

## In a rush

### Alex

Alex is working on her joinery product. She's very excited about her work and she has had lots of ideas.

She talks to the other people in her group while she works and always helps people who ask her.

Today Alex is explaining to someone how to cut a right angle. While she is talking her tutor says something to the group.

Alex thinks it had something to do with the end time tomorrow, so carries on working. But an hour later the tutor says its time to stop work. Today they had to finish early. Alex hasn't finished her work and hasn't even begun to tidy up.

## Activity 8: Finishing up in time

Think about Alex's story and answer these questions.

1. What did Alex do well?

2. What could Alex have done better?

3. Should Alex have asked for help? If so, when?

4. Could Alex have planned her time better when she was working? How?
