5(b)	R3	Process to work with fraction	1 or	H	18000 ÷ 3 (=6000) OR 5400 × 3 (=16200) OR 5400 ÷ 18000 (=0.3) OR 18000 ÷ 5400 (=3.33..)
	A4	Correct decision with accurate figures	2	HJ	No AND 6000 OR No AND 16200 OR No AND 0.3 or and 0.33(3..) OR No AND 3.3.. and 3
	A5	Valid check	1	K	e.g. reverse calculation or alternative method
Total marks for question			6		

FUNCTIONAL SKILLS (MATHEMATICS)
MARK SCHEME – LEVEL 1 – NOVEMBER 2017

Question	Skills Standard	Process	Mark	Mark Grid	Evidence
Q6(a)	I6	Interprets criteria	1	L	Indicates C(lub Hotel)
Q6(b)	R2	Works with percentage	1 or	M	$0.15 \times 250 (=37.5)$ oe
	I6	Starts process to work with capacities	2	MN	37.5(0) (Croatian Kuna)
Total marks for question			3		

Question	Skills Standard	Process	Mark	Mark Grid	Evidence
Q7	R3	Starts process to work with rule	1 or	P	$230 \times 3 (=690)$ OR $230 \div 25 (=9.2)$ OR $26.5 \times 25 (=662.5)$ OR $26.5 \div 3 (=8.833\dots)$
	A4	Complete process	2 or	PQ	'690' $\div 25 (=27.6)$ OR '9.2' $\times 3 (=27.6)$ '662.5' $\div 3 (=220.833\dots)$ OR '8.833...' $\times 25 (=220.833\dots)$
	I6	Correct decision with accurate figures	3	PQR	Offer A AND (£)27(.60) OR Offer A AND 220(.83) (Croatian Kuna)
Total marks for question			3		

FUNCTIONAL SKILLS (MATHEMATICS)
MARK SCHEME – LEVEL 1 – NOVEMBER 2017

Section C: Hot tub

Question	Skills Standard	Process	Mark	Mark Grid	Evidence
Q8	R2	Process to work with percentage	1	A	$20 \div 100 \times 5000 (=1000)$ oe may be seen in subsequent working
	R3	Starts process to find difference in cost	1 or	B	$2 \times 12 (=24)$ OR $183.8 \times 12 (=2205.6)$ OR $183.8 \times 2 (=367.6)$ OR $5000 - 1000 (=4000)$
	A4	Develops process	2 or	BC	'24' \times 183.8 (=4411.2) oe OR '4000' \div 12 (=333.33..) OR '4000' \div 2 (=2000) OR '4000' \div 183.8 (=21.76..) OR
	A4	Completes process to find difference	3 or	BCD	e.g. '4411.2' + '1000' – 5000 (=411.2) oe Ft A mark
	I6	Correct answer with accurate figures in correct money notation	4	BCDE	£411.20 (in correct money notation)
Total marks for question			5		

FUNCTIONAL SKILLS (MATHEMATICS)
MARK SCHEME – LEVEL 1 – NOVEMBER 2017

Question	Skills Standard	Process	Mark	Mark Grid	Evidence
Q9(a)	R3	Starts to consider constraints	1 or	F	rectangle with side 10 sq lengths or 6 sq lengths OR with sides in ratio 5:3
	A4	Develops solution	2 or	FG	rectangle 10 sq lengths by 6 sq lengths AND 1 of: at least 2 sq lengths away from each edge or at least 4 sq lengths away from the house OR rectangle with one side 10 sq lengths or 6 sq lengths AND all of: at least 2 sq lengths away from each edge or at least 4 sq lengths away from the house
	I6	Fully correct diagram	3	FGH	rectangle 10 sq lengths by 6 sq lengths AND at least 2 sq lengths away from each edge AND at least 4 sq lengths away from the house AND not overlapping the shed (Example at bottom of MS)

FUNCTIONAL SKILLS (MATHEMATICS)
MARK SCHEME – LEVEL 1 – NOVEMBER 2017

Question	Skills Standard	Process	Mark	Mark Grid	Evidence
Q9(b)	R1	Uses consistent units	1	J	e.g. 2(m), 500(cm), 300(cm) may be seen in subsequent calculations
	R3	Process to work with perimeter or total of fencing available	1 or	K	$2 \times (5 + 3) (=16)$ oe OR $5 \div '2' (=2.5)$ or $3 \div '2' (=1.5)$ oe OR Subtracts at least 2 lengths from any dimensions e.g. '500' – 200 – 200 (=100) OR $200 \times 7 (=1400)$
	A4	Full process to find figures to compare	2 or	KL	e.g. '16' \div '2' (=8) OR ' $2.5' \times 2 + '1.5' \times 2 (=8)$ oe OR $2 \times (5 + 3) (=16)$ oe AND $7 \times '2' (=14)$
	I6	Correct decision with accurate figures	3	KLM	No AND 8(lengths) oe OR No AND 16(m) and 14(m) oe OR No AND 1(length short) or 2(m short)
Q9(c)	A4	Process to find time to fill hot tub	1 or	N	$1350 \div 18 (=75)$ OR $1350 \div (18 \times 60) (=1.25)$ oe
	I6	Accurate figure with correct units	2	NP	75 mins OR 1.25 hours oe OR 1 hour 15 mins (in correct units)
	A5	Valid check	1	Q	Valid check e.g. reverse calculation or alternative method
Total marks for question			10		

FUNCTIONAL SKILLS (MATHEMATICS)
MARK SCHEME – LEVEL 1 – NOVEMBER 2017

Question	Skills Standard	Process	Mark	Mark Grid	Evidence
Q10	I6	Reads correct temperature	1	R	-3(°C)
Total marks for question			1
