Apprenticeship in

Network Cable Installer

Apprenticeship in Network Cable Installer

Pearson works in partnership with employers to create and deliver apprenticeships which give your apprentices the best opportunity to achieve their full potential and to progress further in their employment.

This standard provides the communications backbone for the digital infrastructure ecosystem, enabling all types of digital devices including computers, servers, smart devices, security equipment, wireless access points, access control, building management systems and lighting systems to communicate between each other, internally, nationally and globally. This is key to support the demand needed to meet the requirements of the future.

OUR APPRENTICESHIP OFFER

We offer a high-quality end-to-end apprenticeship solution for the following standard.

| Standard | Level | On - programme | | EPA |
|-------------------------|-------|----------------------|-------------------------------------|-----------------------|
| | | Qualifications | Resources | |
| Network Cable Installer | 3 | No mandatory courses | Learning Hub - Workplace behaviours | Coming September 2021 |

OUR EPA

The Level 3 EPA consists of a Professional Discussion and a Practical Demonstration. We are working with industry specialists and technically competent specialists to ensure our materials will support and give the depth of information required for apprentices to be successful in this technical apprenticeship. We are creating webinars to prepare apprentices and tutors to get ready for EPA. These will be led by our Lead IQA who has many years' experience in this field. We are looking at innovative ways to make the EPA a great experience for the learner without impacting their day job and whilst allowing them to perform to the highest level.

TESTIMONIALS

"I have many years' experience within the telecoms engineering sector. These standards accurately reflect the attitudes, knowledge, skills and behaviours that are required to operate within our sector. I have worked with a number of stakeholders in the design and implementation of these standards and the respective EPA's and I can say with confidence that this is exactly what our industry needs. We have agreed to work with Pearson, as they reflect our own approach to professionalism, are responsive to employers and share our passion for apprenticeships and high-quality training."

Roy Fraser - Business and Quality Director, Digital Telecoms Network Academy

Pearson is an awarding body as well as end-point assessment organisation (EPAO) and is regulated by OFQUAL.

+ OUR SUPPORT

- **High quality resources:** developed in collaboration with experts, including resources that are apprentice-focused and designed to specifically help them prepare for the different components alongside detail of the content that needs to be delivered and the evidence that will be required for assessment.
- **Your Pearson support team:** thorough guidance from your business development manager and EPA delivery team, giving you clear step-by-step guidance for every stage of the process.
- **Steps to success webinars:** Providing support and guidance to employers, providers, and apprentices at key stages of the EPA journey, including planning, implementation, delivery and assessment.
- **Standards focused webinars:** providing insight into the standards and how you can get the most out of them.

| Standard | Level | Qualification | EPA |
|--------------------------|-------|---------------|-----|
| Digital Marketer | 3 | Yes | Yes |
| Telecoms Field Operative | 2 | No | Yes |
