Apprenticeships explained
A guide for employers
We know apprenticeships

Three million more apprenticeships by 2020 means even more life-changing opportunities for our young people. More than that, apprenticeships make sense for business.

We are putting employers at the heart of quality apprenticeships so that young people get the skills they need to succeed.”

Former Business Secretary Sajid Javid, 2016

A win-win recruitment strategy for your business

Apprenticeships and traineeships help develop a skilled, motivated and qualified workforce. Many businesses are viewing them as vital to their long-term growth and development. Apprenticeships ensure that your workforce has the practical skills and qualifications your organisation needs now, and in the future. The mixture of on and off the job learning means they learn the skills that work best for your business.

Many employ an entry-level, higher-level or degree apprentice in order to improve the skills base within their business and you could also consider creating apprenticeships programmes to upskill existing staff.

Similarly, traineeships offer the opportunity to build a pool of high-quality future recruits whilst helping young people to take their first steps towards employment or as a stepping stone to an apprenticeship.

With help recruiting and funding available too, taking on an apprentice or trainee is a winning strategy for many UK businesses.

This guide will take you through the process of recruiting apprentices, explain the funding available and recent government changes to apprenticeships in England. It will provide you with all the information you need to develop your own work-based learning recruitment strategy. We’ll also explain how Pearson can help you do that.

Quick fact: Over 250,000 workplaces in England alone offer apprenticeships
The growing economy needs apprentices and trainees – and so does your business

Apprenticeships and traineeships are highly valued in the UK economy and central to future business growth and productivity, which is why the government is planning to increase the number of apprenticeships available. The demand for apprenticeships is growing too. In fact, the latest figures suggest there are 11 applications for every apprenticeship vacancy!

By the end of 2020, the government hopes to have created 3 million apprenticeships in England, helping more learners find their way into skilled and well-paid employment to boost the economy.

- **£1.8 billion** of net economic benefits to UK businesses in 2012/13
- 3 million apprenticeships delivered in England
- In fact, the latest figures suggest there are 11 applications for every apprenticeship vacancy!
- By the end of 2020, the government hopes to have created 3 million apprenticeships in England.
The solution

The purpose-built Lloyds Bank Advanced Manufacturing Training Centre (AMTC) - based on the Manufacturing Technology Centre (MTC) campus at Ansty Park near Coventry – was specially built to provide premium training for the next generation of engineers and technicians. Offering opportunities to learn with leading experts and prominent academic partners in manufacturing and engineering, AMTC apprentices – around 40 new apprentices each year - will gain a solid foundation in engineering skills and confidence in areas that underpin high-value manufacturing, focusing on three core disciplines:

- Intelligent automation technology including robots, drives and sensor technology.
- Computer-aided engineering (CAE) and computer-aided design (CAD) and advanced 3D printing.
- Metrology – measurement and inspection of materials, products, coordinate measuring machines (CMM) including 3D scanning.

This is backed up by training in project management, team working, and health and safety, which culminates in professional registration with the IMechE as an EngTech.

The outcomes

The MTC was recently named as one of the top 100 apprenticeship employers in the country, winning praise for its success in tackling the current skills shortage and developing a new generation of engineers with its flagship apprenticeship programme.

Some 22% of MTC employees are currently apprentices, graduates or on sponsored Year in Industry placements, which has qualified the centre for membership of the 5% Club. This demonstrates its commitment to ensuring that at least 5% of its workforce are enrolled on formalised apprentice, sponsored student, or graduate development schemes.

Apprentices at the centre are also gaining accolades for their work. From revamping mini cars for an ‘Italian Job’ race through Europe, to a project to design a habitation module for manufacturing on the Moon; AMTC’s apprentice engineers are showcasing their skills in fun tasks that demonstrate just how diverse, creative and rewarding engineering can be.

The people

Kerry Smith is in her second year of the Level 3 Advanced Apprenticeship in Engineering.

Having moved from retail and deciding university wasn’t for her, she’s not short of insight into the diversity of engineering. She is currently working on the ‘Manufacturing on the Moon’ competition.

“You gain so much more by doing an apprenticeship than just by studying,” said Kerry. “You get a hands-on experience that you need for a successful career in engineering and you’re able to develop a lot quicker because you’re learning the practical skills needed by this industry.

“The facilities at the centre enable us to work with the latest technology and equipment and we get great support and expert advice from the many specialist engineers and industry professionals based here.”

Kerry Smith, Level 3 Advanced Apprenticeship in Engineering student
The basics
The basics

What is an apprenticeship?
When people think of apprenticeships they tend to think of electricians, plumbers, car mechanics and hairdressers – all learning a trade. This is true, but apprenticeships can be used to train and develop people in almost any business or sector and now cover more than 1500 job roles from hospitality services to hairdressing, retail and nursing. They are available across a number of different levels of role: from apprenticeships for new starters to higher and degree apprenticeships.

An apprenticeship is on-the-job training available to those aged 16 and over. Apprenticeships usually last between 12 to 18 months. Depending on the sector and level, some can last up to four years. Throughout the time of the apprenticeship, an apprentice is trained and guided towards a skilled role within a business, often with the help of a training provider so they gain industry knowledge and the skills required to do the job. The skills, knowledge and behaviour apprentices need to develop for a job role are defined by either a framework from the old system or an apprenticeship standard under the new system. Apprentices can be new recruits or come from within your existing workforce.

Apprenticeships levels explained

<table>
<thead>

</tr>
<tr>
<td>Level 5</td>
<td>Bachelor’s degree level</td>
</tr>
<tr>
<td>Level 6</td>
<td>Master’s degree level</td>
</tr>
</tbody>
</table>

A qualification for every level
Anyone over 16 in employment can do an apprenticeship, progressing directly from their GCSE. 18-24 year olds can also do a traineeship and progress onto an apprenticeship, into work or further study, including a Higher Apprenticeship.

What is a traineeship?
A traineeship is an education and training programme with work experience that is focused on giving young people the skills and experience that employers are looking for.

Designed to help young people aged 16 to 24 who don’t yet have the appropriate skills or experience, traineeships provide the essential work preparation training, English, maths and work experience needed to secure an apprenticeship or employment.

Apprentice or graduate?
Apprenticeships and traineeships have come a long way and there are now a huge variety on offer compared to ten years ago, making them even more appealing to today’s students.

As tuition fees make studying as an undergraduate a less appealing option for some, apprenticeships can let students go straight into their chosen career and start earning whilst learning.

Although graduate recruitment remains more robust than the general employment market, there is still a 19% unemployment rate for graduates two years out of university and a 7% rate for those who graduated between two and four years ago. Businesses who employ graduates are also finding that many move on from roles before having the opportunity to fulfil their potential.

Many employers see apprenticeships as a way to ensure that they do not lose out on any talent that cannot afford to go to university, as well as to broaden the diversity of their workforces.

Fast food provider McDonald’s captured this sentiment, telling the Institute of Directors’ annual conference: “We need to acknowledge that the road many young people take today may not be the one we took. We need to remove the snobbery that draws down workplace learning. It should not be that only high flyers, this could and should be the route they take. Universities are getting more competitive and expensive. Work-based training can be a fine option for many people.” – Jill McDonald (former CEO of McDonald’s)

Many employers see apprenticeships as a way to ensure that they do not lose out on any talent that cannot afford to go to university, as well as to broaden the diversity of their workforces.
Back to business
how apprenticeships have changed in England

Why was reform necessary?
Apprenticeship reform was needed as a key measure to address the changing skills landscape. The annual CBI/Pearson Education and Skills Survey (started in 2008) tracks the shift away from low-skilled jobs towards high-skilled jobs (managerial, professional and associate professional roles) as well as the difficulties faced by employers needing to recruit staff with STEM skills and knowledge.

Over the last decade, the number of firms reporting difficulty recruiting STEM skills has remained consistently around the 40-45% mark, while the overall figure of businesses not confident there will be enough people available in the future with the skills to fill their high-skilled jobs reached a new high (55%) in 2016.

The main change for employers has been how apprenticeships are created and funded. Learning providers (mainly local colleges and private training providers) and employers now work closely together to develop new standards. If your annual pay bill is more than £3 million, you will also have to contribute a 0.5% levy which will go towards funding apprenticeships in the UK. You will receive a £15,000 allowance to offset against your payment.

What are Trailblazer groups?
The most critical and far-reaching of the reforms was to put business, rather than Further Education, in charge of developing new apprenticeship syllabuses and assessment criteria - now known as ‘standards’ and ‘assessment plans’ as opposed to the gradually outgoing ‘SASE frameworks’. Where students may once have elected certain pathways within a framework to specialise within a more general career, now there will be a single standard per occupation.

New standards are created by volunteer groups of at least 10 different employers within a sector, known as ‘trailblazer groups’, who together decide upon the core knowledge, skills and behaviours (KSBs) needed for mastery of a particular occupation. They also design ‘end point assessments’ that will demonstrate that mastery has been achieved.

From youth scheme to quality professional development
While many will argue that apprenticeships have never only been for young school-leavers with a less-academic focus, the reform of the system has meant a change in mindset about the scope and scale of apprenticeships. Running from Level 2 to a Level 7, they are equally available for low-skill and high-skill occupations, with an increasing number of degree-level apprenticeships making inroads into traditionally Higher Education territory. This makes them a great tool to develop in-house talent pipelines as well as entry level workers.

Whatever your business, there is almost certainly an apprenticeship route under the new system that will work for you.
Live outside England?

Apprenticeships schemes in Scotland and Wales are managed slightly differently to England. Scottish businesses should contact 0800 783 6000 for help and advice on Scottish Modern Apprenticeships or go to www.skillsdevelopmentscotland.co.uk. For Welsh businesses, if you’re interested in finding out more about taking on an apprentice and the benefits they can bring, contact the Business Wales Helpline on 03000 603600 or email: businesssupport@wales.gsi.gov.uk. Pearson support the development of Scottish and Welsh apprenticeships - contact us for no obligation chat on 0844 576 0045.
Planning your programme

How to create a thriving learning and development strategy that works for your business

Apprenticeships are a great way for employers to fill in skill gaps and it is absolutely vital to put the time into defining how you want your programme to benefit your business and employees. When starting a new apprenticeship or traineeship programme there are various crucial elements that all contribute to a successful programme.
Making the most of the levy

In order to achieve an ambitious target of 3 million new apprenticeship starts in 2020, the Government introduced the Apprenticeship Levy in April 2017. Levy payers receive a 10% top-up from the government to help fund their apprenticeship programmes. For SMEs, this proportion is inverse. Employers contribute 10% of the cost of funding, and the government will top up the remaining 90% up to the funding band maximum.

The Apprenticeship Levy - Q&A

What is the Levy?

The Levy was introduced in April 2017 and is paid by large organisations with a paybill of over £3 million a year, affecting less than 2% of UK employers.

Why has it been brought in?

Apprenticeships are a key plank of the government’s skills strategy and the Levy was introduced to help achieve the ambitious target of 3 million new high-quality apprenticeships.

How much is it?

1.5% of your pay bill (offset by an annual allowance of £3,000).

Your partnership options

Employers now have the power to take control over selecting the right training provider for them. There is a new Digital Apprenticeship Service (DAS) that helps you search for and select a training provider.

Option 1

Partnering with a training provider

What’s involved

Use a training provider to deliver all training.

What’s involved

- Find a provider through recommendations, visiting websites or the DAS website.
- Training providers can help identify suitable apprenticeship frameworks and create a contract.
- Find a provider through the DAS.
- Create a plan for training on the levy.
- Get your provider to help you find an end-point assessment organisation.
- They can help you recruit apprentices through their networks, including schools and colleges.
- Your training provider oversees your levy funding directly from the DAS.

Did you know?

You can include training delivered outside of your work place, such as on site or off site.

Did you know?

You can contact distance learning organisations who specialise in the off-the-job training method.

Did you know?

You can deliver 20% off-the-job training as part of the levy.

Option 2

Do it yourself

What’s involved

Create your own in-house training programme.

What’s involved

- Invest in people, resources and facilities - a significant upfront cost that should pay off in the long run.
- Set a long-term apprenticeships growth plan that justifies doing your own training.
- Apply to be on the Register of Apprenticeship Training Providers (RoATP).
- Work with your people process - they’re entirely your responsibility.
- You can provide all of the training at any point.
- You can deliver the whole training package internally.

Did you know?

Did you know?

Did you know?

Pick and mix

Combine internal and external training.

What’s involved

A lot of management and coordination - this approach might justify additional apprenticeship management headcount.

- The approach is for organisations with large and mature apprenticeship programmes, who are in the refining and improving phase of development.
- This approach is suitable for organisations who are in need of extra capacity.
- Really being on top of funding rules and processes - they’re entirely your responsibility.
- You can provide all of the training at any point.
- You can deliver the whole training package internally.
- You can provide any funding arrangements for the training.
- You can apply for the Register of Apprenticeship Training Providers (RoATP).

Did you know?

Did you know?

Did you know?

Option 3

Combine internal and external training.

What’s involved

This approach is for organisations with large and mature apprenticeship programmes, who are in the refining and improving phase of development.

- You can provide all of the training at any point.
- You can deliver the whole training package internally.
- You can apply for the Register of Apprenticeship Training Providers (RoATP).

Recruiting and supporting apprentices

Recruitment
Apprenticeships are a great way for employers to grow their core talent. They also provide an excellent route for young people to enter the labour market when starting out in their careers. There are many ways of recruiting an apprentice and the route you take will depend on the age of the apprentice you are looking to recruit. You could:

- Advertise and recruit in the same way you would any employee
- Use your training partners to help you recruit
- Liaise with the Government-sponsored ‘Get in go far’ apprenticeship support site (England only)
- Recruit directly from schools/colleges - this is a good way to attract high quality candidates. You could run information stands at open days, attend careers events and invite young people to visit your company.
- Use appropriate websites and social media including local networks and career fairs

Remember that apprentices can come from within your own organisation as well so ‘recruitment’ in this sense might be from within your existing internal workforce.

Support
Supporting your apprentice(s) is vital in making your programme successful, they can’t be forgotten about once employed. There are many ways of ensuring your apprentice is getting the support they need:

- Sharing with colleagues - this opens the apprentice up to a different part of the business and contributes to their 20% off-the-job
- Apprentice lunches - meeting up with other apprentices and talking to each other about factors of working life
- Training sessions - listening to someone who has been in the role they are trying to learn
- Weekly one to ones - with either a line manager or mentor just to ensure they are keeping up with work and don’t have any worries they wish to share
- Day release at college/training provider - this is able to upload and monitor what they are doing in a portfolio. By having a portfolio, the apprentice can contribute towards your apprentices’ 20% off-the-job training. Evidence could be
diary entries (logbooks)
- Shadowing another department or colleague
- Reading resources
- Mandatory induction courses (health and safety, building procedures, introduction to office life…)
- Research via the internet
- Reading resources
- Shadowing another department or colleague
- Diary entries (logbooks)
- Certificates (Proof of courses completed)
- Timeline
- Diary entries

Pearson have a range of resources all covering 20% off-the-job and the confusion surrounding it. We also answer a lot of frequently-asked questions in our webinars, however if you have a question that you feel has not been answered, please feel free to ask.

What is off-the-job training?
According to the definition provided in the Funding Rules for Training Providers May 2017 to March 2018: “Off-the-job training is defined as learning which is undertaken outside of the normal day-to-day working environment and leads towards the achievement of an apprenticeship. This can include training that is delivered at the apprentice’s normal place of work but must not be delivered as part of their normal working duties.”

Why is there a 20% off-the-job training rule?
The government believes that ensuring a substantial component of the apprenticeship is given over to off-the-job training is a key way to safeguard the quality of the apprenticeship. While learning skills on the job is no less essential in any profession, combining this with broader learning about the occupation offers deeper understanding and knowledge, skills and behaviours that are transferable to other businesses, while allowing the apprentice to bring that knowledge back into your organisation during their period of employment.

There is a good precedent for this. Other countries with high-performing and well-established apprenticeship systems also split the apprentice’s time between work and vocational school - often to a much greater degree than in England. In France for example, it is 50/50. In the Netherlands between 20-40%: Employers delivering the new apprenticeship systems also need to give their apprentices off-the-job training for at least 20% of their employed time. The good news is that this training programme can be designed to best suit your business and industry.

Some examples of 20% off-the-job training include:
- Day release at college/training provider premises
- Mandatory induction courses (health and safety, building procedures, introduction to office life…)
- Research via the internet
- Reading resources
- Shadowing another department or colleague
- Diary entries (logbooks)
- Certificates (Proof of courses completed)
- Timeline
- Diary entries

There are just a few of the tasks that could contribute towards your apprentices’ 20% off-the-job training. Evidence that these activities took place needs to be provided and is usually gathered in a portfolio. By having a portfolio, the apprentice is able to upload and monitor what they are doing for their 20% off-the-job training. Evidence could be in the following formats:

- Essays
- Collage (Images, screenshots, quote blocks)
- Timeline
- Diary entries

Making 20% off-the-job work

Planning your programme
We need to acknowledge that the mad rumour you’re planning to take today may not be the one you took. For many put off by high fees, this could and should be the route they take. Work-based training can be a fine option for young people to consider.”
End-point assessment

End-point assessment (EPA) is the final assessment for an apprentice to ensure that they are able to do the job they have been training for. EPA is separate to any qualifications and assessments that the apprentice does during the on-programme stage of their apprenticeship.

EPA replaces continuous assessment as the method of determining whether an apprentice has developed the appropriate knowledge, skills and behaviours necessary for the job. EPA is an external, carried out independently to ensure impartiality within the testing but also to assess if the apprentice’s skills are transferable across the wider industry. Additionally, where a professional body has recognised the apprenticeship standard, the apprentice will gain professional accreditation/membership on completion of the end-point assessment.

All new apprenticeships are required to have an EPA that is carried out by an independent body. Apprentices must pass the EPA in order to achieve an apprenticeship certificate. There are many possible elements to an EPA, which are laid out in the assessment plan that comes with each standard:
- Professional discussion
- Practical observation
- Employer reference
- Multiple-choice test
- Knowledge test
- Portfolio based interview
- Project presentation

Sometimes apprentices must submit a diary of work that they have completed, a portfolio record of their work projects or prepare a presentation. Each of these varies in the workplace. The assessments chosen will differ from one type of work to another and can simulate what happens in the real workplace.

How do I prepare for EPA?
Between your training provider and end-point assessment organisation, you should receive online and print resources, such as checklists and practice papers to help both you and your apprentice prepare for the assessment. You should work with your providers to review these support materials as early as possible to give your apprentice the best possible start.

Who pays for EPA and how much does it cost?
At present, the training provider pays for it with the levy funds they receive from the employer but this may change in the long term, as plans for it to be managed through the apprenticeship system come into effect. The cost can vary depending on the type of assessment (e.g., online tests, observation) but the recommendation is that EPA should not exceed 20% of the funding band for each apprenticeship.
In this case study, we look at the work we have done with The Co-operative Group (or Co-op), to develop an apprenticeship scheme that revolves around its commitment to championing staff at all levels. The Co-op’s apprenticeship manager, Lloyd Thomas, is also chair of the Sector Skills Group. This group works with awarding organisations, including Pearson, to address the challenge of providing relevant apprenticeship courses to the retail industry, in line with new industry-led regulatory standards.

The Co-operative Group Working with employers to champion every apprentice

The Co-op employs nearly 70,000 people across its business portfolios. Central to its values is a desire to generate benefits for members, customers, staff and the wider community. One of its fundamental principles relates to the education and training of staff, so it’s no surprise that the Co-op has an effective and supportive apprenticeship programme.

The Co-op has worked with Pearson since 2011 to provide a first-class apprenticeship programme that develops the skills apprentices need to meet the Co-op’s business requirements.

We work directly with employers to ensure their apprenticeship schemes are mutually beneficial for employers and learners. Many employers recognise that investing in their staff from day one can deliver a significant return on investment.

We provide a Level 2 business admin qualification for its apprentices. Since April 2016, the Co-op has been taking the lead to create rewarding apprenticeships.

Taking the lead to create rewarding apprenticeships

The Co-op has worked with Pearson to develop an apprenticeship programme that is good for business, and since 2011 they have taken on over 1300 apprentices. They have all been paid the standard rate for the role they are training for (rather than the national minimum apprenticeship wage), and been offered the same employee benefits as those received by full-time employees.

The Co-op’s apprenticeship manager, Lloyd Thomas, is also chair of the retail Trailblazer Group. This group works with awarding organisations, including Pearson, to address the challenge of providing relevant apprenticeship courses to the retail industry, in line with new industry-led regulatory standards.

Developing the potential in every apprentice

The Co-op has worked with Pearson since 2011 to provide a first-class apprenticeship programme that develops the skills apprentices need to meet the Co-op’s business requirements.

With the support of Pearson and People 1st, the Co-op developed a Level 2 apprenticeship programme for funeral directors, and a Level 3 qualification for service operatives, and a Level 2 qualification for funeral arrangers and funeral service operatives. The Co-op also introduced a Level 2 food retail programme, which enables apprentices to progress to Levels 3 and 4. This programme provides apprentices with the opportunity to continually build on their existing skills, creating a pathway to managerial roles.

Changing the apprenticeship landscape with professional development for all staff members

The Co-op has worked with Pearson since 2011 to provide a first-class apprenticeship programme that develops the skills apprentices need to meet the Co-op’s business requirements.

The Co-op also introduced a Level 2 food retail programme, which enables apprentices to progress to Levels 3 and 4. This programme provides apprentices with the opportunity to continually build on their existing skills, creating a pathway to managerial roles.

Investing in nationwide apprenticeship development

In addition to his role with the Co-op, Lloyd is one of a group of employer representatives who offer their valuable perspectives on apprenticeships as part of Pearson’s advisory board, which looks closely at the wider agenda around supporting and developing apprenticeships and apprentices.

“We are beginning to change the perception of apprenticeships,” says Lloyd. “There are great options for anyone who comes out of school or university – apprenticeships are now seen as good choices for progressing quickly and earning good salaries. Most of the people I’m speaking to now are thinking along similar lines.”

Lloyd Thomas, Apprenticeship Manager at The Co-op

By implementing the new standards as part of an ongoing commitment to providing a first-class apprenticeship programme, the Co-op remains at the forefront of this changing employment landscape at the forefront of their business strategy means that the Co-op can now assert that they have a well-trained workforce – one that has been constantly carefully managed and assessed, and supported with high-quality assurance guidelines in mind.

There are great options for anyone who comes out of school or university – apprenticeships are now seen as good choices for progressing quickly and earning good salaries. Most of the people I’m speaking to now are thinking along similar lines.”

Lloyd Thomas, Apprenticeship Manager at The Co-op

The Co-op is currently working with Pearson to provide a Level 2 business admin qualification for its apprentices. Since April 2016, the Co-op has been integrating new apprenticeships into its offering that have been developed under the new Trailblazer standards.

Changing the apprenticeship landscape with professional development for all staff members

The Co-op’s Funeralcare programme has been so successful that every Funeralcare employee is now placed into one of its apprenticeship levels. The Co-op signed up to the 1500th Funeralcare apprentice in early 2016, and its 500th successful apprenticeship completion is now on the horizon.

Types of apprenticeships
The move from frameworks to standards

Older apprenticeships use a framework (called SASE frameworks) to ensure quality of delivery. New apprenticeship standards are now replacing the old SASE frameworks.

These new standards will:
- define an apprenticeship that lasts a minimum of 12 months
- be linked to a specific occupational level
- respond to employers’ needs, ensuring that apprenticeships are high quality and rigorous and develop the knowledge, skills and behaviour required for a specific job role
- be designed to prepare the apprentice for the (newly introduced) end-point assessment.

The standards are being created by groups of employers or ‘trailblazer groups’. Not all occupations have new standards yet but many are imminent.

Degree apprenticeships

Degree apprenticeships are innovative new qualifications that bring together the best of higher education and real-world experience. Pearson College London offers a range of three-year degree apprenticeship programmes including the BBC Degree Apprenticeship, Rotational Degree Apprenticeship and the Chartered Manager Degree Apprenticeship, and actively work with industry to design bespoke degree apprenticeship programmes to meet individual training and development requirements.

Invest in your biggest asset - people

Offering an apprenticeship to an existing member of staff shows that you see them as an integral part of your workforce and are happy to invest in their future by giving them additional training.

Employees who take apprenticeships are more likely to come back to your business with fresh insights having spent time learning and studying the industry off-the-job.

Why have existing staff members on apprenticeships?

Providing your current employees, who already have a grasp of your business, with the much-needed skills you need to grow makes business sense. Firstly, you cut out the process of finding someone well-suited for your organisation and job role. But most importantly, investing in your employees will enhance job satisfaction, and therefore create an efficient, motivated and committed workforce, all of which will help with the long-term development, productivity and retention rates of your organisation.

Apprenticeships could be an alternative, highly accessible and affordable means of training within your workplace.
We work closely with training providers to help them identify skills gaps, and develop customised programmes to fill them. Our flexible approach enables them to create sector-specific apprenticeship solutions.

In this case study, we look at how we collaborated with Babcock International Group to develop tailored apprenticeship programmes for their clients.

Babcock is a world-class engineering, training and technical support services company. They help thousands of organisations, across a wide array of disciplines, to get the best out of their employees. From training RAF pilots, retailers and drivers to fire fighters, scientists and motor mechanics, Babcock’s experience, insight and commitment to quality make it a trusted partner for many leading organisations in the UK.

In February 2016, Babcock was awarded the prestigious ‘Training Partner of the Year’ award at the Semta Annual Skills Awards.

Creating tailored training solutions

Babcock works with Pearson across a range of sectors, including hospitality and retail, adult care and children, and business administration and management. The challenge is to find the right people to fill the available roles and skills gaps in each sector.

A simplified recruitment process for employers and apprentices

The programme is tailored to the individual business, which improves the outcome for employers and learners. While employers get the skills and resources they need, learners are able to advance in their training and progress in their careers. Babcock has also made higher apprenticeships part of its solutions, enabling them to extend their apprenticeship offering from Levels 2 and 3 to Levels 4 and 5.

Babcock and Pearson have developed a strategic partnership to ensure the programmes continue to match the demands of the apprenticeship market, and we intend to continue this close collaboration as the market evolves and the new apprenticeship standards become established.

The customised nature of Babcock’s apprenticeship programmes means that the outcome is different for every client. Here are two examples from Babcock’s major clients, to help illustrate how tailor-made solutions have led to business success.

Example 1:

Babcock has provided a national apprenticeship solution to Asda, one of the UK’s largest supermarket retailers, since May 2013, supporting over 8,400 Asda apprentices since the launch, with more than 30 job-specific pathways available. This means that Asda’s employees benefit from tailored training wherever they work in the business.

The apprenticeship programme has achieved a range of return on investment measures. It is operating above the national average in terms of success rates and is having a positive impact on learner progression with many progressing from a Level 2 to a Level 3 qualification.

The partnership between Asda and Babcock has received a number of awards including the Scottish Training Federation’s Large Employer of the Year 2014 and Success in Partnership 2015 awards, recognising the strength of the model.

Example 2:

Babcock developed the Marriott Culinary Apprenticeship Academy with Marriott Hotels, a partnership that has gone from strength to strength in 15 years. The academy aims to develop the technical skills of young professional chefs, and supports increases in professional standards, teamwork and staff retention.

The academy offers masterclasses, classroom-based workshops, market supplier visits and competitions, all of which are carefully designed to build each apprentice’s technical knowledge and professional skills.

Chef apprentices from Marriott Hotels join apprentices from all over the UK to attend the academy, allowing each apprentice to benefit from effective peer-to-peer support.

The Marriott Culinary Apprenticeship Academy first launched in 2012 with 16 apprentices, and has been so successful that, for the 2015/16 cohort, it expanded over 40 places – all of which have been filled.

Babcock and Pearson have developed a strategic partnership to ensure the programmes continue to match the demands of the apprenticeship market, and we intend to continue this close collaboration as the market evolves and the new apprenticeship standards become established.
We know apprenticeships

Design, develop and deliver an apprenticeship programme tailored to your business with Pearson.

Investing in people is key to growing your business. And apprenticeships can be a very cost-effective way to bring new skills and talent to your workforce.

From understanding the new world of apprenticeships and building a programme around engaging content that supports off-the-job learning, to end-point assessment and beyond, we can help.

We know the challenges and opportunities of apprenticeships from our experience supporting employers with theirs, whilst also growing our own employee apprenticeship programme. We’ve used this insight to develop our end-to-end range of services that can help you get the skills your workforce needs through apprenticeships.

Business challenge #1 - Kate

“I’m an HR Manager, tasked with getting apprenticeships off the ground since the levy came in. There’s so much to understand and I don’t have the time to do the research needed to put together a plan.

I need to understand how the levy works and what we can spend it on, as well as where apprentices should fit into our workforce, how to find them and who trains and assesses them. I’ve been approached by training providers, who have been helpful, but I felt they were steering me towards their services.

What I’m after is information and guidance from a source that’s credible and independent. Government info is independent but lacks the context I need to translate it to my company. Once I have a handle on things, I can make more of an informed decision about planning a programme and who we’ll work with to deliver it.”
We work with private and public sector employers from a wide range of industries, from the MOD to major corporations, to design their apprenticeship programmes and deliver that off-the-job training; so we know each organisation’s needs are unique and one size does not fit all.

We have delivery capability from entry-level professions all the way up to degree apprenticeships and are experienced in large-scale programmes comprising several different apprenticeships.

Our expertise is in developing content for job-focused learning contexts, from learners taking our vocational BTEC qualifications to degree apprentices studying at Pearson College.

Our apprenticeship learning content is mapped to standards and provided through a digital platform, giving apprentices flexibility with off-the-job learning; plus we offer a wide range of qualifications, developed in consultation with industry, that support apprentices’ learning.

As an ESFA-approved end-point assessment organisation, we put EPA at the heart of apprenticeship planning, embedding regular touchpoints with employers and training providers to ensure apprentices are fully prepared for their assessments.

In designing and delivering EPA for over a thousand apprentices annually, we draw on our extensive experience and expertise in assessments for job-focused learning.

Why choose Pearson?

Programme design and delivery tailored to your organisation

- Our expertise is in developing content for job-focused learning contexts, from learners taking our vocational BTEC qualifications to degree apprentices studying at Pearson College.
- Our apprenticeship learning content is mapped to standards and provided through a digital platform, giving apprentices flexibility with off-the-job learning; plus we offer a wide range of qualifications, developed in consultation with industry, that support apprentices’ learning.

Apprenticeship content that engages and inspires apprentices

An end-point assessment service that embeds planning and dedicated support from the start

- As an ESFA-approved end-point assessment organisation, we put EPA at the heart of apprenticeship planning, embedding regular touchpoints with employers and training providers to ensure apprentices are fully prepared for their assessments.
- In designing and delivering EPA for over a thousand apprentices annually, we draw on our extensive experience and expertise in assessments for job-focused learning.
Training delivery

We work with private and public sector employers from a range of industries to design apprenticeship programmes and deliver off-the-job training.

Pearson TQ
We provide an end-to-end fully managed apprenticeship service. Covering a full service of design and delivery of apprenticeship programmes to your organisation. Pearson TQ works closely with employers to link full advantage of the apprenticeship levy by maximising your investment, enriching your talent and shaping new employees from day one.

Our managed apprenticeship service is tailored to specific needs and corporate strategy of each organisation, with an apprenticeship bundle learning approach, designed to suit both the learner and the organisational environment.

Business challenge #2 - Joe

"To have an apprenticeship trail which we've run for years, but the reforms have made my job more complicated. The levy is not too much of a headache, as it's mainly a Finance issue, but 20% off-the-job and EPA are taking some getting used to.

We need to get both 100% right for the sake of our apprentices. Reliable information and guidance around these requirements would be invaluable. Training providers are supporting the 20% off-the-job training element but we still have to think about scheduling apprentices' time and consider programme design and content.

We're a bit nervous about EPA, as we're not sure when we need to start planning it and which EPAO to work with. Transitioning to the new standards is also a challenge, as we can only use the new programme, retraining content that works for off-the-job training, so we're talking about programme redesign."

On-programme learning content

Your apprenticeship programme will be unique: no other business will have the same set-up and needs as yours. To this end, we provide a diverse range of options to suit your requirements for the on-programme part of your apprenticeships, drawing on extensive experience of developing content for work-focused learning situations.

Digital learning content:
- We are continually developing dynamic learning content aligned to apprenticeship standards to provide to apprentices through our digital platform, bringing flexibility to their off-the-job training and delivering an engaging and stimulating learning experience.

Qualifications:
- Technical qualifications that fulfill the mandatory qualification requirements outlined in some apprenticeship standards.
- Vocational qualifications with relevant job-focused content can also be used to support apprentices' learning, even where these are not a mandatory part of the standards.
- Functional Skills qualifications in English and mathematics, required to evidence competency for apprentices who do not have the necessary GCSE grades.

We work with private and public sector employers from a range of industries to design apprenticeship programmes and deliver off-the-job training.

- Vocational qualifications with relevant job-focused content can also be used to support apprentices' learning, even where these are not a mandatory part of the standards.
- Functional Skills qualifications in English and mathematics, required to evidence competency for apprentices who do not have the necessary GCSE grades.
End-point assessment

End-point assessment (EPA) is the final stage of the apprentice’s learning journey. It is a synoptic assessment that evaluates the skills, knowledge and behaviours the apprentice has developed through their apprenticeship. We work closely with employers and training providers to plan, design and deliver end-point assessments that help apprentices successfully complete their apprenticeships.

We provide a step-by-step process to support your organisation, line managers and training providers in preparing for end-point assessment.

This includes:
- An end-point assessment service delivery contract.
- Access to a dedicated Account Manager as a single point of contact.
- Monthly touchpoints for EPA planning starting at least five months prior to the estimated EPA delivery date.
- A Countdown to EPA service that is tailored to each individual standard.
- An EPA delivery management team to ensure a high-quality service delivery that is consistent and reliable.
- Trained and occupationally competent assessors, carefully chosen and vetted to meet Pearson’s quality standards.
- Detailed verbal and written feedback on each assessment completed.
- Re-assessment service.
- Certification claim from the ESFA.
- Data and management reporting on an annual basis to inform continuous improvement.

How we can help
In this case study, we look at the bespoke higher national qualifications we have created with the Tottenham Hotspur Foundation and Hertford Regional College to widen participation in higher education for young people from North London. In particular, the area around Tottenham Hotspur’s new stadium regeneration scheme.

The Tottenham Hotspur Foundation prides itself on creating opportunities that change the lives of those living in its local communities and around the world. Their higher education provision was launched in 2010 and offers students the opportunity to gain higher level study and professional skills within a Premier League football club environment.

The Club’s official charitable body works with a wide range of age groups from primary school children and their parents, to older people living in sheltered accommodation, with education and employment opportunities at the heart of what they do. The Employment and Skills team works with local people to develop vocational skills, gain work experience and access local job opportunities.

Hertford Regional College (HRC) is a medium sized General Further Education college with the development of employability skills and vocational expertise at the heart of all its provision. The college’s ‘Destination Curriculum’ strategy focuses on preparing students at all levels for successful careers. The college is committed to raising aspiration and expectations for all its students. HRC has a growing portfolio of higher education courses designed in collaboration with employers and industry professionals. 94.8% of students on these programmes progress to employment or further study.

The project
In the summer of 2016, Hertford Regional College and the Tottenham Hotspur Foundation commissioned the development of bespoke Pearson SRF Higher National qualifications in Event and Stadium Management.

Commissioning a BTEC Higher National qualification allowed the Tottenham Hotspur Foundation and Hertford Regional College to address skill shortages in the sector.

Students will attend face to face delivery of lectures, seminars and tutorials over three days per week. They will also participate in work placements at their stadium that average 4 hours per week over 23 weeks, including merchandise sales, hospitality and catering, VIP support, stewarding and crowd management. Work placements will occur on match and non-match days.

Commissioning a BTEC Higher National qualification allowed the Tottenham Hotspur Foundation and Hertford Regional College to address skill shortages in the sector by delivering the most relevant content, tailored to the needs of employers. This is a good example of how technical professional educational needs can be met by bespoke higher nationals, particularly if any employers are looking to provide training at level 4 or 5 to meet the requirements of the apprenticeship levy. It really demonstrates the impact of what can be accomplished when employers and local colleges work in collaboration to widen participation in higher education.

These new BTEC Higher National qualifications will be launched in September 2017, and a Higher National Diploma qualification holder may progress into Honours Degree top up programmes.

How bespoke Higher National qualifications can work for you:
By developing a Higher National qualification that will be nationally and internationally recognised, you will be fostering the most relevant talent to meet your company’s skills plan, and supporting succession planning.

Higher National Certificates and Diplomas (HNCs and HNDs) are Ofqual regulated qualifications that are mapped to the Framework for Higher Education Qualifications.
