

Higher National Apprenticeships (HNA®)

A Higher Apprenticeship provides a unique opportunity for students to learn through work and is a great alternative to traditional academic models of higher education. They are designed to train them to do a specific job, or qualify in a named occupation. As a Level 4/5 Higher Apprentice, they can gain a nationally-recognised qualification equivalent to the first or second years of a university degree, whilst working, getting paid, and receiving practical, on-the-job training. Higher Apprenticeships are suitable for those working in higher level technical and professional roles, and those with responsibility for managing, training and developing others.

Mapping for Standards in Construction

Within these qualifications, there are multiple Units and Learning Outcomes that have the potential to meet different aspects of the Apprenticeship Standards. This mapping document seeks to identify those Units (at Level 4) that may provide assessed evidence of meeting the relevant element of the different Standards.

The mapping below is not exhaustive, and there are a number of opportunities throughout mandatory and optional units to assess the requirements of the Standards.

Mapping to the Pearson BTEC Level 4 Higher National Certificate in Construction in the Built Environment and the BTEC Level 4 Higher National Certification in Construction to the Construction Surveying Technician Apprenticeship Standard

The Higher Nationals in Construction & The Built Environment and Higher Nationals in Construction have different pathways. To meet the requirements of this Apprenticeship Standard, centres will typically deliver the Construction or Surveying Pathways.

Standard Title:	Construction	Surveying Technician	Apprenticeship Level:	4
				Higher National Learning Outcome 1 4 3
Knowledge, skills and behaviours	Description	Definition of the Minimum Requirements	Higher National Unit	National Learning
Knowledge 1	Health and	Understand the principles and	Unit 3: Science & Materials	1
	Safety	responsibilities imposed by law and other regulations in a construction	Unit 4: Construction Practice & Management	4
		environment	Unit 21: Site Supervision & Operations	3
			Unit 5: Legal & Statutory Responsibilities in Construction	3
Knowledge 2	Sustainability	Understand the sustainability issues in	Unit 3: Science & Materials	2,3
		projects across economic, social and environmental aspects	Unit 16: Principles of Alternative Energy	4
		·	Unit 17: Principles of Public Health Engineering	3
Knowledge 3	Construction		Unit 2: Construction Technology	1,2,3
Technology	techniques and materials and the principles of design	Unit 3: Science & Materials	3,4	
Knowledge 4 Cont	Contracts	Understand different forms of contracts used in construction and why they are applied in different situations	Unit 5: Legal & Statutory Responsibilities in Construction	4
			Unit 13: Tender & Procurement	2
Knowledge 5	Procurement	Understand the different types of procurement process and negotiation requirements	Unit 13: Tender & Procurement	1,2,3,4
Knowledge 6	Cost Control	Understand the importance of controlling costs during a construction project and the effect of changes to the	Unit 1: Individual Project	2,3
			Unit 11: Measurement & Estimating	3
		project	Unit 13: Tender & Procurement	4
			Unit 12: Financial Management and Business Practices in Construction	2,4
			Unit 15: Principles of Refurbishment	4
Knowledge 7	Financial	Understand the various forms of	Unit 1: Individual Project	2,3
	Reporting	reporting on project progress	Unit 4: Construction Practice & Management	3
Skill 1	Health &	Apply health and safety issues to all	Unit 3: Science & Materials	1
	Safety	activities	Unit 4: Construction Practice & Management	4
			Unit 21: Site Supervision & Operations	3
			Unit 5: Legal & Statutory Responsibilities in Construction	3

Skill 2 Sus	Sustainability	Demonstrate application of the	Unit 3: Science & Materials	2,3
		principles of sustainability	Unit 16: Principles of Alternative Energy	4
			Unit 17: Principles of Public Health Engineering	3
Skill 3	Construction	Assist in the implementation of	Unit 2: Construction Technology	1,2,3
	Technology	the most appropriate solutions for construction projects	Unit 3: Science & Materials	3,4
Skill 4	Contracts	Be able to apply different types of contracts to different situations	Unit 5: Legal & Statutory Responsibilities in Construction	4
			Unit 13: Tender & Procurement	2
Skill 5	Procurement	Assist in the selection of and negotiation with specialist contractors for a construction project	Unit 13: Tender & Procurement	1,2,3,4
Skill 6	Cost Control	Assist in the measurement and costing	Unit 11: Measurement & Estimating	3
		of construction works during a project.	Unit 13: Tender & Procurement	4
			Unit 12: Financial Management and Business Practices in Construction	2,4
Skill 7	Financial	Assist in the preparation of financial reports, cash flow and cost forecasts	Unit 1: Individual Project	2,3
	Reporting reports, cash flow and cost forecasts for a construction project	Unit 4: Construction Practice & Management	3	
Skill 8	Administration	Assist in the collection, collation and storage of relevant data and its analysis	Unit 6: Construction Information (Drawing, Detailing, Specification)	1,3,
			Unit 14: Building Information Modelling	1,2,3,4
Behaviour 1	Commitment to Code of Ethics	Work within Rules and Regulations of Professional Competence and Conduct for the Royal Institution of Chartered Surveyors	Unit 13: Tender & Procurement	1
Behaviour 2	Sustainability	Demonstrate application of the principles of sustainability	Unit 21: Site Supervision and Operations	4
Behaviour 3	Construction Technology	Assist in the implementation of the most appropriate solutions for construction projects	Unit 21: Site Supervision and Operations	4
Behaviour 4	Communicate	Be able to contribute effectively to	Unit 1: Invidual Project	4
	Effectively	meetings and present information in a variety of ways including oral and	Unit 7: Surveying, Measuring & Setting-out	4
		written.	Unit 8: Mathematics for Construction	2
			Unit 10: Principles of Ventilation and Air Conditioniong Design & installation	3
			Unit 16: Principles of Alternative Energy	3
			Unit 18: Civil Engineering Technology\	2, 4
			Unit 21: Site Supervision and Operations	2, 4
Behaviour 5	Conflict avoidance	Be able to assist in planning to avoid conflict and resolving issues that do arise	Unit 21: Site Supervision and Operations	4
Behaviour 6	Work in Teams	Be able to work with others in a	Unit 4: Construction Practice & Management	4
		collaborative and non-confrontational way.	Unit 6: Construction Information (Drawing, Detailing, Specification)	4
Behaviour 7	Demonstrate	Be able to identify areas for	Unit 4: Construction Practice & Management	3
	Innovation	improvement and suggest innovative solutions.	Unit 7: Surveying, Measuring & Setting-out	4
			Unit 21: Site Supervision and Operations	4

Mapping to the Pearson BTEC Level 4 Higher National Certificate in Construction in the Built Environment and the BTEC Level 4 Higher National Certification in Construction to the Building Services Engineering Technician Apprenticeship Standard

The Higher Nationals in Construction & The Built Environment and Higher Nationals in Construction have different pathways. To meet the requirements of this Apprenticeship Standard, centres will typically deliver the Building Services Pathway.

Standard Title:	Building Service	es Engineering Technician	Apprenticeship Level:	4
Knowledge, skills and behaviours	Description	Definition of the Minimum Requirements	Higher National Unit	Higher National Learning Outcome

			Unit 21: Site Supervision & Operations	1,3
Skill 5	Planning and Organising Work	Understand overall plan for project and measure and record progress against plan	Unit 1: Individual Project	1
			Unit 4: Construction Practice & Management	3,4
			Unit 6: Construction Information (Drawing, Detailing, Specification)	1,2,4
			Unit 9: Principles of Heating Services Design & Installation	1
			Unit 10: Principles of Ventilation and Airconditioning Design & Installation	1
			Unit 13: Tender & Procurement	1,3
			Unit 14: Building Information Modelling	1,4
			Unit 16: Principles of Alternative Energy	3
			Unit 18: Civil Engineering Technology	1,2
			Unit 20: Principles of Structural Design	4
Skill 6	Monitor Quality	Assess and report on quality standards and assist in commissioning of finished construction projects	Unit 6: Construction Information (Drawing, Detailing, Specification)	2
			Unit 11: Measurement & Estimating	1,2
			Unit 13: Tender & Procurement	1
			Unit 14: Building Information Modelling	1,2,3,4
			Unit 15: Principles of Refurbishment	4
Skill 7	Monitor Costs	Understand financial and legal constraints and measure and record progress against budget	Unit 11: Measurement & Estimating	3
			Unit 13: Tender & Procurement	4
			Unit 12: Financial Management and Business Practices in Construction	2,4

Standard Title:	Construction Site Supervisor		Apprenticeship Level:	4
Behaviour 1	Professional Judgement	Be able to work within own level of competence and know when to seek advice from others	Unit 1: Invidual Project	2,4
			Unit 4: Construction Practice & Management	4
			Unit 21: Site Supervision and Operations	2,4
Behaviour 2	Commitment to Code of Ethics	Work within Rules and Regulations of Professional Competence and Conduct for the Chartered Institute of Building	Unit 4: Construction Practice & Management	1
			Unit 13: Tender & Procurement	4
Behaviour 3	Continuting Professional Development	Identify own development needs and take action to meet those needs. Use own knowledge and expertise to help others when requested.	Unit 21: Site Supervision and Operations	4
Behaviour 4	Commitment to Equality and Diversity	Understand the importance of equality and diversity and demonstrate these attributes so as to meet the requirements of fairness at work.	Unit 21: Site Supervision and Operations	4
Behaviour 5	Planning and Organising Work	Understand overall plan for project and measure and record progress against plan	Unit 1: Invidual Project	4
			Unit 7: Surveying, Measuring & Setting-out	4
			Unit 8: Mathematics for Construction	2
			Unit 6: Construction Information (Drawing, Detailing, Specification)	1,2,3,4
			Unit 21: Site Supervision and Operations	2, 4
Behaviour 6	Work in teams	Be able to work with others in a collaborative and nonconfrontational way.	Unit 4: Construction Practice & Management	4
			Unit 6: Construction Information (Drawing, Detailing, Specification)	4
Behaviour 7	Demonstrate Innovation	Be able to identify areas for improvement and suggest innovative solutions.	Unit 4: Construction Practice & Management	3
			Unit 7: Surveying, Measuring & Setting-out	4
			Unit 21: Site Supervision and Operations	4
