

Pearson BTEC International Level 2 Engineering Specification Update to Unit 3: 'Mathematics for Engineering'

Dear colleague,

In September 2014, we launched a new suite of Pearson BTEC International Level 2 qualifications, available [online here](#).

As a result of customer feedback and a subsequent review of these qualifications, we have decided to make a change to Unit 3 of the current [Pearson BTEC International Level 2 Engineering specification](#). The change is to revert back to Unit 3 of the preceding BTEC Level 2 First Engineering specification, available on our website here:

Pearson BTEC International Level 2 Engineering – Unit 3

From now on, please use this version of Unit 3 when delivering this qualification.

We are in the process of incorporating this version of Unit 3 into the current Pearson BTEC International Level 2 Engineering specification and will let you know when the updated specification is available.

Please share this information with other members of staff at your centre and encourage them to find out more by [visiting our website](#).

Best regards,

Pearson Qualifications International
